

CITATION REPORT

List of articles citing

Physical activity and the brain: a review of this dynamic, bi-directional relationship

DOI: 10.1016/j.brainres.2013.10.004
Brain Research, 2013, 1539, 95-104.

Version: 2024-04-23

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
169	Obesity and cognitive decline: role of inflammation and vascular changes. 2014 , 8, 375		205
168	R102Q mutation shifts the salt-bridge network and reduces the structural flexibility of human neuronal calcium sensor-1 protein. 2014 , 118, 13112-22		11
167	Qi Gong to Improve Postural Stability (QTIPS) for Parkinson Fall Prevention. 2014 , 30, 58-69		6
166	Dynamic metabolic changes after permanent cerebral ischemia in rats with/without post-stroke exercise: a positron emission tomography (PET) study. 2014 , 36, 475-82		11
165	Managing patients with neurologic disorders who participate in sports activities. 2014 , 20, 1657-66		
164	Concurrent occurrence of multiple positive lifestyle behaviors and depression among adults in the United States. 2014 , 165, 126-30		32
163	Organ-specific physiological responses to acute physical exercise and long-term training in humans. 2014 , 29, 421-36		49
162	Vitamin D: an anti-inflammatory treatment option for depression?. 2014 , 35, 227-34		5
161	Acute Exercise Improves Prefrontal Cortex but not Hippocampal Function in Healthy Adults. 2015 , 21, 791-801		74
160	Aerobic and Cognitive Exercise (ACE) Pilot Study for Older Adults: Executive Function Improves with Cognitive Challenge While Exergaming. 2015 , 21, 768-79		62
159	Need for Increased Promotion of Physical Activity Among Adults at Risk for Alzheimer's Disease: A Brief Report. <i>Journal of Physical Activity and Health</i> , 2015 , 12, 1601-4	2.5	5
158	The Effects of Exercise on Neuronal Survival. 2015 , 267-278		
157	Markers of adiposity among children and adolescents: implications of the isothermal substitution paradigm with sedentary behavior and physical activity patterns. 2015 , 14, 46		32
156	Deleterious effects of physical inactivity on the hippocampus: New insight into the increasing prevalence of stress-related depression. 2015 , 4, 253-258		4
155	. 2015 ,		4
154	Health-enhancing multibehavior and medical multimorbidity. 2015 , 90, 624-32		35
153	Physical activity is the best buy in medicine, but perhaps for less obvious reasons. 2015 , 75, 23-4		16

152	Exercise and cognitive function: a randomized controlled trial examining acute exercise and free-living physical activity and sedentary effects. 2015 , 90, 450-60		107
151	Linking genes to neurological clinical practice: the genomic basis for neurorehabilitation. 2015 , 39, 52-61		12
150	Relationship between physical activity and markers of oxidative stress in independent community-living elderly individuals. <i>Experimental Gerontology</i> , 2015 , 70, 26-31	4.5	15
149	Development of a Conceptual Model for Smoking Cessation: Physical Activity, Neurocognition, and Executive Functioning. 2015 , 86, 338-46		19
148	Balance characteristics in patients with major depression after a two-month walking exercise program: A pilot study. 2015 , 42, 590-3		7
147	Physical activity-related beliefs and discrepancies between beliefs and physical activity behavior for various chronic diseases. <i>Physiology and Behavior</i> , 2015 , 151, 577-82	3.5	7
146	Exercise facilitates smoking cessation indirectly via improvements in smoking-specific self-efficacy: Prospective cohort study among a national sample of young smokers. 2015 , 81, 63-6		16
145	Voluntary exercise promotes beneficial anti-aging mechanisms in SAMP8 female brain. 2015 , 55, 525-32		23
144	Association of Concurrent Healthy Eating and Regular Physical Activity With Cardiovascular Disease Risk Factors in U.S. Youth. 2015 , 30, 2-8		16
143	Executive function during and after acute moderate aerobic exercise in adolescents. 2015 , 16, 7-17		44
142	A Bidirectional Relationship between Executive Function and Health Behavior: Evidence, Implications, and Future Directions. 2016 , 10, 386		73
141	Executive function influences sedentary behavior: A longitudinal study. <i>Health Promotion Perspectives</i> , 2016 , 6, 180-184	3.1	9
140	Physical Exercise and Brain Mitochondrial Fitness: The Possible Role Against Alzheimer's Disease. 2016 , 26, 648-63		52
139	The Pathophysiology of Fatigue in Parkinson's Disease and its Pragmatic Management. 2016 , 3, 323-330		19
138	Physical Activity Education's Contributions to Public Health and Interdisciplinary Studies: Documenting More than Individual Health Benefits. <i>Journal of Physical Education, Recreation and Dance</i> , 2016 , 87, 3-5	0.7	9
137	Orthostatic intolerance and fatigue in the hypermobility type of Ehlers-Danlos Syndrome. 2016 , 55, 1412-20		29
136	Exercise and cerebrovascular plasticity. 2016 , 225, 243-68		26
135	Possible neurophysiological mechanisms for mild-exercise-enhanced executive function: An fNIRS neuroimaging study. 2016 , 5, 361-367		5

134	A dopamine and noradrenaline reuptake inhibitor (bupropion) does not alter exercise performance of bank voles. 2016 , 62, 307-315	9
133	Voluntary Running Attenuates Memory Loss, Decreases Neuropathological Changes and Induces Neurogenesis in a Mouse Model of Alzheimer's Disease. 2016 , 26, 62-74	97
132	Multimorbidity, cognitive function, and physical activity. 2016 , 38, 8	24
131	Cross-sectional observation of the relationship of depressive symptoms with lifestyles and parents' status among Japanese junior high school students. 2016 , 21, 265-73	13
130	Forestalling Age-Related Brain Disorders. 2016 , 299-309
