

CITATION REPORT

List of articles citing

Characterizing geotechnical anisotropic spatial variations using random field theory

DOI: 10.1139/cgj-2012-0345
Canadian Geotechnical Journal, 2013, 50, 723-734.

Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
123	Characterization of geotechnical variability. <i>Canadian Geotechnical Journal</i> , 1999 , 36, 612-624	3.2	1193
122	Effect of spatially variable shear strength parameters with linearly increasing mean trend on reliability of infinite slopes. 2014 , 49, 45-55		156
121	Geotechnical reliability analysis with limited data: Consideration of model selection uncertainty. 2014 , 181, 27-37		46
120	Slope reliability analysis considering spatially variable shear strength parameters using a non-intrusive stochastic finite element method. 2014 , 168, 120-128		222
119	Effect of spatial variability on failure mechanism location in random undrained slopes. 2014 , 1255-1258		
118	Reliability analysis of strip footing considering spatially variable undrained shear strength that linearly increases with depth. 2015 , 55, 866-880		43
117	A probabilistic non-linear finite element analysis for slope stability problem. 2015 , 8, 211-218		
116	Efficient 3-D reliability analysis of the 530m high abutment slope at Jinping I Hydropower Station during construction. 2015 , 195, 269-281		31
115	Stochastic analysis of uncertain temperature characteristics for expressway with wide subgrade in cold regions. 2015 , 114, 36-43		8
114	Undrained failure mechanisms of slopes in random soil. 2015 , 191, 31-35		34
113	Stochastic analysis model of uncertain temperature characteristics for embankment in warm permafrost regions. 2015 , 109, 43-52		15
112	Evaluating suction profile in a vegetated slope considering uncertainty in transpiration. <i>Computers and Geotechnics</i> , 2015 , 63, 112-120	4.4	35
111	Stochastic analysis of uncertain thermal characteristic of foundation soils surrounding the crude oil pipeline in permafrost regions. 2016 , 99, 591-598		15
110	Probabilistic analysis of shield-driven tunnel in multiple strata considering stratigraphic uncertainty. 2016 , 62, 88-100		37
109	Stochastic analysis for the uncertain temperature field of tunnel in cold regions. 2016 , 59, 7-15		30
108	Efficient slope reliability analysis at low-probability levels in spatially variable soils. <i>Computers and Geotechnics</i> , 2016 , 75, 18-27	4.4	102
107	Reliability-Based Analysis of Bearing Capacity of Strip Footings Considering Anisotropic Correlation of Spatially Varying Undrained Shear Strength. <i>International Journal of Geomechanics</i> , 2016 , 16, 06016003 ^{3,1}		11

106	Quantifying stratigraphic uncertainties by stochastic simulation techniques based on Markov random field. 2016 , 201, 106-122		48
105	Using Conditioned Random Field to Characterize the Variability of Geologic Profiles. 2016 , 142, 04015096		58
104	The Boolean Stochastic Generation method - BoSG: A tool for the analysis of the error associated with the simplification of the stratigraphy in geotechnical models. 2016 , 203, 99-106		12
103	Rainfall infiltration in a landslide soil deposit: Importance of inverse particle segregation. 2016 , 205, 116-132		19
102	Nonlinear response and reliability analysis of tunnels under strong earthquakes. 2016 , 12, 618-630		7
101	Random field characterization of CPTU soil behavior type index of Jiangsu quaternary soil deposits. 2017 , 76, 353-369		8
100	Generation of multivariate cross-correlated geotechnical random fields. <i>Computers and Geotechnics</i> , 2017 , 86, 95-107	4.4	36
99	Effect of Spatial Variability on Static and Liquefaction-Induced Differential Settlements. 2017 ,		3
98	Using Reliability Theory to Assess the Stability and Prolong the Design Life of Existing Engineered Slopes. 2017 ,		4
97	Cost-Effective Design of Long Spatially Variable Soil Slopes Using Conditional Simulation. 2017 ,		2
96	Probabilistic Stratification Modeling in Geotechnical Site Characterization. <i>ASCE-ASME Journal of Risk and Uncertainty in Engineering Systems, Part A: Civil Engineering</i> , 2017 , 3, 04017019	1.7	13
95	Analysis of multi-phase coupled seepage and stability in anisotropic slopes under rainfall condition. 2017 , 76, 1		22
94	Reliability evaluation of slope considering geological uncertainty and inherent variability of soil parameters. <i>Computers and Geotechnics</i> , 2017 , 92, 121-131	4.4	45
93	Fluid-driven fracture propagation in heterogeneous media: Probability distributions of fracture trajectories. 2017 , 96, 053002		7
92	A Segmentation Approach for Stochastic Geological Modeling Using Hidden Markov Random Fields. 2017 , 49, 145-177		43
91	Simplified slope reliability analysis considering spatial soil variability. 2017 , 216, 90-97		43
90	Estimation on the influence of uncertain parameters on stochastic thermal regime of embankment in permafrost regions. 2017 , 53, 1113-1122		5
89	3D reliability evaluation of tunnels under strong-motion earthquakes considering spatial randomness. 2017 , 13, 882-893		5

88	Stochastic model and analysis of uncertain stresses characteristics for embankment in permafrost regions. 2017 , 21, 1679-1689		3
87	Probabilistic analysis of simple slopes with cohesive soil strength using RLEM and RFEM. <i>Georisk</i> , 2017 , 11, 231-246	1.9	32
86	Stochastic analysis of uncertain thermal parameters for random thermal regime of frozen soil around a single freezing pipe. 2018 , 54, 2845-2852		8
85	Simplified framework for system reliability analysis of slopes in spatially variable soils. 2018 , 239, 330-343		27
84	Effect of Cone Penetration Conditioning on Random Field Model Parameters and Impact of Spatial Variability on Liquefaction-Induced Differential Settlements. 2018 , 144, 04018018		26
83	Stochastic Thermal-Mechanical Characteristics of Frozen Soil Foundation for a Transmission Line Tower in Permafrost Regions. <i>International Journal of Geomechanics</i> , 2018 , 18, 06017025	3.1	2
82	Random field characterization of uniaxial compressive strength and elastic modulus for intact rocks. <i>Geoscience Frontiers</i> , 2018 , 9, 1609-1618	6	11
81	Assessment for the spatial variation characteristics of uncertain thermal parameters for warm frozen soil. 2018 , 134, 484-489		13
80	Probabilistic assessment of tunnel convergence considering spatial variability in rock mass properties using interpolated autocorrelation and response surface method. <i>Geoscience Frontiers</i> , 2018 , 9, 1619-1629	6	22
79	Characterising three-dimensional anisotropic spatial correlation of soil properties through in situ test results. 2018 , 68, 805-819		21
