

CITATION REPORT

List of articles citing

A predictive processing theory of sensorimotor contingencies: Explaining the puzzle of perceptual presence and its absence in synesthesia

DOI: 10.1080/17588928.2013.877880
Cognitive Neuroscience, 2014, 5, 97-118.

Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.
