

CITATION REPORT

List of articles citing

Thousands of microbial genomes shed light on interconnected biogeochemical processes in an aquifer system

DOI: 10.1038/ncomms13219

Nature Communications, 2016, 7, 13219.

Source: <https://exaly.com/paper-pdf/64731240/citation-report.pdf>

Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

- 22 Deduplication Improves Cost-Efficiency and Yields of De Novo Assembly and Binning of Shotgun Metagenomes in Microbiome Research. **2023**, 11, ○
- 21 Proposal to include the categories kingdom and domain in the International Code of Nomenclature of Prokaryotes. **2023**, 73, ○
- 20 A first insight into the Polish Bochnia Salt Mine metagenome. **2023**, 30, 49551-49566 ○

- 19 Dancing the Nanopore limbo [Nanopore metagenomics from small DNA quantities for bacterial genome reconstruction. ○
- 18 Ultra-small bacteria and archaea exhibit genetic flexibility towards groundwater oxygen content, and adaptations for attached or planktonic lifestyles. **2023**, 3, ○
- 17 Bacterial Communities in a Gradient of Abiotic Factors Near a Sulfide Thermal Spring in Northern Baikal. **2023**, 15, 298 ○
- 16 A novel and diverse group of Candidatus Patescibacteria from bathypelagic Lake Baikal revealed through long-read metagenomics. **2023**, 18, ○
- 15 Hyperactive nanobacteria with host-dependent traits pervade Omnitrophota. **2023**, 8, 727-744 ○
- 14 Microbial diversity and processes in groundwater. **2023**, 211-240 ○
- 13 Assessing groundwater ecosystem health, status, and services. **2023**, 501-524 ○
- 12 Groundwater biodiversity and constraints to biological distribution. **2023**, 113-140 ○
- 11 Transcriptional Control of hgcAB by an ArsR-Like Regulator in *Pseudodesulfovibrio mercurii* ND132. ○
- 10 Discovery of a novel bacterial class with the capacity to drive sulfur cycling and microbiome structure in a paleo-ocean analog. ○
- 9 Comparative Study of Microbial Diversity in Different Coastal Aquifers: Determining Factors. **2023**, 15, 1337 ○
- 8 *Streptomonospora mangrovi* sp. nov., isolated from mangrove soil showing similar metabolic capabilities, but distinct secondary metabolites profiles. **2023**, 205, ○
- 7 Using metatranscriptomics to better understand the role of microbial nitrogen cycling in coastal sediment benthic flux denitrification efficiency. ○
- 6 Annotation-free discovery of functional groups in microbial communities. ○
- 5 O₂ partitioning of sulfur oxidizing bacteria drives acidity and thiosulfate distributions in mining waters. **2023**, 14, ○
- 4 Previously uncharacterized rectangular bacterial structures in the dolphin mouth. **2023**, 14, ○
- 3 Metabolic capacity is maintained despite shifts in microbial diversity in estuary sediments. ○
- 2 [Candidatus Neelsonbacteria] Are Likely Biomass Recycling Ectosymbionts of Methanogenic Archaea in a Stable Benzene-Degrading Enrichment Culture. ○

1 N/S element transformation modulating lithospheric microbial communities by single-species manipulation. **2023**, 11,
