

Active earth pressures from a log-spiral slip surface with

Geotechnique Letters

6, 149-155

DOI: [10.1680/jgele.16.00015](https://doi.org/10.1680/jgele.16.00015)

Citation Report

| # | ARTICLE | IF | CITATIONS |
|----|---|-----|-----------|
| 1 | Discussion: Active earth pressures from a log-spiral slip surface with arching effect. Geotechnique Letters, 2016, 6, 241-243. | 0.6 | 3 |
| 2 | Active and passive arching stresses in c^2 soils: A sensitivity study using computational limit analysis. Computers and Geotechnics, 2017, 84, 47-57. | 2.3 | 46 |
| 3 | Analytical solution to estimate the point of application of resultant passive earth thrust against unsaturated retaining structures. Geomechanics and Geoengineering, 2021, 16, 509-516. | 0.9 | 4 |
| 4 | Practical Use of Modified Hoek-Brown Criterion for Soil Slope Stability Analysis. Geotechnical and Geological Engineering, 2019, 37, 5441-5455. | 0.8 | 8 |
| 5 | Numerical and theoretical research on stress distribution in the loosening zone of the trapdoor problem. International Journal for Numerical and Analytical Methods in Geomechanics, 2019, 43, 1426-1447. | 1.7 | 10 |
| 6 | Calculation of Active Earth Pressure for Narrow Backfill with a Curved Slip Surface. Advances in Civil Engineering, 2019, 2019, 1-10. | 0.4 | 0 |
| 7 | Analytical solution for active earth pressure of c soil considering arching effect. Geomechanics and Geoengineering, 2019, 14, 71-84. | 0.9 | 8 |
| 8 | Active earth pressures for non-planar to planar slip surfaces considering soil arching. International Journal of Geotechnical Engineering, 2020, 14, 730-739. | 1.1 | 10 |
| 9 | Experimental and analytical study of passive earth pressure behind a vertical rigid retaining wall rotating about base. European Journal of Environmental and Civil Engineering, 2022, 26, 2371-2399. | 1.0 | 7 |
| 10 | Study of Active Earth Pressure behind a Vertical Retaining Wall Subjected to Rotation about the Base. International Journal of Geomechanics, 2020, 20, . | 1.3 | 40 |
| 11 | Revisiting Seismic Active/Passive Earth Pressure in Nonuniform Cohesive-Frictional Backfill. International Journal of Geomechanics, 2020, 20, 04020058. | 1.3 | 7 |
| 12 | Active earth pressure of narrow cohesive backfill on rigid retaining wall of rotation about the bottom. Soils and Foundations, 2021, 61, 95-112. | 1.3 | 11 |
| 13 | Analytical solutions for the earth pressure of narrow cohesive backfill with retaining walls rotating about the top. Acta Geotechnica, 2021, 16, 2975-2995. | 2.9 | 6 |
| 14 | Analytical framework for prediction of facing connection loads in reinforced soil walls considering reinforcement downdrag. Transportation Geotechnics, 2021, 30, 100537. | 2.0 | 2 |
| 15 | General Solution for Active Earth Pressure on Rigid Walls Under Strip Surcharge on Retained Soils Using Variational Method. International Journal of Civil Engineering, 2021, 19, 881-896. | 0.9 | 3 |
| 16 | Slip Surface and Active Earth Pressure of Cohesionless Narrow Backfill behind Rigid Retaining Walls under Translation Movement Mode. International Journal of Geomechanics, 2020, 20, . | 1.3 | 14 |
| 17 | Towards an improved analytical framework to estimate active earth pressure in narrow c soils behind rotating walls about the base. Computers and Geotechnics, 2022, 141, 104544. | 2.3 | 35 |
| 18 | Nonlinear Slip-Failure Surface and Associated Lateral Earth Pressure. International Journal of Geomechanics, 2022, 22, . | 1.3 | 0 |
