

CITATION REPORT

List of articles citing

Microbes in Beach Sands: Integrating Environment, Ecology and Public Health

DOI: 10.1007/s11157-014-9340-8

Reviews in Environmental Science and Biotechnology,
2014, 13, 329-368.

Source: <https://exaly.com/paper-pdf/59491899/citation-report.pdf>

Version: 2024-04-29

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
113	Water quality, weather and environmental factors associated with fecal indicator organism density in beach sand at two recreational marine beaches. 2014 , 497-498, 440-447		18
112	The Evolving Science of Microbial Source Tracking. 2015 , 3.4.1-1-3.4.1-7		2
111	Children and Sand Play: Screening of Potential Harmful Microorganisms in Sandboxes, Parks, and Beaches. 2015 , 9, 155-163		4
110	U.S. Recreational Water Quality Criteria: A Vision for the Future. <i>International Journal of Environmental Research and Public Health</i> , 2015 , 12, 7752-76	4.6	54
109	Densities and antimicrobial resistance of <i>Escherichia coli</i> isolated from marine waters and beach sands. <i>Environmental Monitoring and Assessment</i> , 2015 , 187, 342	3.1	13
108	Application of a Microfluidic Quantitative Polymerase Chain Reaction Technique To Monitor Bacterial Pathogens in Beach Water and Complex Environmental Matrices. 2015 , 2, 347-351		20
107	Differential occurrence of <i>Escherichia coli</i> and human <i>Bacteroidales</i> at two Great Lakes beaches. 2015 , 41, 530-535		16
106	A tiered approach for the identification of faecal pollution sources on an Auckland urban beach. 2015 , 49, 333-345		4
105	Sand and Soil Sampling. 2016 , 411-413		
104	Comparative microbial source tracking methods for identification of fecal contamination sources at Sunnyside Beach in the Toronto region area of concern. 2016 , 14, 839-850		15
103	Beach sand and the potential for infectious disease transmission: observations and recommendations. 2016 , 96, 101-120		53
102	Release of <i>Escherichia coli</i> from Foreshore Sand and Pore Water during Intensified Wave Conditions at a Recreational Beach. 2016 , 50, 5676-84		21
101	Correlations between pathogen concentration and fecal indicator marker genes in beach environments. 2016 , 573, 826-830		31
100	Association of land use and its change with beach closure in the United States, 2004-2013. 2016 , 571, 67-76		10
99	Sediment characteristics and microbiological contamination of beach sand - A case-study in the archipelago of Madeira. 2016 , 573, 627-638		11
98	Microbial source tracking in impaired watersheds using PhyloChip and machine-learning classification. 2016 , 105, 56-64		32
97	Dynamic groundwater flows and geochemistry in a sandy nearshore aquifer over a wave event. 2016 , 52, 5248-5264		18

96	Freshwater wrack along Great Lakes coasts harbors <i>Escherichia coli</i> : Potential for bacterial transfer between watershed environments. 2016 , 42, 760-767	5
95	Filamentous ascomycete and basidiomycete fungi from beach sand. 2016 , 27, 603-607	6
94	Soil Bacteria Population Dynamics Following Stimulation for Ureolytic Microbial-Induced CaCO ₃ Precipitation. 2016 , 50, 616-24	49
93	Regional Similarities and Consistent Patterns of Local Variation in Beach Sand Bacterial Communities throughout the Northern Hemisphere. 2016 , 82, 2751-2762	20
92	Wave energy level and geographic setting correlate with Florida beach water quality. 2016 , 104, 54-60	22
91	Recreational Environment. 2016 , 167-192	0
90	Comparison of the occurrence and survival of fecal indicator bacteria in recreational sand between urban beach, playground and sandbox settings in Toronto, Ontario. 2016 , 541, 520-527	11
89	Effect of Low Energy Waves on the Accumulation and Transport of Fecal Indicator Bacteria in Sand and Pore Water at Freshwater Beaches. 2017 , 51, 2786-2794	14
88	Shotgun metagenomic sequencing reveals freshwater beach sands as reservoir of bacterial pathogens. 2017 , 115, 360-369	22
87	Comparing different methods for fast screening of microbiological quality of beach sand aimed at rapid-response remediation. 2017 , 118, 206-212	2
86	Next-generation sequencing and culture-based techniques offer complementary insights into fungi and prokaryotes in beach sands. 2017 , 119, 351-358	13
85	Challenges to Managing Microbial Fecal Pollution in Coastal Environments: Extra-Enteric Ecology and Microbial Exchange Among Water, Sediment, and Air. 2017 , 3, 1-16	22
84	Consideration of Natural Sources in a Bacteria TMDL-Lines of Evidence, Including Beach Microbial Source Tracking. 2017 , 51, 7775-7784	11
83	Long-term sustainability of microbial-induced CaCO precipitation in aqueous media. 2017 , 184, 524-531	34
82	Distribution and Differential Survival of Traditional and Alternative Indicators of Fecal Pollution at Freshwater Beaches. 2017 , 83,	14
81	Acute toxic effect of sewage effluent on the early life phase of an estuarine crab <i>Scylla serrata</i> . 2017 , 24, 16927-16932	
80	Seasonality of Coliform Bacteria Detection Rates in New Jersey Domestic Wells. 2017 , 55, 346-361	10
79	Monitoring bacterial indicators of water quality in a tidally influenced delta: A Sisyphean pursuit. 2017 , 578, 346-356	13

78	Assessment of the microbiological quality of recreational waters: indicators and methods. 2017 , 2, 1		31
77	Influence of instantaneous and time-averaged groundwater flows induced by waves on the fate of contaminants in a beach aquifer. 2017 , 53, 7987-8002		13
76	Bacterial Community Dynamics and Biocement Formation during Stimulation and Augmentation: Implications for Soil Consolidation. 2017 , 8, 1267		32
75	Effect of beach management policies on recreational water quality. 2018 , 212, 266-277		10
74	Gap analysis of Mycoplasma bovis disease, diagnosis and control: An aid to identify future development requirements. 2018 , 65 Suppl 1, 91-109		49
73	Toward Forensic Uses of Microbial Source Tracking. 2018 , 6,		9
72	Possible impacts of sea level rise on disease transmission and potential adaptation strategies, a review. 2018 , 217, 951-968		17
71	Escherichia coli (E. coli) distribution in the Lake Malawi nearshore zone. 2018 , 44, 1281-1288		7
70	Relationships between Microbial Indicators and Pathogens in Recreational Water Settings. <i>International Journal of Environmental Research and Public Health</i> , 2018 , 15,	4.6	63
69	Temporal variability of enterococci and associated sources at three subtropical recreational beaches. 2018 , 47, 327-336		1
68	Foreshore beach sand as a reservoir and source of total phosphorus in Lake Ontario. 2018 , 21, 268-275		4
67	The Impact of Tides on Microbial Water Quality at an Inland River Beach. 2018 , 47, 1123-1129		4
66	Microorganisms in Beach Sand: Health Implications. 2019 , 385-389		2
65	Impacts of a changing earth on microbial dynamics and human health risks in the continuum between beach water and sand. 2019 , 162, 456-470		28
64	Biomonitoring of the environmental indicator and pathogenic microorganisms assortment in foremost pilgrimage beaches of the Bay of Bengal, Southeast coast, India. 2019 , 149, 110548		0
63	Die-off of E. coli as fecal indicator organism on different surfaces after urban floods. 2019 , 250, 109516		2
62	Infection from Outdoor Sporting Events-More Risk than We Think?. 2019 , 5, 37		3
