

CITATION REPORT

List of articles citing

A systems approach to animal communication

DOI: 10.1098/rspb.2015.2889

Proceedings of the Royal Society B: Biological Sciences
, 2016, 283, 20152889.

Source: <https://exaly.com/paper-pdf/64356699/citation-report.pdf>

Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
115	New dimensions in animal communication: the case for complexity. 2016 , 12, 80-89		29
114	Bats perceptually weight prey cues across sensory systems when hunting in noise. 2016 , 353, 1277-80		59
113	Frequency channel-dependent selectivity for temporal call characteristics in gray treefrogs,. 2017 , 220, 1256-1266		0
112	Another stage of development: Biological degeneracy and the study of bodily ageing. 2017 , 163, 46-51		3
111	Exploring the hidden landscape of female preferences for complex signals. <i>Evolution; International Journal of Organic Evolution</i> , 2017 , 71, 1009-1024	3.8	12
110	Zebra stripes: an interspecies signal to facilitate mixed-species herding?. 2017 , 121, 947-952		7
109	Colour, vision and coevolution in avian brood parasitism. 2017 , 372,		29
108	The current and future state of animal coloration research. 2017 , 372,		59
107	The role of bare parts in avian signaling. 2017 , 134, 587-611		19
106	Why do curly tail lizards (genus <i>Leiocephalus</i>) curl their tails? An assessment of displays toward conspecifics and predators. 2017 , 123, 342-347		2
105	Complex signals and comparative mate assessment in wolf spiders: results from multimodal playback studies. <i>Animal Behaviour</i> , 2017 , 134, 283-299	2.8	10
104	Females trade off the uncertainty of breeding resource suitability with male quality during mate choice in an anuran. <i>Animal Behaviour</i> , 2017 , 123, 179-185	2.8	11
103	Multimodal weighting differences by bats and their prey: probing natural selection pressures on sexually selected traits. <i>Animal Behaviour</i> , 2017 , 134, 99-102	2.8	7
102	Sexual Selection in Neotropical Spiders: Examples from Selected Groups. 2017 , 303-350		3
101	Interactions between complex multisensory signal components result in unexpected mate choice responses. <i>Animal Behaviour</i> , 2017 , 134, 239-247	2.8	24
100	Discerning devotion: Testing the signaling theory of religion. 2017 , 38, 82-91		53
99	What makes a multimodal signal attractive? A preference function approach. 2017 , 28, 677-687		18

98	Macroevolutionary patterning of woodpecker drums reveals how sexual selection elaborates signals under constraint. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2018 , 285,	4.4	24
97	Dynamic changes in display architecture and function across environments revealed by a systems approach to animal communication. <i>Evolution; International Journal of Organic Evolution</i> , 2018 , 72, 1134-1145	3.8	17
96	Small but wise: Common marmosets (<i>Callithrix jacchus</i>) use acoustic signals as cues to avoid interactions with blonde capuchin monkeys (<i>Sapajus flavius</i>). 2018 , 80, e22744		51
95	Phenotypic integration and the evolution of signal repertoires: A case study of treefrog acoustic communication. 2018 , 8, 3410-3429		3
94	Synergistic selection regimens drive the evolution of display complexity in birds of paradise. 2018 , 87, 1149-1159		11
93	Call recognition and female choice in a treefrog with a multicomponent call. 2018 , 124, 331-337		3
92	Linking components of complex signals to morphological part: the role of anther and corolla in the complex floral display. <i>Animal Behaviour</i> , 2018 , 135, 223-236	2.8	6
91	Multimodal mother-offspring recognition: the relative importance of sensory cues in a colonial mammal. <i>Animal Behaviour</i> , 2018 , 146, 135-142	2.8	18
90	Evolution of correlated complexity in the radically different courtship signals of birds-of-paradise. 2018 , 16, e2006962		46
89	Synchronization of speed, sound and iridescent color in a hummingbird aerial courtship dive. 2018 , 9, 5260		21
88	Trade-offs between visual and chemical behavioral responses. 2018 , 72, 1		7
87	Using cross-disciplinary knowledge to facilitate advancements in animal communication and science communication research. 2018 , 221,		3
86	Challenges Facing the Study of the Evolutionary Origins of Human Right-Handedness and Language. 2018 , 39, 183-207		9
85	Colour pattern component phenotypic divergence can be predicted by the light environment. 2018 , 31, 1459-1476		4
84	Differences in neural activity, but not behavior, across social contexts in guppies, <i>Poecilia reticulata</i> . 2018 , 72, 1		7
83	Animal choreography of song and dance: a case study in the Montezuma oropendola, <i>Psarocolius montezuma</i> . <i>Animal Behaviour</i> , 2018 , 140, 99-107	2.8	9
82	Avian prenatal auditory stimulation: progress and perspectives. 2018 , 72, 1		8
