

CITATION REPORT

List of articles citing

A genome-wide association study of the human metabolome in a community-based cohort

DOI: 10.1016/j.cmet.2013.06.013
Cell Metabolism, 2013, 18, 130-43.

Source: <https://exaly.com/paper-pdf/55932053/citation-report.pdf>

Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
246	Alanine-glyoxylate aminotransferase 2 (AGXT2) polymorphisms have considerable impact on methylarginine and β -aminoisobutyrate metabolism in healthy volunteers. 2014 , 9, e88544		29
245	Association of the AGXT2 V140I polymorphism with risk for coronary heart disease in a Chinese population. 2014 , 21, 1022-30		11
244	Translational research and Blue skies mentality brings rewards. 2014 , 35, 2197-8		
243	Integrated genomics and metabolomics in nephrology. 2014 , 29, 1467-74		30
242	Missense variants of the alanine:glyoxylate aminotransferase 2 gene are not associated with Japanese schizophrenia patients. 2014 , 53, 137-41		3
241	An atlas of genetic influences on human blood metabolites. 2014 , 46, 543-550		695
240	β -Aminoisobutyric acid induces browning of white fat and hepatic β -oxidation and is inversely correlated with cardiometabolic risk factors. <i>Cell Metabolism</i> , 2014 , 19, 96-108	24.6	369
239	Towards metabolic biomarkers of insulin resistance and type 2 diabetes: progress from the metabolome. 2014 , 2, 65-75		175
238	Effects of age, sex, and genotype on high-sensitivity metabolomic profiles in the fruit fly, <i>Drosophila melanogaster</i> . 2014 , 13, 596-604		86
237	AGXT2: a promiscuous aminotransferase. 2014 , 35, 575-82		46
236	Colorectal cancer detection using targeted serum metabolic profiling. 2014 , 13, 4120-30		147
235	Genetics of the human metabolome, what is next?. 2014 , 1842, 1923-1931		25
234	Mendelian randomization studies of biomarkers and type 2 diabetes. 2015 , 4, 249-60		13
233	Analytical methods in untargeted metabolomics: state of the art in 2015. 2015 , 3, 23		377
232	Genome-Wide Association Study with Targeted and Non-targeted NMR Metabolomics Identifies 15 Novel Loci of Urinary Human Metabolic Individuality. <i>PLoS Genetics</i> , 2015 , 11, e1005487	6	66
231	Integration of Genome-Wide SNP Data and Gene-Expression Profiles Reveals Six Novel Loci and Regulatory Mechanisms for Amino Acids and Acylcarnitines in Whole Blood. <i>PLoS Genetics</i> , 2015 , 11, e1005510	6	32
230	Genome-wide association study identifies novel genetic variants contributing to variation in blood metabolite levels. <i>Nature Communications</i> , 2015 , 6, 7208	17.4	126
