

CITATION REPORT

List of articles citing

Generation of three-dimensional retinal tissue with functional photoreceptors from human iPSCs

DOI: 10.1038/ncomms5047

Nature Communications, 2014, 5, 4047.

Source: <https://exaly.com/paper-pdf/59721080/citation-report.pdf>

Version: 2024-04-27

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

109 Applications of Neural Organoids in Neurodevelopment and Regenerative Medicine.

108 Retinal Organoids over the Decade.

107 -Negative Retinal Organoids Display Proliferation of Cone Photoreceptors and Loss of Retinal Differentiation.. **2022**, 14, ○

106 Treatment of Inherited Retinal Dystrophies with Somatic Cell Therapy Medicinal Product: A Review. **2022**, 12, 708 ○

105 Establishment and Characterization of MUi027-A: A Novel Patient-Derived Cell Line of Polycystic Kidney Disease with PKD1 Mutation. **2022**, 12, 766 ○

104 Transplanted human cones incorporate and function in a murine cone degeneration model.. **2022**, 2

103 Human photoreceptors switch from autonomous axon extension to cell-mediated process pulling during synaptic marker redistribution.. **2022**, 39, 110827

102 Bioelectric Potential in Next-Generation Organoids: Electrical Stimulation to Enhance 3D Structures of the Central Nervous System. **2022**, 10, ○

101	An enhancer located in a Pde6c intron drives transient expression in the cone photoreceptors of developing mouse and human retinas. 2022,	0
100	Transretinal migration of astrocytes and brain/spinal cord-like cells arising from transplanted human retinal organoids.	
99	Spatial and Temporal Development of Müller Glial Cells in hiPSC-Derived Retinal Organoids Facilitates the Cell Enrichment and Transcriptome Analysis. 16,	0
98	Human organoids in basic research and clinical applications. 2022, 7,	5
