

Optical Isomers of Atorvastatin, Rosuvastatin and Fluvastatin Induce Pregnane X Receptor PXR and Induce CYP2A6, CYP2B6

PLoS ONE

10, e0137720

DOI: [10.1371/journal.pone.0137720](https://doi.org/10.1371/journal.pone.0137720)

Citation Report

| # | ARTICLE | IF | CITATIONS |
|----|---|-----|-----------|
| 1 | Mixed-ligand copper(II) complexes activate aryl hydrocarbon receptor AhR and induce CYP1A genes expression in human hepatocytes and human cell lines. <i>Toxicology Letters</i> , 2016, 255, 24-35. | 0.4 | 6 |
| 2 | Statin therapy in the primary prevention of early atrial fibrillation after coronary artery bypass grafting. <i>Indian Heart Journal</i> , 2016, 68, 792-797. | 0.2 | 12 |
| 3 | Optical isomers of dihydropyridine calcium channel blockers display enantiospecific effects on the expression and enzyme activities of human xenobiotics-metabolizing cytochromes P450. <i>Toxicology Letters</i> , 2016, 262, 173-186. | 0.4 | 6 |
| 4 | Pleiotropic effects of gold(I) mixed-ligand complexes of 9-deazahypoxanthine on transcriptional activity of receptors for steroid hormones, nuclear receptors and xenoreceptors in human hepatocytes and cell lines. <i>European Journal of Medicinal Chemistry</i> , 2016, 121, 530-540. | 2.6 | 5 |
| 5 | Involvement of pregnane X receptor in the impaired glucose utilization induced by atorvastatin in hepatocytes. <i>Biochemical Pharmacology</i> , 2016, 100, 98-111. | 2.0 | 32 |
| 6 | Itraconazole cis -diastereoisomers activate aryl hydrocarbon receptor AhR and pregnane X receptor PXR and induce CYP1A1 in human cell lines and human hepatocytes. <i>Toxicology</i> , 2017, 383, 40-49. | 2.0 | 12 |
| 7 | High-Throughput Assay for Enantiomeric Excess Determination in 1,2- and 1,3-Diols and Direct Asymmetric Reaction Screening. <i>Chemistry - A European Journal</i> , 2017, 23, 10222-10229. | 1.7 | 32 |
| 8 | Anti-hyperlipidemic effect of rice bran polysaccharide and its potential mechanism in high-fat diet mice. <i>Food and Function</i> , 2017, 8, 4028-4041. | 2.1 | 84 |
| 9 | Effects of simvastatin on nuclear receptors, drug metabolizing enzymes and transporters expression in Human Umbilical Vein Endothelial Cells. <i>Pharmacological Reports</i> , 2018, 70, 875-880. | 1.5 | 5 |
| 10 | Hydroxypropyl β -cyclodextrin cross-linked multiwalled carbon nanotube-based chiral nanocomposite electrochemical sensors for the discrimination of multichiral drug atorvastatin isomers. <i>New Journal of Chemistry</i> , 2019, 43, 11178-11188. | 1.4 | 16 |
| 11 | Synthesis of deuterium-labeled (3R, 5S)-fluvastatin and (3S, 5R)-fluvastatin. <i>Journal of Radioanalytical and Nuclear Chemistry</i> , 2019, 319, 263-269. | 0.7 | 4 |
| 12 | Rationalization of stereoselectivity in enzyme reactions. <i>Wiley Interdisciplinary Reviews: Computational Molecular Science</i> , 2019, 9, e1403. | 6.2 | 5 |
| 13 | The atorvastatin metabolic phenotype shift is influenced by interaction of drug-transporter polymorphisms in Mexican population: results of a randomized trial. <i>Scientific Reports</i> , 2020, 10, 8900. | 1.6 | 5 |
| 14 | Analytical Quality by Design Approach of Reverse-Phase High-Performance Liquid Chromatography of Atorvastatin: Method Development, Optimization, Validation, and the Stability-Indicated Method. <i>International Journal of Analytical Chemistry</i> , 2021, 2021, 1-12. | 0.4 | 8 |
| 15 | Negative Regulation of Human Hepatic Constitutive Androstane Receptor by Cholesterol Synthesis Inhibition: Role of Sterol Regulatory Element Binding Proteins. <i>Drug Metabolism and Disposition</i> , 2021, 49, 706-717. | 1.7 | 1 |
| 16 | Separation of a diastereomeric diol pair using the mechanical properties of crystals. <i>CrystEngComm</i> , 2021, 23, 7056-7060. | 1.3 | 2 |
