

# CITATION REPORT

List of articles citing

Ab initio study of the stabilities of and mechanism of superionic transport in lithium-rich antiperovskites

DOI: 10.1103/physrevb.87.134303  
Physical Review B, 2013, 87, .

**Source:** <https://exaly.com/paper-pdf/55187038/citation-report.pdf>

**Version:** 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.
