

# CITATION REPORT

List of articles citing

**Mineralogy. Discovery of bridgmanite, the most abundant mineral in Earth, in a shocked meteorite**

**DOI: 10.1126/science.1259369**  
**Science, 2014, 346, 1100-2.**

**Source:** <https://exaly.com/paper-pdf/58287495/citation-report.pdf>

**Version:** 2024-04-23

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

- 67 Formation of Meteoritic Minerals in Gas- and Dust-Rich Environments. **2021**, 239-253
- 66 Epilogue. **2021**, 330-330
- 65 Formation of Meteoritic Minerals on Parent Bodies. **2021**, 254-316
- 64 Properties of Minerals. **2021**, 66-91
- 63 Formation of Meteoritic Minerals in the Terrestrial Environment. **2021**, 317-324
- 62 Mineralogy of Major Physical Components of Chondrites. **2021**, 109-152

61 Cosmomineralogy. **2021**, 200-238

60 The Strange Case of the Aluminum-Copper Alloys. **2021**, 325-327

59 Petrologic and Mineralogical Characteristics of Meteorite Groups. **2021**, 153-199

58 Summary. **2021**, 328-329

57 Meteorite Classification and Taxonomy. **2021**, 101-108

56 Preface. **2021**, xiii-xiv

55 Index. **2021**, 379-404

54 Brief Review of Crystallography and Crystal Chemistry. **2021**, 58-65

53 Effect of Al on the stability of dense hydrous magnesium silicate phases to the uppermost lower mantle: implications for water transportation into the deep mantle. **2021**, 48, 1 0

52 Experimental Constraints on Solid Nitride Phases in Rocky Mantles of Reduced Planets and Implications for Observable Atmosphere Compositions. **2021**, 126, e2020JE006687 1

51 Natural Fe-bearing aluminous bridgmanite in the Katol L6 chondrite. **2021**, 118, 2

50 Heamanite-(Ce),  $(K_{0.5}Ce_{0.5})TiO_3$ , a new perovskite supergroup mineral found in diamond from Gahcho Ku, Canada. **2021**, 0

49 Al partitioning between phase D and bridgmanite at the uppermost lower mantle pressure. **2021**, 48, 1 0

48 Deformation of  $NaCoF_{3-x}$  perovskite and post-perovskite up to 30 GPa and 1013 K: implications for plastic deformation and transformation mechanism. **2021**, 33, 591-603

47 Apollo 15 regolith breccia provides first natural evidence for olivine incongruent melting. **2021**,

46 Jadeite and related species in shocked meteorites: Limitations on inference of shock conditions. **2021**, 1

45 Earth as an Evolving Planetary System - Pages 353-388. **2022**, 353-388

44 The mantle. **2022**, 81-125 1

43	Crystal Structure of Bridgmanite and Its Physical Properties. <b>2021</b> , 11, 259-269	
42	Introduction. <b>2021</b> , 1-4	
41	Back-transformation of high-pressure minerals in shocked chondrites: Low-pressure mineral evidence for strong shock. <b>2017</b> , 215, 277-294	25
40	Mineralogy of the deep lower mantle in the presence of HO. <b>2021</b> , 8, nwa098	9
39	High-pressure synthesis of the BiVO <sub>3</sub> perovskite. <b>2019</b> , 3,	6
38	Systematic investigations of high-pressure polymorphs in shocked ordinary chondrites. <b>2020</b> , 55, 2619-2651	4
37	Earth factories: Creation of the elements from nuclear transmutation in Earth's lower mantle. <b>2021</b> , 11, 105113	1
36	Natural and experimental high-pressure, shock-produced terrestrial and extraterrestrial materials. <b>2021</b> , 8,	4
35	Natural cubic perovskite, Ca(Ti,Si,Cr)O <sub>3</sub> —a versatile potential host for rock-forming and less common elements up to Earth's mantle pressure. <b>2021</b> ,	0
34	A Different Approach to High-T <sub>c</sub> Superconductivity: Indication of Filamentary-Chaotic Conductance and Possible Routes to Room Temperature Superconductivity. <b>2016</b> , 06, 244-260	9
33	Mafic Lower-Mantle Mineral Association. <b>2017</b> , 161-203	
32	Materials From Extreme High Pressure Conditions. <b>2019</b> ,	0
31	Reactive Nitrogen Budgets in China. <b>2020</b> , 87-109	
30	Perovskite retrieved from the lower mantle. <i>Science</i> , <b>2021</b> , 374, 820-821	33.3 2
29	Discovery of davemaoite, CaSiO <sub>3</sub> -perovskite, as a mineral from the lower mantle. <i>Science</i> , <b>2021</b> , 374, 891-894	33.5 14
28	Formation, preservation and extinction of high-pressure minerals in meteorites: temperature effects in shock metamorphism and shock classification.. <b>2022</b> , 9, 6	2
27	High-pressure polymorphs of olivine and silica in Kamargaon (L6) chondrite by laser micro-Raman and XRD studies. <b>2022</b> , 131, 1	0
26	Impact dynamics of the L chondrites' parent asteroid. <b>2022</b> , 57, 759-775	0

25	Phase Relations in Spinel Lherzolite KLB-1 According to Results of Thermodynamic Modeling up to 30 GPa: Peculiarities of Mineral Assemblages and Geodynamic Effects. <b>2022</b> , 30, 198-211		1
24	Estimation of the Mechanisms of Incorporation of a Titanium Impurity in the Composition of MgSiO <sub>3</sub> Bridgmanite. <b>2022</b> , 503, 175-178		
23	Back-transformation processes in high-pressure minerals: implications for planetary collisions and diamond transportation from the deep Earth. <b>2022</b> , 9,		1
22	Introduction to the Special Issue "2022 Year of Mineralogy" <i>Journal of Geography (Chigaku Zasshi)</i> , <b>2022</b> , 131, 129-132	0.5	
21	Overview of the Special Issue "2022 Year of Mineralogy" <i>Journal of Geography (Chigaku Zasshi)</i> , <b>2022</b> , 131, 125-128	0.5	
20	Bridgmanite freezing in shocked meteorites due to amorphization-induced stress. <i>Geophysical Research Letters</i> ,	4.9	1
19	Newly detected shock-induced high-pressure phases formed in amphibolite clasts of the suevite breccia (Ries impact crater, Germany): Liebermannite, kokchetavite, and other ultrahigh-pressure phases. <b>2022</b> , 177,		1
18	Energy landscapes in inorganic chemistry. <b>2022</b> ,		0
17	Designing Materials: Perovskites As Construction Kits. 10,		0
16	The Taxonomy of Mineral Occurrence Rarity and Endemicity. <b>2022</b> , 60, 731-758		0
15	Investigation of the shocked Vîles ordinary chondrite (L6) meteorite fall "Implications for shock classification, fragmentation, and collision dynamics. <b>2023</b> , 390, 115326		0
14	Equation-of-state of magmatic liquids. <b>2023</b> , 755-820		0
13	High-Pressure Minerals from the Earth's Mantle and in Shocked Meteorites. <b>2022</b> , 187-200		0
12	Bridgmanite across the lower mantle. <b>2022</b> , 15, 964-964		0
11	Bridgmanite Amorphization Observed by Time-Resolved &in-situ; High-Temperature Synchrotron X-ray Diffraction Measurements. <b>2022</b> , 64, 259-260		0
10	Mastering the Art of Silicate Mineralogy. <b>2023</b> , 98, 8-27		1
9	Halide perovskites and high-pressure technologies: a fruitful encounter.		0
8	Na-bearing bridgmanite: Synthesis, phase relations and application to the origin of alkaline melts in the uppermost lower mantle. <b>2023</b> , 444-445, 107101		0

- 7 Topographic variations of mantle transition zone discontinuities in the Java subduction zone and adjacent regions from receiver function analyses. **2023**, 849, 229723 ○
- 6 The breakdown of diopside to (Ca, Mg)SiO<sub>3</sub> perovskite + (Mg, Ca, Fe)SiO<sub>3</sub> glass + (Mg, Ca)SiO<sub>3</sub> glass + (Mg, Ca)SiO<sub>3</sub> majorite in a melt vein the Suizhou L6 chondrite. **2023**, 42, 183-194 ○
- 5 Transformation microstructures in pyrolite under stress: Implications for anisotropy in subducting slabs below the 660 km discontinuity. **2023**, 604, 118015 ○
