Version: 2024-04-27

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
622	Macular ganglion cell/inner plexiform layer measurements by spectral domain optical coherence tomography for detection of early glaucoma and comparison to retinal nerve fiber layer measurements. 2013 , 156, 1297-1307.e2		110
621	The locations of circumpapillary glaucomatous defects seen on frequency-domain OCT scans. 2013 , 54, 7338-43		18
620	Regional correlation among ganglion cell complex, nerve fiber layer, and visual field loss in glaucoma. 2013 , 54, 4287-95		44
619	Reproducibility of SD-OCT-based ganglion cell-layer thickness in glaucoma using two different segmentation algorithms. 2013 , 54, 6998-7004		18
618	Spectral domain macular optical coherence tomography: a new diagnostic tool for glaucoma?. 2013 , 41, 823-4		
617	Comparative study of macular ganglion cell-inner plexiform layer and peripapillary retinal nerve fiber layer measurement: structure-function analysis. 2013 , 54, 7344-53		52
616	Difference in the properties of retinal nerve fiber layer defect between superior and inferior visual field loss in glaucoma. 2013 , 54, 6982-90		8
615	The influence of intersubject variability in ocular anatomical variables on the mapping of retinal locations to the retinal nerve fiber layer and optic nerve head. 2013 , 54, 6074-82		59
614	A Test of a Model of Glaucomatous Damage of the Macula With High-Density Perimetry: Implications for the Locations of Visual Field Test Points. 2014 , 3, 5		32
613	Anatomic vs. acquired image frame discordance in spectral domain optical coherence tomography minimum rim measurements. 2014 , 9, e92225		41
612	Mapping glaucoma patients' 30-2 and 10-2 visual fields reveals clusters of test points damaged in the 10-2 grid that are not sampled in the sparse 30-2 grid. 2014 , 9, e98525		23
611	Modifying the Conventional Visual Field Test Pattern to Improve the Detection of Early Glaucomatous Defects in the Central 10°. 2014 , 3, 6		30
610	Focal relationship between structure and function within the central 10 degrees in glaucoma. 2014 , 55, 5269-77		46
609	Topographic localization of macular retinal ganglion cell loss associated with localized peripapillary retinal nerve fiber layer defect. 2014 , 55, 3501-8		28
608	Prediction of glaucomatous visual field progression: pointwise analysis. 2014 , 39, 705-10		14
607	Improving glaucoma detection using spatially correspondent clusters of damage and by combining standard automated perimetry and optical coherence tomography. 2014 , 55, 612-24		31
606	Evaluation of inner retinal layers in eyes with temporal hemianopic visual loss from chiasmal compression using optical coherence tomography. 2014 , 55, 3328-36		61

605	On improving the use of OCT imaging for detecting glaucomatous damage. 2014 , 98 Suppl 2, ii1-9	51
604	Severity-dependent association between ganglion cell inner plexiform layer thickness and macular mean sensitivity in open-angle glaucoma. 2014 , 92, e650-6	23
603	Microstructure of the optic disc pit in open-angle glaucoma. 2014 , 121, 2098-2106.e2	26
602	Population-based evaluation of retinal nerve fiber layer, retinal ganglion cell layer, and inner plexiform layer as a diagnostic tool for glaucoma. 2014 , 55, 8428-38	22
601	Relationship between ganglion cell layer thickness and estimated retinal ganglion cell counts in the glaucomatous macula. 2014 , 121, 2371-9	50
600	Relation between macular retinal ganglion cell/inner plexiform layer thickness and multifocal electroretinogram measures in experimental glaucoma. 2014 , 55, 4512-24	23
599	Individualized structure-function mapping for glaucoma: practical constraints on map resolution for clinical and research applications. 2014 , 55, 1985-93	24
598	Influence of correction of ocular magnification on spectral-domain OCT retinal nerve fiber layer measurement variability and performance. 2014 , 55, 3439-46	35
597	Contrast sensitivity perimetry and clinical measures of glaucomatous damage. 2014 , 91, 1302-11	27
596	Accuracy of macular ganglion-cell complex thickness to total retina thickness ratio to detect glaucoma in white Europeans. 2014 , 23, e132-7	6
595	One Year of Glaucoma Research in Review: 2012 to 2013. 2014 , 3, 48-55	1
594	Regional choroidal blood flow and multifocal electroretinography in experimental glaucoma in rhesus macaques. 2014 , 55, 7786-98	7
593	Defining 10-2 visual field progression criteria: exploratory and confirmatory factor analysis using pointwise linear regression. 2014 , 121, 741-9	21
592	Macular ganglion cell analysis for early detection of glaucoma. 2014 , 121, 1508-15	73
591	Defects of the lamina cribrosa in eyes with localized retinal nerve fiber layer loss. 2014 , 121, 110-118	73
590	Tracking changes over time in retinal nerve fiber layer and ganglion cell-inner plexiform layer thickness in multiple sclerosis. 2014 , 20, 1331-41	69
589	Early glaucoma involves both deep local, and shallow widespread, retinal nerve fiber damage of the macular region. 2014 , 55, 632-49	98
588	The foveal position relative to the optic disc and the retinal nerve fiber layer thickness profile in myopia. 2014 , 55, 1419-26	46

587	In vivo adaptive optics imaging of the temporal raphe and its relationship to the optic disc and fovea in the human retina. 2014 , 55, 5952-61	36
586	Correlation of magnetic resonance imaging optic nerve parameters to optical coherence tomography and the visual field in glaucoma. 2014 , 42, 360-8	16
585	Structure-function correlations in glaucoma using matrix and standard automated perimetry versus time-domain and spectral-domain OCT devices. 2014 , 55, 3074-80	21
584	Influences of the inner retinal sublayers and analytical areas in macular scans by spectral-domain OCT on the diagnostic ability of early glaucoma. 2014 , 55, 7479-85	8
583	Influence of the disc-fovea angle on limits of RNFL variability and glaucoma discrimination. 2014 , 55, 7332-42	40
