Riscos Cardiovasculares em Adolescentes

Revista Brasileira De Epidemiologia

19, 464-468

DOI: 10.1590/1980-5497201600020020

Citation Report

#	ARTICLE	IF	CITATIONS
1	Design of a school randomized trial for nudging students towards healthy diet and physical activity to prevent obesity. <i>Medicine (United States)</i> , 2017, 96, e8898.	0.4	6
2	Using the method of triads in the validation of a food frequency questionnaire to assess the consumption of fatty acids in adults. <i>Journal of Human Nutrition and Dietetics</i> , 2018, 31, 85-95.	1.3	14
3	Associations of multiple unhealthy lifestyle behaviors with overweight/obesity and abdominal obesity among Brazilian adolescents: A country-wide survey. <i>Nutrition, Metabolism and Cardiovascular Diseases</i> , 2018, 28, 765-774.	1.1	34
4	Physical activity but not sedentary time is associated with vitamin D status in adolescents: study of cardiovascular risk in adolescents (ERICA). <i>European Journal of Clinical Nutrition</i> , 2019, 73, 432-440.	1.3	15
5	Increase in Protein Intake After 3 Months of RYGB Is an Independent Predictor for the Remission of Obesity in the First Year of Surgery. <i>Obesity Surgery</i> , 2019, 29, 3780-3785.	1.1	10
6	Effectiveness of school-based home intervention for adolescent obesity prevention: parallel school randomised study. <i>British Journal of Nutrition</i> , 2019, 122, 1073-1080.	1.2	8
7	Usual intake and dietary sources of Selenium in adolescents: A cross-sectional school-based study. <i>Clinical Nutrition ESPEN</i> , 2019, 33, 91-97.	0.5	7
8	Absolute and Relative Changes in Ultra-processed Food Consumption and Dietary Antioxidants in Severely Obese Adults 3 Months After Roux-en-Y Gastric Bypass. <i>Obesity Surgery</i> , 2019, 29, 1810-1815.	1.1	9
9	Padrões alimentares de adolescentes brasileiros por regiões geográficas: análise do Estudo de Riscos Cardiovasculares em Adolescentes (ERICA). <i>Cadernos De Saude Publica</i> , 2019, 35, e00153818.	0.4	25
10	Unhealthy snack intake modifies the association between screen-based sedentary time and metabolic syndrome in Brazilian adolescents. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2019, 16, 115.	2.0	20
11	Potential Role of Nutrient Intake and Malnutrition as Predictors of Uremic Oxidative Toxicity in Patients with End-Stage Renal Disease. <i>Oxidative Medicine and Cellular Longevity</i> , 2019, 2019, 1-12.	1.9	8
12	Diet quality index for Brazilian adolescents: the ERICA study. <i>European Journal of Nutrition</i> , 2020, 59, 539-556.	1.8	19
13	Association between dietary patterns and overweight/obesity: a Brazilian national school-based research (ERICA 2013-2014). <i>Zeitschrift Fur Gesundheitswissenschaften</i> , 2020, 28, 163-171.	0.8	6
14	Low intake of dietary fibre among Brazilian adolescents and association with nutritional status: cross-sectional analysis of Study of Cardiovascular Risks in Adolescents data. <i>Public Health Nutrition</i> , 2020, 23, 2557-2562.	1.1	1
15	Association between DASH diet (Dietary Approaches to Stop Hypertension) and hypertension in adolescents: A cross-sectional school-based study. <i>Clinical Nutrition ESPEN</i> , 2020, 36, 69-75.	0.5	13
16	Prevalence and factors associated with hypovitaminosis D in adolescents from a sunny country: Findings from the ERICA survey. <i>Journal of Steroid Biochemistry and Molecular Biology</i> , 2020, 199, 105609.	1.2	13
17	Major food groups contributing to sodium intake in school-attending adolescents. <i>International Journal of Adolescent Medicine and Health</i> , 2021, 33, .	0.6	2
18	Food consumption on campus is associated with meal eating patterns among college students. <i>British Journal of Nutrition</i> , 2021, 126, 53-65.	1.2	8

#	ARTICLE	IF	CITATIONS
19	Effects of Probiotics Supplementation on Gastrointestinal Symptoms and SIBO after Roux-en-Y Gastric Bypass: a Prospective, Randomized, Double-Blind, Placebo-Controlled Trial. <i>Obesity Surgery</i> , 2021, 31, 143-150.	1.1	22
20	Skipping breakfast is associated with the presence of cardiometabolic risk factors in adolescents: Study of Cardiovascular Risks in Adolescents "ERICA". <i>British Journal of Nutrition</i> , 2021, 126, 276-284.	1.2	19
21	The compensatory effect of exercise on physical activity and energy intake in young men with overweight: The EFECT randomised controlled trial. <i>Physiology and Behavior</i> , 2021, 229, 113249.	1.0	9
22	Effect of phytosterol capsule supplementation associated with the National Cholesterol Education Program Step 2 diet on low-density lipoprotein in children and adolescents with dyslipidemia: A double-blind crossover trial. <i>Nutrition</i> , 2021, 82, 111051.	1.1	4
23	Degree of food processing and its relationship with overweight and body adiposity in Brazilian adults. <i>Revista De Nutricao</i> , 0, 34, .	0.4	2
24	Study of Cardiovascular Risk Factors in Adolescents: Association between Intake of Vitamins A and E and Lipid Profile. <i>Current Nutrition and Food Science</i> , 2021, 17, 321-327.	0.3	1
25	DASH diet (Dietary Approaches to Stop Hypertension) and overweight/obesity in adolescents: The ERICA study. <i>Clinical Nutrition ESPEN</i> , 2021, 42, 173-179.	0.5	11
26	Selenium intake is not associated with the metabolic syndrome in Brazilian adolescents: an analysis of the Study of Cardiovascular Risk Factors in Adolescents. <i>British Journal of Nutrition</i> , 2021, , 1-11.	1.2	4
27	Association between dietary inflammatory index and cardiometabolic risk factors among Brazilian adolescents: results from a national cross-sectional study. <i>British Journal of Nutrition</i> , 2021, , 1-24.	1.2	5
28	Food consumption according to degree of food processing, behavioral variables, and sociodemographic factors: Findings from a population-based study in Brazil. <i>Nutrition</i> , 2022, 93, 111505.	1.1	3
30	Association between body weight misperception and dietary patterns in Brazilian adolescents: Cross-sectional study using ERICA data. <i>PLoS ONE</i> , 2021, 16, e0257603.	1.1	8
31	Association between diet quality index and cardiometabolic risk factors in adolescents: Study of Cardiovascular Risks in Adolescents (ERICA). <i>Nutrition</i> , 2021, 90, 111216.	1.1	5
33	ASSOCIATION BETWEEN BODY WEIGHT PERCEPTION AND QUALITY OF DIET IN BRAZILIAN ADOLESCENTS. <i>Revista Paulista De Pediatria</i> , 2020, 38, e2020057.	0.4	6
34	Study of Cardiovascular Risk Factors in Adolescents (ERICA): results and potentiality. <i>Revista De Saude Publica</i> , 2016, 50, 2s.	0.7	25
35	Insulin resistance and associated factors in female adolescents from two capital cities in the north and south of Brazil. <i>Diabetology and Metabolic Syndrome</i> , 2021, 13, 113.	1.2	0
37	Factors associated with the consumption of fruits and vegetables by schoolchildren: a comparative analysis between 2007 and 2012. <i>Revista De Nutricao</i> , 0, 33, .	0.4	0
39	Treatment of Childhood Obesity Based on Brazilian Dietary Guidelines Plus Energy Restriction (PAPPAS) Tj ETQq0 0.0 rgBT /Overlock 10	0.5	5
40	Association between dietary inflammatory index and cardiometabolic risk factors among Brazilian adolescents: results from a national cross-sectional study "CORRIGENDUM". <i>British Journal of Nutrition</i> , 2022, 128, 784-784.	1.2	2

#	ARTICLE	IF	CITATIONS
42	Relationship between time-dependent variability in cardiometabolic risk factors and biochemical markers with cytokine and adipokine levels in hemodialysis patients. <i>Cytokine</i> , 2022, 151, 155802.	1.4	4
43	Restricted dietary pattern may contribute to lowering blood pressure in adolescents with obesity: Study of Cardiovascular Risk in Adolescents. <i>Journal of Hypertension</i> , 2022, 40, 785-793.	0.3	4
44	Associations between biological and behavioral factors in early life and food consumption in Brazilian adolescents: Results from the ERICA study. <i>PLoS ONE</i> , 2022, 17, e0264714.	1.1	0
45	Limitações na comparação dos Inquéritos Nacionais de Alimentação de 2008 a 2009 e 2017 a 2018. <i>Revista De Saude Publica</i> , 2021, 55, 1-10.	0.7	4
46	Lifestyle patterns associated with common mental disorders in Brazilian adolescents: Results of the Study of Cardiovascular Risks in Adolescents (ERICA). <i>PLoS ONE</i> , 2021, 16, e0261261.	1.1	6
47	Relative validity and reproducibility of food frequency questionnaire for individuals on hemodialysis (NUGÉ-HD study). <i>Hemodialysis International</i> , 2021, , .	0.4	0
48	Asthma and vitamin D in Brazilian adolescents: Study of Cardiovascular Risks in Adolescents (ERICA). <i>Jornal Brasileiro De Pneumologia</i> , 2021, 47, e20210281.	0.4	1
49	Development of a mobile application to assess Brazilian schoolchildren's diet: CADE " food consumption at home and at school. <i>Journal of Nutritional Science</i> , 2022, 11, e27.	0.7	0
50	Association between Cardiovascular Risk in Adolescents and Daily Consumption of Soft Drinks: a Brazilian National Study. <i>International Journal of Cardiovascular Sciences</i> , 2022, , .	0.0	0
51	Assessing adolescent diet and physical activity behaviour, knowledge and awareness in low- and middle-income countries: a systematised review of quantitative epidemiological tools. <i>BMC Public Health</i> , 2022, 22, 975.	1.2	1
52	Dietary patterns, breakfast consumption, meals with family and associations with common mental disorders in adolescents: a school-based cross-sectional study. <i>BMC Public Health</i> , 2022, 22, 980.	1.2	4
53	The coexistence of obesogenic behaviors among Brazilian adolescents and their associated factors. <i>BMC Public Health</i> , 2022, 22, .	1.2	4
54	Estimation of underreporting of energy intake using different methods in a subsample of the ELSA-Brasil study. <i>Cadernos De Saude Publica</i> , 2022, 38, .	0.4	4
55	Ideal Cardiovascular Health in adolescents: Findings from Study of Cardiovascular Risks in Adolescents. <i>Nutrition, Metabolism and Cardiovascular Diseases</i> , 2022, , .	1.1	0
56	Living with parents, lifestyle pattern and common mental disorders in adolescents: a school-based study in Brazil. <i>BMC Public Health</i> , 2022, 22, .	1.2	1
57	Nut-enriched energy restricted diet has potential to decrease hunger in women at cardiometabolic risk: a randomized controlled trial (Brazilian Nuts Study). <i>Nutrition Research</i> , 2023, 109, 35-46.	1.3	5
59	Effect of the dietary inflammatory potential on the trajectory of body adiposity in a Brazilian cohort of university students. <i>American Journal of Human Biology</i> , 2023, 35, .	0.8	1
60	Association between dietary inflammatory index and anthropometric indicators of adiposity in Brazilian adolescents. <i>Pediatric Obesity</i> , 2023, 18, .	1.4	3
