

CITATION REPORT

List of articles citing

White matter hyperintensities, cognitive impairment and dementia: an update

DOI: 10.1038/nrneurol.2015.10

Nature Reviews Neurology, 2015, 11, 157-65.

Source: <https://exaly.com/paper-pdf/61700897/citation-report.pdf>

Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
698	Baseline white matter microstructural integrity is not related to cognitive decline after 5 years: The RUN DMC study. 2015 , 4, 108-114		18
697	Cortical tau load is associated with white matter hyperintensities. 2015 , 3, 60		73
696	White Matter and Hippocampal Volume Predict the Risk of Dementia in Patients with Cerebral Small Vessel Disease: The RUN DMC Study. 2016 , 49, 863-73		31
695	Are AD-Typical Regions the Convergence Point of Multiple Pathologies?. 2015 , 7, 42		14
694	Brain volumetric changes and cognitive ageing during the eighth decade of life. 2015 , 36, 4910-25		53
693	Cerebral small vessel disease, cognitive reserve and cognitive dysfunction. 2015 , 262, 2411-9		46
692	Genetic determinants of white matter hyperintensities and amyloid angiopathy in familial Alzheimer's disease. 2015 , 36, 3140-3151		46
691	Structural Image Analysis of the Brain in Neuropsychology Using Magnetic Resonance Imaging (MRI) Techniques. 2015 , 25, 224-49		27
690	Brain health: the importance of recognizing cognitive impairment: an IAGG consensus conference. 2015 , 16, 731-9		149
689	Wine consumption, cognitive function and dementias: A relationship?. 2016 , 3, 125-137		5
688	Preclinical Cerebral Network Connectivity Evidence of Deficits in Mild White Matter Lesions. 2016 , 8, 27		10
687	Dynamic Progression of White Matter Hyperintensities in Alzheimer's Disease and Normal Aging: Results from the Sunnybrook Dementia Study. 2016 , 8, 62		24
686	White matter dementia. 95-117		
685	Therapeutic innovations. 162-171		
684	White matter hyperintensities in relation to cognition in HIV-infected men with sustained suppressed viral load on combination antiretroviral therapy. 2016 , 30, 2329-39		53
683	Alzheimer's disease with cerebrovascular disease: current status in the Asia-Pacific region. 2016 , 280, 359-74		34
682	Olfactory identification and white matter integrity in amnesic mild cognitive impairment: A preliminary study. 2016 , 26, 270-276		0

681	The Effects of an APOE Promoter Polymorphism on Human White Matter Connectivity during Non-Demented Aging. 2017 , 55, 77-87	10
680	Low Prevalence of Mixed Dementia in a Cohort of 2,000 Elderly Patients in a Memory Clinic Setting. 2016 , 50, 797-806	18
679	Reproducibility and variability of quantitative magnetic resonance imaging markers in cerebral small vessel disease. 2016 , 36, 1319-37	65
678	Cerebral Microbleeds and Lacunar Infarcts Are Associated with Walking Speed Independent of Cognitive Performance in Middle-Aged to Older Adults. 2016 , 62, 500-7	12
677	Age-dependent expression of VEGFR2 in deep brain arteries in small vessel disease, CADASIL, and healthy brains. 2016 , 42, 110-5	9
676	Rolle vaskulärer Risikofaktoren für die Entstehung und Progression der Alzheimer-Demenz. 2016 , 43, 309-317	1
