A data envelopment analysis for energy efficiency of co

Citation Report

#	Article	IF	Citations
1	Development of an integrated optimization method for analyzing effect of energy conversion efficiency under uncertainty â€" A case study of Bayingolin Mongol Autonomous Prefecture, China. Energy Conversion and Management, 2015, 106, 687-702.	4.4	6
2	Clean, efficient, affordable and reliable energy for a sustainable future. Energy Conversion and Management, 2015, 102, 1-3.	4.4	19
3	Handbook of Operations Analytics Using Data Envelopment Analysis. Profiles in Operations Research, 2016, , .	0.3	14
4	DEA Environmental Assessment (II): A Literature Study. Profiles in Operations Research, 2016, , 445-481.	0.3	3
5	A theoretical investigation of energy efficiency improvement by coal pre-drying in coal fired power plants. Energy Conversion and Management, 2016, 122, 580-588.	4.4	46
6	A power-saving control strategy for reducing the total pressure applied by the primary air fan of a coal-fired power plant. Applied Energy, 2016, 175, 380-388.	5.1	7
7	A hybrid model for explaining the short-term dynamics of energy efficiency of Chinaâ€™s thermal power plants. Applied Energy, 2016, 169, 738-747.	5.1	56
8	Evaluation of wind power generation potential using a three hybrid approach for households in Ardebil Province, Iran. Energy Conversion and Management, 2016, 118, 295-305.	4.4	49
9	How to achieve the 2020 and 2030 emissions targets of China: Evidence from high, mid and low energy-consumption industrial sub-sectors. Atmospheric Environment, 2016, 145, 280-292.	1.9	51
10	Exploring the changes of energy-related carbon intensity in China: an extended Divisia index decomposition. Natural Hazards, 2016, 83, 501-521.	1.6	14
11	Efficiency assessment of wind farms in China using two-stage data envelopment analysis. Energy Conversion and Management, 2016, 123, 46-55.	4.4	57
12	Energy efficiency analysis of the economic system in China during 1986â€"2012: A parallel slacks-based measure approach. Renewable and Sustainable Energy Reviews, 2016, 55, 990-998.	8.2	52
13	Evaluation of installing photovoltaic plants using a hybrid approach for Khuzestan province, Iran. Renewable and Sustainable Energy Reviews, 2016, 60, 60-74.	8.2	46
14	Modeling a hybrid methodology for evaluating and forecasting regional energy efficiency in China. Applied Energy, 2017, 185, 1769-1777.	5.1	60
15	Energy efficiency evaluation based on DEA integrated factor analysis in ethylene production. Chinese Journal of Chemical Engineering, 2017, 25, 793-799.	1.7	19
16	Regional energy intensity reduction potential in China: A non-parametric analysis approach. Journal of Cleaner Production, 2017, 149, 426-435.	4.6	20
17	Investigation on energy storage and quick load change control of subcritical circulating fluidized bed boiler units. Applied Energy, 2017, 185, 463-471.	5.1	43
18	Eco-efficiency assessment of coal-fired combined heat and power plants in Chinese eco-industrial parks. Journal of Cleaner Production, 2017, 168, 963-972.	4.6	49

#	ARTICLE	IF	CITATIONS
19	Introduction of an energy efficiency tool for small scale biomass gasifiers â€" A thermodynamic approach. Energy Conversion and Management, 2017, 131, 1-9.	4.4	21
20	Energy efficiency evolution of China's paper industry. Journal of Cleaner Production, 2017, 140, 1105-1117.	4.6	72
21	Fossil energy saving and CO2 emissions reduction performance, and dynamic change in performance considering renewable energy input. Energy, 2017, 120, 283-292.	4.5	47
22	Review of methodologies and polices for evaluation of energy efficiency in high energy-consuming industry. Applied Energy, 2017, 187, 203-215.	5.1	229
23	What are the effects of different tax policies on China's coal-fired power generation industry? An empirical research from a network slacks-based measure perspective. Journal of Cleaner Production, 2017, 142, 2816-2827.	4.6	39
24	Performance evaluation of state-owned thermal power plants in northern India using DEA. International Journal of Global Energy Issues, 2017, 40, 380.	0.2	28
25	Total-Factor Energy Efficiency (TFEE) Evaluation on Thermal Power Industry with DEA, Malmquist and Multiple Regression Techniques. Energies, 2017, 10, 1039.	1.6	33
26	Sectoral energy-environmental efficiency and its influencing factors in China: Based on S-U-SBM model and panel regression model. Journal of Cleaner Production, 2018, 182, 545-552.	4.6	31
27	A thermodynamic analysis and economic evaluation of an integrated lignite upgrading and power generation system. Applied Thermal Engineering, 2018, 135, 356-367.	3.0	13
28	A performance evaluation of China's coal-fired power generation with pollutant mitigation options. Journal of Cleaner Production, 2018, 171, 867-876.	4.6	47
29	How to promote energy efficiency through technological progress in China?. Energy, 2018, 143, 812-821.	4.5	143
30	Eco-efficiency measurement of coal-fired power plants in China using super efficiency data envelopment analysis. Sustainable Cities and Society, 2018, 36, 157-168.	5.1	69
31	Water Use Efficiency and Its Influencing Factors in China: Based on the Data Envelopment Analysis (DEA)â€"Tobit Model. Water (Switzerland), 2018, 10, 832.	1.2	45
32	Developing a more comprehensive energy efficiency index for coal production: Indicators, methods and case study. Energy, 2018, 162, 944-952.	4.5	14
33	Improved measurement of the calorific value of pulverized coal particle flow by laser-induced breakdown spectroscopy (LIBS). Analytical Methods, 2019, 11, 4471-4480.	1.3	26
34	Energy efficiency and sustainable growth in industrial sectors in European Union countries: A nonlinear ARDL approach. Journal of Cleaner Production, 2019, 239, 118045.	4.6	58
35	Efficiency assessment of Iran's petroleum refining industry in the presence of unprofitable output: A dynamic two-stage slacks-based measure. Energy, 2019, 189, 116112.	4.5	20
36	A novel DEACM integrating affinity propagation for performance evaluation and energy optimization modeling: Application to complex petrochemical industries. Energy Conversion and Management, 2019, 183, 349-359.	4.4	35
