

CITATION REPORT

List of articles citing

Sequence variants in *SLC16A11* are a common risk factor for type 2 diabetes in Mexico

DOI: [10.1038/nature12828](https://doi.org/10.1038/nature12828)
Nature, 2014, 506, 97-101.

Source: <https://exaly.com/paper-pdf/58982072/citation-report.pdf>

Version: 2024-04-24

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

32 New and Emerging Research on Solute Carrier and ATP Binding Cassette Transporters in Drug Discovery and Development: Outlook from the International Transporter Consortium.. *Clinical Pharmacology and Therapeutics*, **2022**, 6.1 1

31 Generation of Isogenic hiPSCs with Targeted Edits at Multiple Intronic SNPs to Study the Effects of the Type 2 Diabetes Associated Locus in American Indians.. *Cells*, **2022**, 11, 7.9

30 Class I MHC Polymorphisms Associated with Type 2 Diabetes in the Mexican Population. *Genes*, **2022**, 13, 772 4.2

29 Precision nutrition in diabetes: when population-based dietary advice gets personal.. *Diabetologia*, **2022**, 10.3 1

28 Exome Sequencing Data Analysis and a Case-Control Study in Mexican Population Reveals Lipid Trait Associations of New and Known Genetic Variants in Dyslipidemia-Associated Loci. *Frontiers in Genetics*, **2022**, 13, 4.5

27 Genotyping, sequencing and analysis of 140,000 adults from the Mexico City Prospective Study. 0

26 Associating pathways with diseases using single-cell expression profiles and making inferences about potential drugs. *Briefings in Bioinformatics*, **2022**, 23, 13.4 0

25 Downregulation of SLC16A11 is Present in Offspring of Mothers with Gestational Diabetes. *Archives of Medical Research*, **2022**, 6.6 0

24 Rare loss of function variants in the hepatokine gene INHBE protect from abdominal obesity. **2022**, 13, 0

23 Genome-wide DNA methylation status of Mongolians exhibits signs of cellular stress response related to their nomadic lifestyle. **2022**, 41, 0

22 Biomarkers in Disease: Diabetes Methods, Discoveries and Applications. **2022**, 1-16 0

- 21 On the Verge of Precision Medicine in Diabetes. **2022**, 82, 1389-1401 ○
- 20 Validating and automating learning of cardiometabolic polygenic risk scores from direct-to-consumer genetic and phenotypic data: implications for scaling precision health research. **2022**, 16, ○
- 19 The TH01 microsatellite and INS VNTR are strongly associated with type 2 diabetes and fasting insulin secretion. ○
- 18 The contribution of Neanderthal introgression to modern human traits. **2022**, 32, R970-R983 ○
- 17 Biomarkers in Disease: Diabetes Methods, Discoveries, and Applications. **2023**, 395-409 ○
- 16 The power of TOPMed imputation for the discovery of Latino enriched rare variants associated with type 2 diabetes. ○
- 15 A combined polygenic score of 21,293 rare and 22 common variants improves diabetes diagnosis based on hemoglobin A1C levels. 1
- 14 Sex-specific genetic loci linked to early and late onset type 2 diabetes. ○
- 13 A novel splice-affecting HNF1A variant with large population impact on diabetes in Greenland. **2022**, 100529 ○
- 12 Human genetics uncovers MAP3K15 as an obesity-independent therapeutic target for diabetes. **2022**, 8, ○
- 11 Santé et maladies : Évolution des conceptions de l'origine à nos jours. Vers une cohabitation des maladies transmissibles et des maladies développementales. **2022**, ○
- 10 The role of Neanderthal introgression in liver cancer. **2022**, 15, ○
- 9 Integrating Common Risk Factors with Polygenic Scores Improves the Prediction of Type 2 Diabetes. **2023**, 24, 984 ○
- 8 Progress in genetics of type 2 diabetes and diabetic complications. ○
- 7 Haptools: a toolkit for admixture and haplotype analysis. **2023**, 39, ○
- 6 Lessons Learned as a Student of Craniofacial Biology: What This Might Mean for Orthodontic Professional Education and Clinical Practice in the 21st Century. **2018**, 46, 487-495 ○
- 5 Human-specific genetics: new tools to explore the molecular and cellular basis of human evolution. ○
- 4 Variants in the Control Region of Mitochondrial Genome Associated with type 2 Diabetes in a Cohort of Mexican Mestizos. **2023**, 54, 113-123 ○

- 3 Rare and Common Variants in GALNT3 May Affect Bone Mass Independently of Phosphate Metabolism. ○
- 2 Development and validation of a multivariable genotype-informed gestational diabetes prediction algorithm for clinical use in the Mexican population: insights into susceptibility mechanisms. **2023**, 11, e003046 ○
- 1 The power of TOPMed imputation for the discovery of Latino-enriched rare variants associated with type 2 diabetes. ○
