

CITATION REPORT

List of articles citing

No scientific consensus on GMO safety

DOI: 10.1186/s12302-014-0034-1

Environmental Sciences Europe, 2015, 27, .

Source: <https://exaly.com/paper-pdf/61793248/citation-report.pdf>

Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
105	A challenge to scientific integrity: a critique of the critics of the GMO rat study conducted by Gilles-Eric Sfalini et al. (2012). <i>Environmental Sciences Europe</i> , 2015 , 27,	5	15
104	Can Systematic Reviews Inform GMO Risk Assessment and Risk Management?. 2015 , 3, 113		10
103	Potential exposure of butterflies in protected habitats by Bt maize cultivation: A case study in Switzerland. 2015 , 192, 369-377		20
102	Ethics of Dissent: A Plea for Restraint in the Scientific Debate About the Safety of GM Crops. 2015 , 28, 903-924		13
101	Consumer perception of genetically modified organisms and sources of information. 2015 , 6, 842-51		123
100	Governance strategies for responding to alarming studies on the safety of GM crops. 2015 , 2, 201-219		6
99	Prospects of genetic modified maize crop in Africa. 2016 , 15, 571-579		3
98	Should Organic Agriculture Maintain Its Opposition to GM? New Techniques Writing the Same Old Story. 2016 , 8, 1105		12
97	The Future of GM Foods or GM Foods of the Future: Where Is the Biotech Revolution Heading?. 2016 , 518-537		
96	GMO Analysis Methods for Food: From Today to Tomorrow. 2016 , 123-178		0
95	Genetically modified crops in Switzerland: implications for agrosystem sustainability evidenced by multi-criteria model. 2016 , 36, 1		6
94	Greener revolutions for all. 2016 , 34, 1106-1110		13
93	Cyanogenic white clover as a proxy for GM biosafety testing using two New Zealand native insects. 2016 , 59, 377-388		1
92	Attitudes toward genetically modified organisms in Poland: to GMO or not to GMO?. 2016 , 8, 689-697		34
91	Quantifying mood, content and dynamics of health forums. 2016 ,		2
90	Effects of labeling a product eco-friendly and genetically modified: A cross-cultural comparison for estimates of taste, willingness to pay and health consequences. 2016 , 50, 65-70		25
89	Facing up to Complexity: Implications for Our Social Experiments. 2016 , 22, 775-814		1

88	Transcriptome and metabolome analysis of liver and kidneys of rats chronically fed NK603 Roundup-tolerant genetically modified maize. <i>Environmental Sciences Europe</i> , 2017 , 29, 6	5	9
87	Environmental impacts of genetically modified plants: A review. 2017 , 156, 818-833		68
86	Trails and Trials in Biotechnology Policy. 2017 , 85-96		
85	Environmental and Ecological Aspects in the Overall Assessment of Bioeconomy. 2017 , 30, 153-170		33
84	Characterization of scientific studies usually cited as evidence of adverse effects of GM food/feed. 2017 , 15, 1227-1234		19
83	Impact on environment, ecosystem, diversity and health from culturing and using GMOs as feed and food. 2017 , 107, 108-121		53
82	Does Controversial Science Call For Public Participation? The Case Of Gmo Skepticism. 2017 , 12, 26-50		
81	Cornell Alliance for Science Evaluation of Consensus on Genetically Modified Food Safety: Weaknesses in Study Design. 2017 , 5, 79		4
80	Food Security and the Sustainability of GMOs in the United States and the European Union. 2017 , 165-193		2
79	How biological background assumptions influence scientific risk evaluation of stacked genetically modified plants: an analysis of research hypotheses and argumentations. 2017 , 13, 11		6
78	Life cycle considerations of nano-enabled agrochemicals: are today's tools up to the task?. 2018 , 5, 1057-1069		25
77	Characterization of GMO or glyphosate effects on the composition of maize grain and maize-based diet for rat feeding. 2018 , 14, 36		8
76	How teachers' attitudes on GMO relate to their environmental values. 2018 , 57, 1-9		12
75	The GMO Industry: A Neglected Earthly Frontier. 2018 , 13, 277-288		1
74	Conclusions. 2018 , 861-868		
73	European Court of Justice ruling regarding new genetic engineering methods scientifically justified: a commentary on the biased reporting about the recent ruling. <i>Environmental Sciences Europe</i> , 2018 , 30, 52	5	16
72	Evaluation of horizontal gene transfer risk between the Mediterranean fruit fly <i>Ceratitis capitata</i> (Tephritidae) and its parasitoid <i>Fopius ceratitivorus</i> (Braconidae). 2018 , 13, e0207999		
71	Addressing Climate Change in Responsible Research and Innovation: Recommendations for Its Operationalization. 2018 , 10, 2012		7

70	The International Regulatory Framework for the Use of GMOs and Products Thereof as Food Aid. 2018 , 9, 120-136	1
69	A 2-year field trial reveals no significant effects of GM high-methionine soybean on the rhizosphere bacterial communities. 2018 , 34, 113	6
68	NGO perspectives on the social and ethical dimensions of plant genome-editing. 2019 , 36, 779-791	16
67	Relationship between faecal microbiota and plasma metabolome in rats fed NK603 and MON810 GM maize from the GMO90+ study. 2019 , 131, 110547	7
66	Bread wheat: a role model for plant domestication and breeding. 2019 , 156, 16	34
65	Co-producing European knowledge and publics amidst controversy: The EU expert network on unconventional hydrocarbons. 2019 , 46, 721-731	2
64	Nutrition and Stress. 2019 , 463-495	
63	Genetic Engineering and Society. 2019 , 203-233	
62	The GMO90+ Project: Absence of Evidence for Biologically Meaningful Effects of Genetically Modified Maize-based Diets on Wistar Rats After 6-Months Feeding Comparative Trial. 2019 , 168, 315-338	7
61	Genetically Engineered Oil Seed Crops and Novel Terrestrial Nutrients: Ethical Considerations. 2019 , 25, 1485-1497	3
60	The anti-GMO advocacy: an institutionalist and systems-theoretic assessment. 2019 , 48, 888-905	3
59	Optimal definition of the limit of detection (LOD) in detecting genetically modified grains from heterogeneous grain lots. 2019 , 16, 36-53	0
58	Materialized ideology and environmental problems: The cases of solar geoengineering and agricultural biotechnology. 2020 , 23, 389-410	2
57	Polyclonal antibody production anti Pc_312-324 peptide. Its potential use in electrochemical immunosensors for transgenic soybean detection. 2020 , 131, 107397	3
56	Biodegradable Food Packaging Materials and Prospects of the Fourth Industrial Revolution for Tomato Fruit and Product Handling. 2020 , 2020, 8879101	12
55	The influence of consumers' knowledge on their responses to genetically modified foods. 2021 , 12, 146-157	6
54	Will gene-edited and other GM crops fail sustainable food systems?. 2021 , 247-284	3
53	Sustainable Cultivation of GM Crops in the Age of Climate Change: A Global Perspective. 2021 , 237-271	

52	Public Acceptance of GM Foods: A Global Perspective (1999-2019). 2021 , 293-315	3
51	Protection from Fake News—The Need for Descriptive Factual Labeling for Online Content. 2021 , 13, 142	12
50	Improving the politics of biotechnological innovations in food security and other sustainable development goals. 2021 , 30, 613-618	1
49	Sustainable Agricultural Approaches for Enhanced Crop Productivity, Better Soil Health, and Improved Ecosystem Services. 2020 , 1-23	1
48	Laboratory Rodent Diets Contain Toxic Levels of Environmental Contaminants: Implications for Regulatory Tests. 2015 , 10, e0128429	46
47	Analysis of the Global Pulses Market and Programs Encouraging Consumption of This Food. 2019 , 19(34), 85-96	3
46	Outcome of the public consultation on the draft Scientific Opinion on the applicability of the EFSA Opinion on site-directed nucleases type 3 for the safety assessment of plants developed using site-directed nucleases type 1 and 2 and oligonucleotide-directed mutagenesis. 2020 , 17, 1972E	1
45	Science and the public: Debate, denial, and skepticism. 2016 , 4, 537-553	25
44	Alternatives for mammal pest control in New Zealand in the context of concerns about 1080 toxicant (sodium fluoroacetate). 1-43	
43	The community study has begun. 2016 , 18, 321-322	
42	Changing In Protein Profile Of Pigs Blood During Feeding With Gm Soybeans. 2016 ,	
41	Amino acid composition of pigs' meat at using GM soy in their diets. 2017 , 19, 37-43	
40	Banana Brokers. 2019 , 31, 69-92	2
39	Relationship between faecal microbiota and plasma metabolome in rats fed NK603 and MON810 GM maize from the GMO90+ study.	
38	Food Safety and the Ethics of Consent. 2020 , 79-107	
37	Gmo labeling in food products in montevideo, uruguay.	1
36	The ethics of gene editing in human stem cells. 2022 , 111-121
