Version: 2024-04-25

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
925	Role of objectively measured sedentary behaviour in physical performance, frailty and mortality among older adults: A short systematic review. 2017 , 17, 940-953		43
924	Both Light Intensity and Moderate-to-Vigorous Physical Activity Measured by Accelerometry Are Favorably Associated With Cardiometabolic Risk Factors in Older Women: The Objective Physical Activity and Cardiovascular Health (OPACH) Study. 2017 , 6,		46
923	Preschool children's physical activity intensity during school time: Influence of school schedule. 2017 , 8, 6-9		6
922	A bag-of-words approach for assessing activities of daily living using wrist accelerometer data. 2017 ,		2
921	A school-based physical activity promotion intervention in children: rationale and study protocol for the PREVIENE Project. 2017 , 17, 748		25
920	Citizen science applied to building healthier community environments: advancing the field through shared construct and measurement development. 2017 , 14, 133		33
919	Physical activity and sedentary behavior in patients with systemic lupus erythematosus and rheumatoid arthritis. 2017 , 9, 191-200		19
918	Influence of the workplace on physical activity and cardiometabolic health: Results of the multi-centre cross-sectional Champlain Nurses' study. 2018 , 81, 49-60		29
917	Modeling Clinically Validated Physical Activity Assessments Using Commodity Hardware. 2018 , 22, 335-345		5
916	A Review of Accelerometer-based Activity Monitoring in Cancer Survivorship Research. 2018 , 50, 1790-1801		21
915	Volume of Light Versus Moderate-to-Vigorous Physical Activity: Similar Benefits for All-Cause Mortality?. 2018 , 7,		41
914	Wear compliance, sedentary behaviour and activity in free-living children from hip-and wrist-mounted ActiGraph GT3X+ accelerometers. 2018 , 36, 2424-2430		24
913	Physical activity and sedentary behavior in preschoolers: a longitudinal assessment of trajectories and determinants. 2018 , 15, 35		24
912	Hidden Markov models for monitoring circadian rhythmicity in telemetric activity data. 2018 , 15,		24
911	Randomized Controlled Trial of the SystemCHANGE Intervention on Behaviors Related to Cardiovascular Risk in HIV+ Adults. 2018 , 78, 23-33		30
910	Association of time spent in physical activities and sedentary behaviors with carotid-femoral pulse wave velocity: A systematic review and meta-analysis. 2018 , 269, 211-218		25
909	Reallocating Accelerometer-Assessed Sedentary Time to Light or Moderate- to Vigorous-Intensity Physical Activity Reduces Frailty Levels in Older Adults: An Isotemporal Substitution Approach in the TSHA Study. 2018 , 19, 185.e1-185.e6		41

908	Does school physical education really contribute to accelerometer-measured daily physical activity and non sedentary behaviour in high school students?. 2018 , 36, 1913-1922	23
907	Motivational profiles, accelerometer-derived physical activity, and acute diabetes-related symptoms in adults with type 2 diabetes. 2018 , 18, 469	6
906	Protocol for a 1-year prospective, longitudinal cohort study of patients undergoing Roux-en-Y gastric bypass and sleeve gastrectomy: the BARI-LIFESTYLE observational study. 2018 , 8, e020659	4
905	The Influence of Exercise on Cardiovascular Health in Sedentary Adults With Human Immunodeficiency Virus. 2018 , 33, 239-247	10
904	Accelerometer-measured sedentary time and physical activity-A 15 year follow-up of mortality in a Swedish population-based cohort. 2018 , 21, 702-707	48
903	Classification and Processing of 24-Hour Wrist Accelerometer Data. 2018 , 1, 51-59	9
902	Childcare Correlates of Physical Activity, Sedentary Behavior, and Adiposity in Preschool Children: A Cross-Sectional Analysis of the SPLASHY Study. 2018 , 2018, 9157194	9
901	"In my day" Parents' Views on Children's Physical Activity and Screen Viewing in Relation to Their Own Childhood. 2018 , 15,	6
900	Association between Sleep Quality and Body Composition in Sedentary Middle-Aged Adults. 2018 , 54,	10
899	Association of Objectively Measured Physical Activity With Brown Adipose Tissue Volume and Activity in Young Adults. 2019 , 104, 223-233	13
898	Wrist accelerometer shape feature derivation methods for assessing activities of daily living. 2018 , 18, 124	4
897	24-h movement behaviors from infancy to preschool: cross-sectional and longitudinal relationships with body composition and bone health. 2018 , 15, 118	25
896	Estimation of energy balance and training volume during Army Initial Entry Training. 2018 , 15, 55	14
895	An open-source tool to identify active travel from hip-worn accelerometer, GPS and GIS data. 2018 , 15, 91	12
894	Dietary Intake and Physical Activity Assessment: Current Tools, Techniques, and Technologies for Use in Adult Populations. 2018 , 55, e93-e104	40
893	Application and Validation of Activity Monitors' Epoch Lengths and Placement Sites for Physical Activity Assessment in Exergaming. 2018 , 7,	17
892	Targeted gluteal exercise versus sham exercise on self-reported physical function for people with hip osteoarthritis (the GHOst trial - Gluteal exercise for Hip Osteoarthritis): a protocol for a randomised clinical trial. 2018 , 19, 511	4
891	A systematic review of the association between sedentary behaviors with frailty. 2018 , 114, 1-12	34

890	Short-term efficacy of a computer-tailored physical activity intervention for prostate and colorectal cancer patients and survivors: a randomized controlled trial. 2018 , 15, 106	38
889	Lean mass mediates the relation between temporal summation of pain and sex in young healthy adults. 2018 , 9, 42	2
888	A Biomechanical Re-Examination of Physical Activity Measurement with Accelerometers. 2018 , 18,	20
887	Objective measurement of physical activity outcomes in lifestyle interventions among adults: A systematic review. 2018 , 11, 74-80	58
886	Maternal Lipids at 28 Weeks' Gestation and Offspring Adiposity at Age 5 to 7 Years. 2018 , 103, 3767-3772	2
885	Validating the accuracy of an activity monitor in a visually impaired older population. 2018 , 38, 562-569	
884	Motor skills in association with physical activity, sedentary time, body fat, and day care attendance in 5-6-year-old children-The STEPS Study. 2018 , 28, 2668-2676	20
883	Classification Accuracy of a Wearable Activity Tracker for Assessing Sedentary Behavior and Physical Activity in 3-5-Year-Old Children. 2018 , 15,	12
882	Do Physical Activity Friendly Neighborhoods Affect Community Members Equally? A Cross-Sectional Study. 2018 , 15,	3
881	Physical activity and disability measures in chronic non-specific low back pain: a study of responsiveness. 2018 , 32, 1684-1695	10
880	The Smart City Active Mobile Phone Intervention (SCAMPI) study to promote physical activity through active transportation in healthy adults: a study protocol for a randomised controlled trial. 2018 , 18, 880	13
879	Using Devices to Assess Physical Activity and Sedentary Behavior in a Large Cohort Study, the Women's Health Study. 2018 , 1, 60-69	13
878	In preschool children, physical activity during school time can significantly increase by intensifying locomotor activities during physical education classes. 2018 , 11, 438	4

- 19 Associations of accelerometer-based sedentary bouts with adiposity markers among German adults [Results from a cross-sectional study. **2023**, 23, ○
- 18 Analysis of the 24-h activity cycle: An illustration examining the association with cognitive function in the Adult Changes in Thought study. 14, ○
- 17 Associations between older adults' physical fitness level and their engagement in different types of physical activity: cross-sectional results from the OUTDOOR ACTIVE study. **2023**, 13, e068105 ○
- 16 Associations of activity, sedentary, and sleep behaviors with cognitive and social-emotional health in early childhood. **2023**, 2, ○
- 15 Method for Activity Sleep Harmonization (MASH): a novel method for harmonizing data from two wearable devices to estimate 24-h sleep/wake cycles. **2023**, 2, ○
- 14 Comparison of physical activity metrics from two research-grade accelerometers worn on the non-dominant wrist and thigh in children. **2023**, 41, 80-88 ○
- 13 Validity of the Xiaomi Mi Band 2, 3, 4 and 5 Wristbands for Assessing Physical Activity in 12-to-18-Year-Old Adolescents under Unstructured Free-Living Conditions. Fit-Person Study. 196-211 ○
- 12 Associations of accelerometer-based sedentary time, light physical activity and moderate-to-vigorous physical activity with resting cardiac structure and function in adolescents according to sex, fat mass, lean mass, BMI, and hypertensive status. ○
- 11 Heat stress and heat strain among outdoor workers in El Salvador and Nicaragua. ○
- 10 Changes in physical activity patterns from adolescence to young adulthood: the BELINDA study. ○
- 9 Association between lifestyle factors and thyroid function in young euthyroid adults. **2023**, 1-20 ○

- 8 Fourteen days free-living evaluation of an open-source algorithm for counting steps in healthy adults with a large variation in physical activity level. **2023**, 5,
- 7 How do relative time in moderate-to-vigorous physical activity corresponds to the 2020 guidelines on physical activity and sedentary behaviour?.
- 6 Physical Activity Epidemiology. **2023**, 1-90
- 5 Age-Related Differences in Trunk Kinematics and Interplanar Decoupling with the Pelvis during Gait in Healthy Older versus Younger Men. **2023**, 12, 2951
- 4 Child perceived motor competence as a moderator between physical activity parenting and child objectively measured physical activity. **2023**, 102444
- 3 Adherence to the World Health Organization's physical activity recommendation in preschool-aged children: a systematic review and meta-analysis of accelerometer studies. **2023**, 20,
- 2 Associations between appetite, physical activity and sedentary behaviour from hip- and wrist-worn accelerometers in community-dwelling older adults.
- 1 Association of meal timing with body composition and cardiometabolic risk factors in young adults.
