

# CITATION REPORT

List of articles citing

**A high-fat diet decreases AMPK activity in multiple tissues in the absence of hyperglycemia or systemic inflammation in rats**

**DOI: 10.1007/s13105-012-0199-2**

**Journal of Physiology and Biochemistry, 2013, 69, 165-75.**

**Source:** <https://exaly.com/paper-pdf/55446854/citation-report.pdf>

**Version:** 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

| #   | Paper   | IF | Citations |
|-----|---|----|-----------|
| 107 | The microcirculation in adipose tissue inflammation. <b>2013</b> , 14, 69-76  |    | 40        |
| 106 | Maternal overweight induced by a diet with high content of saturated fat activates placental mTOR and eIF2alpha signaling and increases fetal growth in rats. <b>2013</b> , 89, 96  |    | 53        |
| 105 | LECT2 functions as a hepatokine that links obesity to skeletal muscle insulin resistance. <b>2014</b> , 63, 1649-64   |    | 86        |
| 104 | AMP-activated Protein Kinase (AMPK): Does This Master Regulator of Cellular Energy State Distinguish Insulin Sensitive from Insulin Resistant Obesity?. <b>2014</b> , 3, 248-55   |    | 17        |
| 103 | Evidence of impairment of normal inflammatory reaction by a high-fat diet. <b>2014</b> , 15, 224-32   |    | 3         |
| 102 | Reduction of AMPK activity and altered MAPKs signalling in peripheral blood mononuclear cells in response to acute glucose ingestion following a short-term high fat diet in young healthy men. <b>2014</b> , 63, 1209-16 |    | 12        |
| 101 | Biomedical Literature Mining. <b>2014</b> ,   |    | 5         |
| 100 | Punicalagin, an active component in pomegranate, ameliorates cardiac mitochondrial impairment in obese rats via AMPK activation. <b>2015</b> , 5, 14014   |    | 53        |
| 99  | Distinct Time Course of the Decrease in Hepatic AMP-Activated Protein Kinase and Akt Phosphorylation in Mice Fed a High Fat Diet. <b>2015</b> , 10, e0135554  |    | 14        |
| 98  | Metformin inhibits monocyte-to-macrophage differentiation via AMPK-mediated inhibition of STAT3 activation: potential role in atherosclerosis. <b>2015</b> , 64, 2028-41  |    | 230       |
| 97  | Hematopoietic tissue factor-protease-activated receptor 2 signaling promotes hepatic inflammation and contributes to pathways of gluconeogenesis and steatosis in obese mice. <b>2015</b> , 185, 524-35                   |    | 21        |
| 96  | Chia (Salvia hispanica L.) enhances HSP, PGC-1 $\alpha$ expressions and improves glucose tolerance in diet-induced obese rats. <b>2015</b> , 31, 740-8  |    | 40        |
| 95  | The role of butyrate, a histone deacetylase inhibitor in diabetes mellitus: experimental evidence for therapeutic intervention. <b>2015</b> , 7, 669-80   |    | 50        |
| 94  | Obesity Impairs Skeletal Muscle Regeneration Through Inhibition of AMPK. <b>2016</b> , 65, 188-200  |    | 87        |
| 93  | Antioxidant catalase rescues against high fat diet-induced cardiac dysfunction via an IKK $\beta$ /AMPK-dependent regulation of autophagy. <b>2015</b> , 1852, 343-52   |    | 27        |
| 92  | Cafeteria diet overfeeding in young male rats impairs the adaptive response to fed/fasted conditions and increases adiposity independent of body weight. <b>2015</b> , 39, 430-7  |    | 21        |
| 91  | Lack of Adipocyte AMPK Exacerbates Insulin Resistance and Hepatic Steatosis through Brown and Beige Adipose Tissue Function. <b>2016</b> , 24, 118-29   |    | 182       |
