

# CITATION REPORT

List of articles citing

3D printing: Printing precision and application in food sector

DOI: 10.1016/j.tifs.2017.08.018

Trends in Food Science and Technology, 2017, 69, 83-94.

**Source:** <https://exaly.com/paper-pdf/67047180/citation-report.pdf>

**Version:** 2024-04-10

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
378	Effect of Different Gums on Features of 3D Printed Object Based on Vitamin-D Enriched Orange Concentrate. <b>2018</b> , 13, 250-262		67
377	Model-based design and validation of food texture of 3D printed pectin-based food simulants. <b>2018</b> , 231, 72-82		37
376	3D printing technology: The new era for food customization and elaboration. <i>Trends in Food Science and Technology</i> , <b>2018</b> , 75, 231-242	15.3	144
375	A Review of 3D Food Printing Technology. <b>2018</b> , 213, 01012		10
374	Research Progress of Preparation Technology of Nano Copper Powder for 3D Printing. <b>2018</b> , 777, 150-157		
373	Economic Model for the Evaluation of 3D Food Printing. <b>2018</b> ,		2
372	Integrated Product, Process and Manufacturing System Development. <b>2018</b> ,		2
371	Creation of internal structure of mashed potato construct by 3D printing and its textural properties. <b>2018</b> , 111, 534-543		92
370	Pharmaceutical Additive Manufacturing: a Novel Tool for Complex and Personalized Drug Delivery Systems. <b>2018</b> , 19, 3388-3402		44
369	3D printed fiber optic faceplates by custom controlled fused deposition modeling. <b>2018</b> , 26, 15362-15376		17
368	3D printed milk protein food simulant: Improving the printing performance of milk protein concentration by incorporating whey protein isolate. <b>2018</b> , 49, 116-126		68
367	Optimising small hydrocyclone design using 3D printing and CFD simulations. <b>2018</b> , 350, 653-659		49
366	Effect of gums on the rheological, microstructural and extrusion printing characteristics of mashed potatoes. <b>2018</b> , 117, 1179-1187		62
365	Dual extrusion 3D printing of mashed potatoes/strawberry juice gel. <b>2018</b> , 96, 589-596		68
364	Materials Properties of Printable Edible Inks and Printing Parameters Optimization during 3D Printing: a review. <b>2019</b> , 59, 3074-3081		59
363	Investigation on characteristics of 3D printing using Nostoc sphaeroides biomass. <b>2019</b> , 99, 639-646		33
362	Linking rheology and printability of a multicomponent gel system of carrageenan-xanthan-starch in extrusion based additive manufacturing. <b>2019</b> , 87, 413-424		143

361	Particular Alimentations for Nutrition, Health and Pleasure. <b>2019</b> , 87, 371-408	5
360	Layered extrusion forming of complex ceramic structures using starch as removable support. <b>2019</b> , 45, 21843-21850	10
359	Towards the Meaningful 3D-Printed Object: Understanding the Materiality of 3D Prints. <b>2019</b> , 533-552	2
358	3D printed mold-based capsaicin candy for the treatment of oral ulcer. <b>2019</b> , 568, 118517	7
357	Texture-modified 3D printed dark chocolate: Sensory evaluation and consumer perception study. <b>2019</b> , 50, 386-399	29
356	3D printing of Cordyceps flower powder. <b>2019</b> , 42, e13179	14
355	Polymer Powder Bed Fusion Additive Manufacturing: Recent Developments in Materials, Processes, and Applications. <b>2019</b> , 7-36	4
354	3D printing of unique water-soluble polymer-based suppository shell for controlled drug release. <b>2019</b> , 568, 118494	30
353	Additively Manufactured Perforated Superstrate to Improve Directive Radiation Characteristics of Electromagnetic Source. <b>2019</b> , 7, 153445-153452	28
352	3D Extrusion Printing and Post-Processing of Fibre-Rich Snack from Indigenous Composite Flour. <b>2019</b> , 12, 1776-1786	40
351	Extrusion-based 3D printing of food pastes: Correlating rheological properties with printing behaviour. <b>2019</b> , 58, 102214	68
350	3D Printing and Characterization of Hydroxypropyl Methylcellulose and Methylcellulose for Biodegradable Support Structures. <b>2019</b> , 34, 552-559	5
349	Fabrication of Gel-Like Emulsions with Whey Protein Isolate Using Microfluidization: Rheological Properties and 3D Printing Performance. <b>2019</b> , 12, 1967-1979	29
348	Effect of additives on thermal, rheological and tribological properties of 3D printed dark chocolate. <b>2019</b> , 119, 161-169	32
347	Model Building and Slicing in Food 3D Printing Processes: A Review. <b>2019</b> , 18, 1052-1069	59
346	Assessing the 3D Printing Precision and Texture Properties of Brown Rice Induced by Infill Levels and Printing Variables. <b>2019</b> , 12, 1185-1196	63

- 26 Pea protein-xanthan gum interaction driving the development of 3D printed dysphagia diet. **2023**, 139, 108497 o
- 25 Rheological and physicochemical properties of *Spirulina platensis* residues-based inks for extrusion 3D food printing. **2023**, 112823 o
- 24 Construction of 3D printed meat analogs from plant-based proteins: Improving the printing performance of soy protein- and gluten-based pastes facilitated by rice protein. **2023**, 167, 112635 o
- 23 Fabrication of Pickering emulsions stabilized by citrus pectin modified with  $\beta$ -cyclodextrin and its application in 3D printing. **2023**, 312, 120833 o
- 22 Printability, texture, and sensory trade-offs for 3D printed potato with added proteins and lipids. **2023**, 351, 111517 o
- 21 Effects of gums on 3D printing performance of *Pleurotus eryngii* powder. **2023**, 351, 111514 o
- 20 Modelling the Factors Influencing Polish Consumers' Approach towards New Food Products on the Market. **2023**, 15, 2818 o

- 19 The research progress of physical regulation techniques in 3D food printing. **2023**, 133, 231-243 ○
- 18 Consumer Perception and Attitudes About New Product Designs by 3D Food Printing: A Case of Study. **2023**, 139-150 ○
- 17 Rheological property,  $\beta$ -carotene stability and 3D printing characteristic of whey protein isolate emulsion gels by adding different polysaccharides. **2023**, 414, 135702 ○
- 16 The application of 3D printing technology on starch-based product: A review. **2023**, 134, 149-161 ○
- 15 An Insight into Recent Advancement in Plant- and Algae-Based Functional Ingredients in 3D Food Printing Ink Formulations. ○
- 14 Meat Alternatives: Evolution, Structuring Techniques, Trends, and Challenges. ○
- 13 Non-gene-editing microbiome engineering of spontaneous food fermentation microbiota limitation control, design control, and integration. ○
- 12 Three-Dimensional Printing Applications in Food Industry. **2023**, 3, 91-112 ○
- 11 A brief review on 3D printing of chocolate. ○
- 10 Rheology as a Tool for Fine-Tuning the Properties of Printable Bioinspired Gels. **2023**, 28, 2766 ○
- 9 5D Food Printing with Color Change Induced by Probiotic Growth in a Starch-Protein-Based Gel System. ○
- 8 Research on Microwave-Induced Bidirectional Deformation of Coix Seed Compound Materials in 4D Printing. ○
- 7 3D printing technologies in the food system for food production and packaging. ○
- 6 Thermorheological Behavior of  $\kappa$ -Carrageenan Hydrogels Modified with Xanthan Gum. **2023**, 8, 119 ○
- 5 Temperature controlled cryoprinting of food for dysphagia patients. **2023**, 86, 103362 ○
- 4 Future perspective of additive manufacturing of food for children. **2023**, ○
- 3 Effect of Different Hydrocolloids on the Rheological, Microstructural, and 3D Printing Characteristics of Purple Sweet Potato Puree. ○
- 2 Transferring theoretical principles into practical applications: Cereals, pseudocereals, and their applications in breadmaking and other agri-food. **2023**, 399-431 ○
