

CITATION REPORT

List of articles citing

Comparison of high versus low-medium prednisone doses for the treatment of systemic lupus erythematosus patients with high activity at diagnosis

DOI: 10.1016/j.autrev.2015.05.011
Autoimmunity Reviews, 2015, 14, 875-9.

Version: 2024-04-20

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.
