Version: 2024-04-23

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
294	The sclerotiorin group of fungal metabolites: their structure and biosynthesis. 1963 , 7, 565-588		18
293	Deletion of pigR gene in <i>Monascus ruber</i> leads to loss of pigment production. 2013 , 35, 1425-32		35
292	Effect of pH and nonionic surfactant on profile of intracellular and extracellular <i>Monascus</i> pigments. <i>Process Biochemistry</i> , 2013 , 48, 759-767	4.8	58
291	Ku70 and ku80 null mutants improve the gene targeting frequency in <i>Monascus ruber</i> M7. <i>Applied Microbiology and Biotechnology</i> , 2013 , 97, 4965-76	5.7	33
290	Genetic localization and in vivo characterization of a <i>Monascus azaphilone</i> pigment biosynthetic gene cluster. <i>Applied Microbiology and Biotechnology</i> , 2013 , 97, 6337-45	5.7	92
289	Physicochemical characterization of starch isolated from red <i>Monascus</i> rice. 2013 , 9, n/a-n/a		
288	<i>Talaromyces atroseus</i> , a new species efficiently producing industrially relevant red pigments. <i>PLoS ONE</i> , 2013 , 8, e84102	3.7	92
287	Food Waste Valorisation for High Value Chemicals and Energy Production. 2014 , 187-202		1
286	Corn cob hydrolysate, an efficient substrate for <i>Monascus</i> pigment production through submerged fermentation. <i>Biotechnology and Applied Biochemistry</i> , 2014 , 61, 716-23	2.8	24
285	Optimal selection of agricultural products to inhibit citrinin production during submerged culture of <i>Monascus anka</i> . 2014 , 19, 1005-1013		6
284	Anticancer properties of <i>Monascus</i> metabolites. 2014 , 25, 735-44		16
283	An Optimized Method for the Preparation of <i>Monascus purpureus</i> DNA for Genome Sequencing. 2014 , 563, 379-383		2
282	Valuable Secondary Metabolites from Fungi. <i>Fungal Biology</i> , 2014 , 1-15	2.3	9
281	Mpp7 controls regioselective Knoevenagel condensation during the biosynthesis of <i>Monascus azaphilone</i> pigments. <i>Tetrahedron Letters</i> , 2014 , 55, 1640-1643	2	38
280	Cloning and functional analysis of the G ₁ gene Mgb1 and the G ₁ gene Mgg1 in <i>Monascus ruber</i> . 2014 , 52, 35-43		18
279	Filamentous fungi are large-scale producers of pigments and colorants for the food industry. 2014 , 26, 56-61		181
278	<i>Saccharina japonica</i> , a potential feedstock for pigment production using submerged fermentation. 2014 , 19, 711-719		11

277	Delineating Monascus azaphilone pigment biosynthesis: oxidoreductive modifications determine the ring cyclization pattern in azaphilone biosynthesis. 2014 , 4, 59405-59408	40
276	Efficient gene targeting in ligase IV-deficient <i>Monascus ruber</i> M7 by perturbing the non-homologous end joining pathway. 2014 , 118, 846-54	6
275	MpigE, a gene involved in pigment biosynthesis in <i>Monascus ruber</i> M7. <i>Applied Microbiology and Biotechnology</i> , 2014 , 98, 285-96	5-7 53
274	Insights into <i>Monascus</i> biology at the genetic level. <i>Applied Microbiology and Biotechnology</i> , 2014 , 98, 3911-22	5-7 52
273	<i>Monascus</i> azaphilone pigment biosynthesis employs a dedicated fatty acid synthase for short chain fatty acyl moieties. 2014 , 57, 191-196	32
272	Production of citrinin-free <i>Monascus</i> pigments by submerged culture at low pH. 2014 , 55, 50-7	82
271	Fluid Mechanics in Food Process Engineering. 2014 , 240-285	1
270	Polyketides, toxins and pigments in <i>Penicillium marneffei</i> . 2015 , 7, 4421-36	25
