

CITATION REPORT

List of articles citing

Personalized protein coronas: a "key" factor at the nanobiointerface

DOI: 10.1039/c4bm00131a

Biomaterials Science, 2014, 2, 1210-1221.

Source: <https://exaly.com/paper-pdf/58206129/citation-report.pdf>

Version: 2024-04-27

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
208	Size and charge of nanoparticles following incubation with human plasma of healthy and pancreatic cancer patients. 2014 , 123, 673-8		47
207	Hyperthermia-induced protein corona improves the therapeutic effects of zinc ferrite spinel-graphene sheets against cancer. 2014 , 4, 62557-62565		40
206	Ex situ evaluation of the composition of protein corona of intravenously injected superparamagnetic nanoparticles in rats. 2014 , 6, 11439-50		88
205	Biomolecular corona on nanoparticles: a survey of recent literature and its implications in targeted drug delivery. 2014 , 2, 108		87
