

CITATION REPORT

List of articles citing

Metabolic engineering of Escherichia coli: a sustainable industrial platform for bio-based chemical production

DOI: 10.1016/j.biotechadv.2013.02.009
Biotechnology Advances, 2013, 31, 1200-23.

Source: <https://exaly.com/paper-pdf/55780166/citation-report.pdf>

Version: 2024-04-25

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
170	Rapid one-step inactivation of single or multiple genes in Escherichia coli. 2013 , 8, 776-84		37
169	Microbial Conversion of Waste Glycerol from Biodiesel Production into Value-Added Products. 2013 , 6, 4739-4768		61
168	Highly efficient L-lactate production using engineered Escherichia coli with dissimilar temperature optima for L-lactate formation and cell growth. <i>Microbial Cell Factories</i> , 2014 , 13, 78	6.4	29
167	Zymomonas mobilis: a novel platform for future biorefineries. 2014 , 7, 101		129
166	Biotechnological production of muconic acid: current status and future prospects. <i>Biotechnology Advances</i> , 2014 , 32, 615-22	17.8	111
165	Metabolic engineering of Escherichia coli for production of 2-phenylethanol from renewable glucose. <i>Applied Biochemistry and Biotechnology</i> , 2014 , 172, 2012-21	3.2	31
164	Retraction: High-level production of 3-hydroxypropionate in Escherichia coli and Saccharomyces cerevisiae by introducing part of the 3-hydroxypropionate/4-hydroxybutyrate cycle from Metallosphaera sedula by Z. Liu, Y. Wang, Z. Deng and T. Liu. <i>Biotechnology and Bioengineering</i> , 2014 , 111, 1906-1906	4.9	
163	Bacillus subtilis and Escherichia coli essential genes and minimal cell factories after one decade of genome engineering. 2014 , 160, 2341-2351		97
162	Glycerol for renewable acrolein production by catalytic dehydration. 2014 , 40, 28-59		105
161	Simultaneous saccharification and fermentation of cassava to succinic acid by Escherichia coli NZN111. 2014 , 163, 100-5		44
160	New transposon tools tailored for metabolic engineering of gram-negative microbial cell factories. <i>Frontiers in Bioengineering and Biotechnology</i> , 2014 , 2, 46	5.8	64
159	Synthetic sugar cassettes for the efficient production of flavonol glycosides in Escherichia coli. <i>Microbial Cell Factories</i> , 2015 , 14, 76	6.4	35
158	Identification of enhanced hydrogen and ethanol Escherichia coli producer strains in a glycerol-based medium by screening in single-knock out mutant collections. <i>Microbial Cell Factories</i> , 2015 , 14, 93	6.4	17
157	Establishment of markerless gene deletion tools in thermophilic Bacillus smithii and construction of multiple mutant strains. <i>Microbial Cell Factories</i> , 2015 , 14, 99	6.4	15
156	Enhancement of 3-hydroxypropionic acid production from glycerol by using a metabolic toggle switch. <i>Microbial Cell Factories</i> , 2015 , 14, 155	6.4	22
155	A systematic analysis of TCA Escherichia coli mutants reveals suitable genetic backgrounds for enhanced hydrogen and ethanol production using glycerol as main carbon source. 2015 , 10, 1750-61		11
154	Shikimic Acid Production in Escherichia coli: From Classical Metabolic Engineering Strategies to Omics Applied to Improve Its Production. <i>Frontiers in Bioengineering and Biotechnology</i> , 2015 , 3, 145	5.8	40

153	Regulating the production of (R)-3-hydroxybutyrate in Escherichia coli by N or P limitation. 2015 , 6, 844		18
152	Shaking up ancient scents: Insights into santalol synthesis in engineered Escherichia coli. 2015 , 50, 1177-1183		4

13	Simple and rapid site-specific integration of multiple heterologous DNAs into the <i>Escherichia coli</i> chromosome.		○
12	Modern Medicine Relies on the Help of Microorganisms [From Vaccine Production to Cancer Medication. 2022 , 1-12		○
11	Strategies for the production of dsRNA biocontrols as alternatives to chemical pesticides. 10,		○
10	Development of a Prediction Method of Cell Density in Autotrophic/Heterotrophic Microorganism Mixtures by Machine Learning Using Absorbance Spectrum Data. 2022 , 11, 46		○

- 9 Metabolic pathways and pH regulation in Escherichia coli during fermentation of glucose and glycerol in the presence of formate at pH 6.5: the role of FhIA transcriptional activator. ○
- 8 Gamma Radiation Dose-Response of Gram-Positive and Gram-Negative Bacteria. **2022**, 51, 107-112 ○
- 7 Promoting cell growth and characterizing partial symbiotic relationships in the co-cultivation of green alga Chlamydomonas reinhardtii and Escherichia coli. 2200099 ○
- 6 Use of bacterial biofilms to produce high added-value compounds. **2023**, 665-681 ○
- 5 High-Level Production of L-Methionine by Dynamic Deregulation of Metabolism with Engineered Nonauxotroph Escherichia coli. 1
- 4 Simple and Rapid Site-Specific Integration of Multiple Heterologous DNAs into the Escherichia coli Chromosome. ○
- 3 Escherichia coli Cell Factory for Synthesis of Biomolecules. **2023**, 141-163 ○
- 2 Primary alcohols as substrates or products in whole-cell biocatalysis: Toxicity for Escherichia coli expression strains. **2023**, 538, 112979 ○
- 1 Natural sources, biosynthesis, biological functions, and molecular mechanisms of shikimic acid and its derivatives. **2023**, 13, 139 ○
