

CITATION REPORT

List of articles citing

Genome-wide methylation profiles reveal quantitative views of human aging rates

DOI: 10.1016/j.molcel.2012.10.016
Molecular Cell, 2013, 49, 359-367.

Version: 2024-04-25

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
2282	Longitudinal, genome-scale analysis of DNA methylation in twins from birth to 18 months of age reveals rapid epigenetic change in early life and pair-specific effects of discordance. 2013 , 14, R42		150
2281	Additional annotation enhances potential for biologically-relevant analysis of the Illumina Infinium HumanMethylation450 BeadChip array. 2013 , 6, 4		349
2280	Omics technologies and the study of human ageing. 2013 , 14, 601-7		90
2279	A radical signal activates the epigenetic regulation of longevity. 2013 , 17, 812-813		11
2278	Distinctive topology of age-associated epigenetic drift in the human interactome. 2013 , 110, 14138-43		45
2277	Human iPSC-based modeling of late-onset disease via progerin-induced aging. 2013 , 13, 691-705		474
2276	Bioinformatics for Diagnosis, Prognosis and Treatment of Complex Diseases. 2013 ,		
2275	Review of processing and analysis methods for DNA methylation array data. 2013 , 109, 1394-402		120
2274	DNA methylation age of human tissues and cell types. 2013 , 14, R115		2892
2273	Distinct DNA methylation patterns of cognitive impairment and trisomy 21 in Down syndrome. 2013 , 6, 58		64
