

CITATION REPORT

List of articles citing

Evidence for genetic heterogeneity between clinical subtypes of bipolar disorder

DOI: 10.1038/tp.2016.242
Translational Psychiatry, 2017, 7, e993.

Source: <https://exaly.com/paper-pdf/65971492/citation-report.pdf>

Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
145	Probing the lithium-response pathway in hiPSCs implicates the phosphoregulatory set-point for a cytoskeletal modulator in bipolar pathogenesis. 2017 , 114, E4462-E4471		93
144	[Genetics of bipolar disorder]. 2017 , 88, 755-759		11
143	Evaluation of the interaction between genetic variants of GAD1 and miRNA in bipolar disorders. <i>Journal of Affective Disorders</i> , 2017 , 223, 1-7	6.6	5
142	Advancing psychiatric genetics through dissecting heterogeneity. 2017 , 26, R160-R165		7
141	Inhibitory brainstem reflexes under external emotional-stimuli in bipolar I and II disorders. 2017 , 17, 224		8
140	Genetic validation of bipolar disorder identified by automated phenotyping using electronic health records. <i>Translational Psychiatry</i> , 2018 , 8, 86	8.6	14
139	Recent Genetics and Epigenetics Approaches to PTSD. 2018 , 20, 30		57
138	Shared effects of DISC1 disruption and elevated WNT signaling in human cerebral organoids. <i>Translational Psychiatry</i> , 2018 , 8, 77	8.6	38
137	PlexinA2 Forward Signaling through Rap1 GTPases Regulates Dentate Gyrus Development and Schizophrenia-like Behaviors. 2018 , 22, 456-470		18
136	Polygenic Risk Scores in Clinical Psychology: Bridging Genomic Risk to Individual Differences. 2018 , 14, 119-157		64
135	Genome-wide association studies of bipolar disorder: A systematic review of recent findings and their clinical implications. 2018 , 72, 52-63		50
