

CITATION REPORT

List of articles citing

Complement protein C1q directs macrophage polarization and limits inflammasome activity during the uptake of apoptotic cells

DOI: 10.4049/jimmunol.1103760

Journal of Immunology, 2012, 188, 5682-93.

Source: <https://exaly.com/paper-pdf/54380040/citation-report.pdf>

Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

25 Circulating Levels of Anti-C1q and Anti-Factor H Autoantibodies and Their Targets in Normal Pregnancy and Preeclampsia.. *Frontiers in Immunology*, **2022**, 13, 842451 8.4 1

24 Understanding the contextual functions of C1q and LAIR-1 and their applications.. *Experimental and Molecular Medicine*, **2022**, 12.8 0

23 C5aR1 antagonism alters microglial polarization and mitigates disease progression in a mouse model of Alzheimer β disease. 0

22 Paeniflorin prevents aberrant proliferation and differentiation of intestinal stem cells by controlling C1q release from macrophages in chronic colitis. *Pharmacological Research*, **2022**, 182, 106309^{10.2}

21 Impaired immune function in the pathogenesis of systemic lupus erythematosus. **2022**, 2, 63-71

20 C5aR1 antagonism alters microglial polarization and mitigates disease progression in a mouse model of Alzheimer β disease. **2022**, 10,

19	A non-redundant role of complement protein C1q in normal and adverse pregnancy. 622-636	0
18	Mesenchymal stem cell-derived exosome-educated macrophages alleviate systemic lupus erythematosus by promoting efferocytosis and recruitment of IL-17+ regulatory T cell. 2022 , 13,	2
17	Analyzing integrated network of methylation and gene expression profiles in lung squamous cell carcinoma. 2022 , 12,	1
16	Complement membrane attack complex is an immunometabolic regulator of NLRP3 activation and IL-18 secretion in human macrophages. 13,	0
15	Resolution therapy: Harnessing efferocytic macrophages to trigger the resolution of inflammation. 13,	0
14	Microglia in motor neuron disease: Signaling evidence from last 10 years.	1
13	Identification of CFHR4 associated with poor prognosis of hepatocellular carcinoma. 12,	0
12	Emerging roles of neutrophils in immune homeostasis. 2022 , 55, 473-480	0
11	Pan-cancer analysis identifies migrasome-related genes as a potential immunotherapeutic target: A bulk omics research and single cell sequencing validation. 13,	0
10	Single-Cell Profiling Comparisons of Tumor Microenvironment between Primary Advanced Lung Adenocarcinomas and Brain Metastases and Machine Learning Algorithms in Predicting Immunotherapeutic Responses. 2023 , 13, 185	0
9	Macrophages promote heat stress nephropathy in mice via the C3a-C3aR-TNF pathway. 2023 , 228, 152337	0
8	Homologous recombination deficiency in triple-negative breast cancer: Multi-scale transcriptomics reveals distinct tumor microenvironments and limitations in predicting immunotherapy response. 2023 , 158, 106836	0
7	An immune score reflecting pro- and anti-tumoural balance of tumour microenvironment has major prognostic impact and predicts immunotherapy response in solid cancers. 2023 , 88, 104452	0
6	Complement in the Brain: Contributions to Neuroprotection, Neuronal Plasticity, and Neuroinflammation. 2023 , 41,	0
5	The case for complement component 5 as a target in neurodegenerative disease. 2023 , 27, 97-109	0
4	Severity of Lung Function Impairment Drives Transcriptional Phenotypes of COPD and Relates to Immune and Metabolic Processes. Volume 18, 273-287	0
3	C1q Confers Protection Against Cryptococcal Lung Infection by Alleviating Inflammation and Reducing Cryptococcal Virulence. 2023 , 10,	0
2	Quantitative proteomics analysis of COVID-19 patients: Fetuin-A and tetranectin as potential modulators of innate immune responses. 2023 , 9, e15224	0

1 Composome in the intracellular complement system.
