

CITATION REPORT

List of articles citing

Variable importance in regression models

DOI: 10.1002/wics.1346

Wiley Interdisciplinary Reviews: Computational
Statistics, 2015, 7, 137-152.

Source: <https://exaly.com/paper-pdf/61677838/citation-report.pdf>

Version: 2024-04-27

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
146	Variable Importance Analysis for Urban Building Energy Assessment in the Presence of Correlated Factors. 2015 , 121, 277-284		3
145	Variable importance in regression models. <i>Wiley Interdisciplinary Reviews: Computational Statistics</i> , 2016 , 8, 154-157	1.4	1
144	Relative importance of factors influencing building energy in urban environment. 2016 , 111, 237-250		20
143	Regional and historical factors supplement current climate in shaping global forest canopy height. <i>Journal of Ecology</i> , 2016 , 104, 469-478	6	29
142	Agricultural land-use dynamics: Assessing the relative importance of socioeconomic and biophysical drivers for more targeted policy. 2017 , 63, 53-66		23
141	Comparative epigenetic and genetic spatial structure of the perennial herb <i>Helleborus foetidus</i> : Isolation by environment, isolation by distance, and functional trait divergence. 2017 , 104, 1195-1204		20
140	Warmer spring conditions increase annual methane emissions from a boreal peat landscape with sporadic permafrost. <i>Environmental Research Letters</i> , 2017 , 12, 115009	6.2	15
139	Has Crude Oil Become a Financial Asset? Evidence from Ten Years of Financialization. 2017 ,		
138	Analysis of Field Data to Describe the Effect of Context (Acoustic and Non-Acoustic Factors) on Urban Soundscapes. 2017 , 7, 173		13
137	Biological processes dominate seasonality of remotely sensed canopy greenness in an Amazon evergreen forest. 2018 , 217, 1507-1520		42
136	Tree cover shows strong sensitivity to precipitation variability across the global tropics. 2018 , 27, 450-460		21
135	In defense of Pratt's variable importance axioms: A response to Gromping. <i>Wiley Interdisciplinary Reviews: Computational Statistics</i> , 2018 , 10, e1433	1.4	1
134	A Bayesian hierarchical model for discrete choice data in health care. 2018 , 27, 3544-3559		2
133	Predicting body fat percentage from anthropometric and laboratory measurements using artificial neural networks. 2018 , 67, 834-839		18
132	Differential declines in Alaskan boreal forest vitality related to climate and competition. 2018 , 24, 1097-1107		28
131	How interindividual differences in brain anatomy shape reading accuracy. 2018 , 223, 701-712		28
130	Sparsity Oriented Importance Learning for High-Dimensional Linear Regression. 2018 , 113, 1797-1812		9

129	Do Information Contagion and Business Model Similarities Explain Bank Credit Risk Commonalities?. 2018,		1
128	Interactions between global change components drive plant species richness patterns within communities in mountain grasslands independently of topography. 2018, 29, 1029-1039		3
127	The influence of weather on avian spring migration phenology: What, where and when?. 2018, 24, 5769-5788	31	
126	Integrated Variable Importance Assessment in Multi-Stage Processes. 2018, 31, 343-355		7
125	Health-Related Quality of Life Is Severely Affected in Primary Orthostatic Tremor. 2017, 8, 747		7
124	BEYOND THE STARS. 2019, 33, 1409-1436		5
123	Investigating risk factors that predict a dog's fear during veterinary consultations. 2019, 14, e0215416		11
122	Ideology Justifies Morality: Political Beliefs Predict Moral Foundations. 2019, 63, 788-806		44
121	Quantification of epitope abundance reveals the effect of direct and cross-presentation on influenza CTL responses. 2019, 10, 2846		34
120	Contrasting Temperature Sensitivity of CO ₂ Exchange in Peatlands of the Hudson Bay Lowlands, Canada. 2019, 124, 2126-2143		9
119	Putting to Test a Model of Self-evaluation of the Learning Method in an e-Learning Environment. 2019, 3-12		2
118	A Brief Review of Random Forests for Water Scientists and Practitioners and Their Recent History in Water Resources. <i>Water (Switzerland)</i> , 2019, 11, 910	3	159
117	Global sensitivity analysis on borehole thermal energy storage performances under intermittent operation mode in the first charging phase. 2019, 143, 183-198		10
116	Analyzing Vietnam's national disaster loss database for flood risk assessment using multiple linear regression-TOPSIS. 2019, 40, 101153		32
115	How to explain and predict the shape parameter of the generalized extreme value distribution of streamflow extremes using a big dataset. 2019, 574, 628-645		29
114	Different modelling approaches for predicting titanium dioxide nanoparticles mobility in intact soil media. 2019, 665, 1168-1181		10
113	Forest type and height are important in shaping the altitudinal change of radial growth response to climate change. 2019, 9, 1336		7
112	QSARs to predict adsorption affinity of organic micropollutants for activated carbon and Cyclodextrin polymer adsorbents. 2019, 154, 217-226		32
