

# Interpretation of variable importance in Partial Least Squares Multivariate Correlation (sMC)

Chemometrics and Intelligent Laboratory Systems

138, 153-160

DOI: [10.1016/j.chemolab.2014.08.005](https://doi.org/10.1016/j.chemolab.2014.08.005)

Citation Report

#	ARTICLE	IF	CITATIONS
1	Variable importance in PLS in the presence of autocorrelated data " Case studies in manufacturing processes. <i>Chemometrics and Intelligent Laboratory Systems</i> , 2014, 139, 139-145.	1.8	8
2	High-dimensional QSAR prediction of anticancer potency of imidazo[4,5-b]pyridine derivatives using adjusted adaptive LASSO. <i>Journal of Chemometrics</i> , 2015, 29, 547-556.	0.7	50
3	Comparison of the variable importance in projection (VIP) and of the selectivity ratio (SR) methods for variable selection and interpretation. <i>Journal of Chemometrics</i> , 2015, 29, 528-536.	0.7	402
4	Expert system for monitoring the tributyltin content in inland water samples. <i>Chemometrics and Intelligent Laboratory Systems</i> , 2015, 149, 123-131.	1.8	5
5	Novel unified framework for latent modeling and its interpretation. <i>Chemometrics and Intelligent Laboratory Systems</i> , 2015, 149, 127-139.	1.8	6
6	Dynamic collection and analysis of volatile organic compounds from the headspace of cell cultures. <i>Journal of Breath Research</i> , 2015, 9, 047102.	1.5	17
7	Multivariate Exploratory Data Analysis (MEDA) Toolbox for Matlab. <i>Chemometrics and Intelligent Laboratory Systems</i> , 2015, 143, 49-57.	1.8	42
8	Optimal variable selection for Fourier transform infrared spectroscopic analysis of starch-adulterated garlic powder. <i>Sensors and Actuators B: Chemical</i> , 2015, 216, 622-628.	4.0	47
9	Chemometrics and qualitative analysis have a vibrant relationship. <i>TrAC - Trends in Analytical Chemistry</i> , 2015, 69, 34-51.	5.8	91
10	Kernel-based calibration methods combined with multivariate feature selection to improve accuracy of near-infrared spectroscopic analysis. <i>Chemometrics and Intelligent Laboratory Systems</i> , 2015, 147, 139-146.	1.8	16
11	Simple and Effective Way for Data Preprocessing Selection Based on Design of Experiments. <i>Analytical Chemistry</i> , 2015, 87, 12096-12103.	3.2	129
12	Effect of Dietary Fibers on Cecal Microbiota and Intestinal Tumorigenesis in Azoxymethane Treated A/J Min/+ Mice. <i>PLoS ONE</i> , 2016, 11, e0155402.	1.1	39
13	Highly reduced model of the cardiac function for fast simulation. , 2016, , .		1
14	Variable selection in multi-block regression. <i>Chemometrics and Intelligent Laboratory Systems</i> , 2016, 156, 89-101.	1.8	52
15	Chemometrics and the identification of counterfeit medicines "A review. <i>Journal of Pharmaceutical and Biomedical Analysis</i> , 2016, 127, 112-122.	1.4	37
16	Variable space boosting partial least squares for multivariate calibration of near-infrared spectroscopy. <i>Chemometrics and Intelligent Laboratory Systems</i> , 2016, 158, 174-179.	1.8	24
17	Boosting model performance and interpretation by entangling preprocessing selection and variable selection. <i>Analytica Chimica Acta</i> , 2016, 938, 44-52.	2.6	39
18	Classification of gas chromatographic fingerprints of saffron using partial least squares discriminant analysis together with different variable selection methods. <i>Chemometrics and Intelligent Laboratory Systems</i> , 2016, 158, 165-173.	1.8	41
