

# CITATION REPORT

List of articles citing

## GABAergic and glutamatergic efferents of the mouse ventral tegmental area

DOI: 10.1002/cne.23603

Journal of Comparative Neurology, 2014, 522, 3308-34.

**Source:** <https://exaly.com/paper-pdf/58906495/citation-report.pdf>

**Version:** 2024-04-17

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

14	ME1 protein drives opioid-induced conditioned reward and synaptic NMDA receptor hyperactivity in the nucleus accumbens.		0
13	Neural circuits provide insights into reward and aversion. 16,		0
12	Activity of a direct VTA to ventral pallidum GABA pathway encodes unconditioned reward value and sustains motivation for reward. <b>2022</b> , 8,		0
11	Pharmacological modulation of ventral tegmental area neurons elicits changes in trigeminovascular sensory processing and is accompanied by glycemic changes: Implications for migraine. <b>2022</b> , 42, 1359-1374		0

- 10 Cav1.3 L-type Ca<sup>2+</sup> channel-activated CaMKII/ERK2 pathway in the ventral tegmental area is required for cocaine conditioned place preference. **2023**, 224, 109368 ○
- 9 Molecular, circuit, and stress response characterization of Ventral Pallidum Npas1-neurons. JN-RM-0971-22 ○
- 8 Ventral Tegmental Area Glutamate Neurons establish a mu-opioid receptor gated circuit to mesolimbic dopamine neurons and regulate prescription opioid-seeking behavior. ○
- 7 Median raphe serotonergic neurons projecting to the interpeduncular nucleus control preference and aversion. **2022**, 13, ○
- 6 Somatostatin-expressing neurons in the ventral tegmental area innervate specific forebrain regions and are involved in the stress response. ○
- 5 Ventral pallidal regulation of motivated behaviors and reinforcement. 17, ○
- 4 Differential role of GABAergic and cholinergic ventral pallidal neurons in behavioral despair, conditioned fear memory and active coping. **2023**, 125, 110760 ○
- 3 Rewarding-unrewarding prediction signals under a bivalent context in the primate lateral hypothalamus. **2023**, 13, ○
- 2 Atypical antipsychotics antagonize GABA<sub>A</sub> receptors in the ventral tegmental area GABA neurons to relieve psychotic behaviors. 1
- 1 A novel hypothalamic-midbrain circuit for model-based learning. ○
