## Survey of the Heritability and Sparse Architecture of Gene Expression Traits across Human Tissues

DOI: 10.1371/journal.pgen.1006423  
PLoS Genetics, 2016, 12, e1006423.

**Source:** <https://exaly.com/paper-pdf/63103261/citation-report.pdf>

**Version:** 2024-04-26

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.
