

# CITATION REPORT

List of articles citing

**Access to surgery for paediatric patients with medically refractory epilepsy: a systems analysis**

**DOI: 10.1016/j.eplepsyres.2013.08.010**  
**Epilepsy Research, 2013, 107, 286-96.**

**Source:** <https://exaly.com/paper-pdf/55542415/citation-report.pdf>

**Version:** 2024-04-29

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
29	Epilepsy surgery in children: why, when and how?. <i>Indian Journal of Pediatrics</i> , <b>2014</b> , 81, 1081-8	3	0
28	Epilepsy surgery in childhood: no longer the treatment of last resort. <i>Cmaj</i> , <b>2014</b> , 186, 973-4	3.5	11
27	Neuroactive peptides as putative mediators of antiepileptic ketogenic diets. <i>Frontiers in Neurology</i> , <b>2014</b> , 5, 63	4.1	69
26	Impaired development of intrinsic connectivity networks in children with medically intractable localization-related epilepsy. <i>Human Brain Mapping</i> , <b>2014</b> , 35, 5686-700	5.9	45
25	"A journey around the world": Parent narratives of the journey to pediatric resective epilepsy surgery and beyond. <i>Epilepsia</i> , <b>2015</b> , 56, 822-32	6.4	28
24	Bridging the Gap between Evidence and Practice for Adults with Medically Refractory Temporal Lobe Epilepsy: Is a Change in Funding Policy Needed to Stimulate a Shift in Practice?. <i>Epilepsy Research &amp; Treatment</i> , <b>2015</b> , 2015, 675071		4
23	From Structure to Circuits: The Contribution of MEG Connectivity Studies to Functional Neurosurgery. <i>Frontiers in Neuroanatomy</i> , <b>2016</b> , 10, 67	3.6	13
22	"It was five years of hell": Parental experiences of navigating and processing the slow and arduous time to pediatric resective epilepsy surgery. <i>Epilepsy and Behavior</i> , <b>2016</b> , 62, 276-84	3.2	17
21	Socioeconomic status influences time to surgery and surgical outcome in pediatric epilepsy surgery. <i>Epilepsy and Behavior</i> , <b>2016</b> , 55, 133-8	3.2	26
20	Potential delays in referral and assessment for epilepsy surgery in children with drug-resistant, early-onset epilepsy. <i>Epilepsy Research</i> , <b>2018</b> , 143, 20-26	3	9
19	Early economic evaluation of MRI-guided laser interstitial thermal therapy (MRgLITT) and epilepsy surgery for mesial temporal lobe epilepsy. <i>PLoS ONE</i> , <b>2019</b> , 14, e0224571	3.7	8
18	Patient management conference: Correlating pre-surgical data. <i>Seizure: the Journal of the British Epilepsy Association</i> , <b>2020</b> , 77, 40-42	3.2	1
17	Addressing the epilepsy surgery gap: Impact of community/tertiary epilepsy center collaboration. <i>Epilepsy and Behavior Reports</i> , <b>2020</b> , 14, 100398	1.3	3
16	Deciphering the surgical treatment gap for drug-resistant epilepsy (DRE): A literature review. <i>Epilepsia</i> , <b>2020</b> , 61, 1352-1364	6.4	13
15	Seizure outcome of pediatric epilepsy surgery: Systematic review and meta-analyses. <i>Neurology</i> , <b>2020</b> , 94, 311-321	6.5	26
14	Seizure Outcomes of Epilepsy Surgery in Children. <i>Pediatric Neurology Briefs</i> , <b>2021</b> , 35, 2	0.3	0
13	Benefits, safety and outcomes of long-term video EEG monitoring in pediatric patients. <i>European Journal of Paediatric Neurology</i> , <b>2021</b> , 32, 29-35	3.8	0
