

CITATION REPORT

List of articles citing

Persistence of DNA in a cured patient and positive culture in cases with low antibody levels bring into question diagnosis of Q fever endocarditis

DOI: 10.1128/jcm.00812-13

Journal of Clinical Microbiology, 2013, 51, 3012-7.

Version: 2024-04-18

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.
