

# CITATION REPORT

List of articles citing

**Large-scale network organization in the avian forebrain: a connectivity matrix and theoretical analysis**

**DOI: 10.3389/fncom.2013.00089**

**Frontiers in Computational Neuroscience, 2013, 7, 89.**

**Source:** <https://exaly.com/paper-pdf/57222591/citation-report.pdf>

**Version:** 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
169	Network hubs in the human brain. <i>Trends in Cognitive Sciences</i> , <b>2013</b> , 17, 683-96	14	1173
168	Sensing risk, fearing uncertainty: systems science approach to change. <i>Frontiers in Computational Neuroscience</i> , <b>2014</b> , 8, 30	3.5	
167	NSF workshop report: discovering general principles of nervous system organization by comparing brain maps across species. <b>2014</b> , 83, 1-8		35
166	Serotonin release in the caudal nidopallium of adult laying hens genetically selected for high and low feather pecking behavior: an in vivo microdialysis study. <b>2014</b> , 268, 81-7		8
165	NSF workshop report: discovering general principles of nervous system organization by comparing brain maps across species. <i>Journal of Comparative Neurology</i> , <b>2014</b> , 522, 1445-53	3.4	26
164	An edge-centric perspective on the human connectome: link communities in the brain. <b>2014</b> , 369,		41
163	Dopamine modulation of learning and memory in the prefrontal cortex: insights from studies in primates, rodents, and birds. <b>2014</b> , 8, 93		82
162	Network structure of functional hippocampal lateralization in birds. <b>2015</b> , 25, 1418-28		20
161	The maturation of research into the avian hippocampal formation: Recent discoveries from one of the nature's foremost navigators. <b>2015</b> , 25, 1193-211		44
160	Blocking NMDA-receptors in the pigeon's "prefrontal" caudal nidopallium impairs appetitive extinction learning in a sign-tracking paradigm. <b>2015</b> , 9, 85		12
159	A chicken model for studying the emergence of invariant object recognition. <b>2015</b> , 9, 7		14
158	Seasonal Variation in Forebrain Region Sizes in Male Ruffed Grouse ( <i>Bonasa umbellus</i> ). <b>2015</b> , 85, 189-202		3
157	Implicit learning in cotton-top tamarins ( <i>Saguinus oedipus</i> ) and pigeons ( <i>Columba livia</i> ). <i>Learning and Behavior</i> , <b>2015</b> , 43, 129-42	1.3	8
156	Avian Models for Human Cognitive Neuroscience: A Proposal. <b>2015</b> , 86, 1330-42		78
155	Neuroanatomy: connectome connects fly and mammalian brain networks. <i>Current Biology</i> , <b>2015</b> , 25, R416-3		17
154	Connectomics-based analysis of information flow in the <i>Drosophila</i> brain. <i>Current Biology</i> , <b>2015</b> , 25, 1249-58	6.5	127
153	Avian Versus Mammalian Sleep: the Fruits of Comparing Apples and Oranges. <b>2015</b> , 1, 55-63		15

152	Connectomics: a new paradigm for understanding brain disease. <b>2015</b> , 25, 733-48		137
151	An in depth view of avian sleep. <b>2015</b> , 50, 120-7		14
150	Attentional shifts in categorization learning: Perseveration but not learned irrelevance. <b>2016</b> , 123, 63-73		7
149	Relative Brain Size and Its Relation with the Associative Pallium in Birds. <b>2016</b> , 87, 69-77		38
