Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
250	Enhancing methane production from food waste fermentate using biochar: the added value of electrochemical testing in pre-selecting the most effective type of biochar. 2017 , 10, 303		81
249	Feedforward neural network model estimating pollutant removal process within mesophilic upflow anaerobic sludge blanket bioreactor treating industrial starch processing wastewater. <i>Bioresource Technology</i> , 2018 , 257, 102-112	11	46
248	Differentiated stimulating effects of activated carbon on methanogenic degradation of acetate, propionate and butyrate. 2018 , 76, 394-403		59
247	Novel staged anaerobic fluidized bed ceramic membrane bioreactor: Energy reduction, fouling control and microbial characterization. 2018 , 553, 200-208		63
246	Electrochemical biotechnologies minimizing the required electrode assemblies. 2018 , 50, 182-188		23
245	Addition of granular activated carbon and trace elements to favor volatile fatty acid consumption during anaerobic digestion of food waste. <i>Bioresource Technology</i> , 2018 , 260, 157-168	11	109
244	Electron and Proton Flux for Carbon Dioxide Reduction in During Direct Interspecies Electron Transfer. 2018 , 9, 3109		40
243	Enhanced anaerobic digestion of ammonia-rich swine manure by zero-valent iron: With special focus on the enhancement effect on hydrogenotrophic methanogenesis activity. <i>Bioresource Technology</i> , 2018 , 270, 172-179	11	54
242	Magnetite Triggering Enhanced Direct Interspecies Electron Transfer: A Scavenger for the Blockage of Electron Transfer in Anaerobic Digestion of High-Solids Sewage Sludge. 2018 , 52, 7160-7169		121
241	Improved efficiency of anaerobic digestion through direct interspecies electron transfer at mesophilic and thermophilic temperature ranges. <i>Chemical Engineering Journal</i> , 2018 , 350, 681-691	14.7	125
240	Role of biochar in the granulation of anaerobic sludge and improvement of electron transfer characteristics. <i>Bioresource Technology</i> , 2018 , 268, 28-35	11	67
239	Role and Potential of Direct Interspecies Electron Transfer in Anaerobic Digestion. 2018 , 11, 107		145
238	Recent achievements in enhancing anaerobic digestion with carbon-based functional materials. <i>Bioresource Technology</i> , 2018 , 266, 555-567	11	104
237	Year-round biogas production in sugarcane biorefineries: Process stability, optimization and performance of a two-stage reactor system. 2018 , 168, 188-199		13
236	Methane Production and Conductive Materials: A Critical Review. 2018 , 52, 10241-10253		182
235	Enhancing Biochemical Methane Potential and Enrichment of Specific Electroactive Communities from Nixtamalization Wastewater using Granular Activated Carbon as a Conductive Material. 2018 , 11, 2101		15
234	Enhanced methane recovery and exoelectrogen-methanogen evolution from low-strength wastewater in an up-flow biofilm reactor with conductive granular graphite fillers. 2018 , 12, 1		13

233	What kind of effects do FeO and AlO nanoparticles have on anaerobic digestion, inhibition or enhancement?. <i>Chemosphere</i> , 2018 , 211, 726-735	8.4	35
232	Enhancement of methanogenesis by electric syntrophy with biogenic iron-sulfide minerals. 2019 , 8, e00647		19
231	A Review of the Chemistry of Anaerobic Digestion: Methods of Accelerating and Optimizing Process Efficiency. 2019 , 7, 504		122
230	Impact of adding metal nanoparticles on anaerobic digestion performance - A review. <i>Bioresource Technology</i> , 2019 , 292, 121926	11	43
229	Enhanced biomethane recovery from fat, oil, and grease through co-digestion with food waste and addition of conductive materials. <i>Chemosphere</i> , 2019 , 236, 124362	8.4	33
228	Accelerated bio-methane production rate in thermophilic digestion of cardboard with appropriate biochar: Dose-response kinetic assays, hybrid synergistic mechanism, and microbial networks analysis. <i>Bioresource Technology</i> , 2019 , 290, 121782	11	32
227	Progress towards catalyzing electro-methanogenesis in anaerobic digestion process: Fundamentals, process optimization, design and scale-up considerations. <i>Bioresource Technology</i> , 2019 , 289, 121738	11	52
226	Techno-economic analysis of anaerobic digestion implementation in small Italian breweries and evaluation of biochar and granular activated carbon addition effect on methane yield. 2019 , 7, 103184		20
225	Effect of inoculum concentration on methanogenesis by direct interspecies electron transfer: Performance and microbial community composition. <i>Bioresource Technology</i> , 2019 , 291, 121881	11	15
224	A review of the effects of iron compounds on methanogenesis in anaerobic environments. 2019 , 113, 109282		37
223	Integrated food waste and sewage treatment - A better approach than conventional food waste-sludge co-digestion for higher energy recovery via anaerobic digestion. <i>Bioresource Technology</i> , 2019 , 289, 121698	11	36
222	Molecular and microbial insights towards understanding the anaerobic digestion of the wastewater from hydrothermal liquefaction of sewage sludge facilitated by granular activated carbon (GAC). 2019 , 133, 105257		43
221	Enhancing direct interspecies electron transfer in syntrophic-methanogenic associations with (semi)conductive iron oxides: Effects and mechanisms. <i>Science of the Total Environment</i> , 2019 , 695, 133876	10.2	55
220	Enhanced methane production and syntrophic connection between microorganisms during semi-continuous anaerobic digestion of chicken manure by adding biochar. <i>Journal of Cleaner Production</i> , 2019 , 240, 118178	10.3	41
219	Biochar triggering multipath methanogenesis and subdued propionic acid accumulation during semi-continuous anaerobic digestion. <i>Bioresource Technology</i> , 2019 , 293, 122026	11	41
218	Achievements of biochar application for enhanced anaerobic digestion: A review. <i>Bioresource Technology</i> , 2019 , 292, 122058	11	75
217	A review on biochar-mediated anaerobic digestion with enhanced methane recovery. 2019 , 115, 109373		66
216	Improved biogas production of dry anaerobic digestion of swine manure. <i>Bioresource Technology</i> , 2019 , 294, 122188	11	21

215	Evaluating the effect of biochar on mesophilic anaerobic digestion of waste activated sludge and microbial diversity. <i>Bioresource Technology</i> , 2019 , 294, 122235	11	29
214	System performance and microbial community in ethanol-fed anaerobic reactors acclimated with different organic carbon to sulfate ratios. <i>Bioresource Technology</i> , 2019 , 278, 34-42	11	18
213	Shaping microbial communities with conductive carbon fibers to enhance methane productivity and kinetics. <i>Bioresource Technology Reports</i> , 2019 , 5, 20-27	4.1	14
212	Enhanced mesophilic anaerobic digestion of waste sludge with the iron nanoparticles addition and kinetic analysis. <i>Science of the Total Environment</i> , 2019 , 683, 124-133	10.2	41
211	Improving anaerobic digestion via direct interspecies electron transfer requires development of suitable characterization methods. 2019 , 57, 183-190		64
210	New insights into the effect of direct interspecies electron transfer on syntrophic methanogenesis through thermodynamic analysis. <i>Bioresource Technology Reports</i> , 2019 , 7, 100225	4.1	8
209	Powdered biochar doubled microbial growth in anaerobic digestion of oil. 2019 , 247, 605-614		52
208	Mesophilic anaerobic co-digestion of acorn slag waste with dairy manure in a batch digester: Focusing on mixing ratios and bio-based carbon accelerants. <i>Bioresource Technology</i> , 2019 , 286, 121394	11	44
207	Application of nano-structured materials in anaerobic digestion: Current status and perspectives. <i>Chemosphere</i> , 2019 , 229, 188-199	8.4	59
206	Magnetite doped granular activated carbon as an additive for high-performance anaerobic digestion. 2019 , 2, 377-384		8
205	Weak magnetic field significantly enhances methane production from a digester supplemented with zero valent iron. <i>Bioresource Technology</i> , 2019 , 282, 202-210	11	22
204	Upgrading continuous H ₂ gas recovery from rice straw hydrolysate via fermentation process amended with magnetite nanoparticles. 2019 , 43, 3516-3527		21
203	Comparative effects of GAC addition on methane productivity and microbial community in mesophilic and thermophilic anaerobic digestion of food waste. 2019 , 146, 79-87		58
202	Enhanced Anaerobic Digestion of Swine Manure by the Addition of Zero-Valent Iron. 2019 , 33, 12441-12449		13
201	Effects of different types of biochar on the anaerobic digestion of chicken manure. <i>Bioresource Technology</i> , 2019 , 275, 258-265	11	101
200	Enhancing the performance and stability of the anaerobic digestion of sewage sludge by zero valent iron nanoparticles dosage. <i>Bioresource Technology</i> , 2019 , 275, 352-359	11	37
199	Synergistic effect of alkaline pretreatment and magnetite nanoparticle application on biogas production from rice straw. <i>Bioresource Technology</i> , 2019 , 275, 288-296	11	49
198	Hydrogen-based syntrophy in an electrically conductive biofilm anode. <i>Chemical Engineering Journal</i> , 2019 , 359, 208-216	14.7	20

197	A review of biochar properties and their roles in mitigating challenges with anaerobic digestion. 2019 , 103, 291-307		124
196	A short-term stimulation of ethanol enhances the effect of magnetite on anaerobic digestion. 2019 , 103, 1511-1522		17
195	Effects of conductive carbon materials on dry anaerobic digestion of sewage sludge: Process and mechanism. 2020 , 384, 121339		18
194	Influence of a Conductive Material and Different Anaerobic Inocula on Biochemical Methane Potential of Substrates from Alcoholic Beverage Production. 2020 , 11, 5957-5964		5
193	Biogas production and microbial community structure in a stable-stage of a two-stage anaerobic digester. 2020 , 66, e16807		6
192	Investigation of the effects of different conductive materials on the anaerobic digestion. 2020 , 17, 473-482		9
191	Effects of biochar and activated carbon on biogas generation: A thermogravimetric and chemical analysis approach. 2020 , 203, 112221		26
190	Adding carbon-based materials on anaerobic digestion performance: A mini-review. <i>Bioresource Technology</i> , 2020 , 300, 122696	11	32
189	Conductive materials in anaerobic digestion: From mechanism to application. <i>Bioresource Technology</i> , 2020 , 298, 122403	11	68
188	Anaerobic Membrane Bioreactors for Nonpotable Water Reuse and Energy Recovery. 2020 , 146, 03119002		20
187	Temperature-dependent (2015) electrocatalytic characteristics during ethanol/propionate degradation by methanogenic communities grown on conductive carbon fibers. <i>Chemical Engineering Journal</i> , 2020 , 391, 123566	14.7	11
186	A critical review of conventional and emerging methods for improving process stability in thermophilic anaerobic digestion. 2020 , 54, 72-84		45
185	Syntrophus conductive pili demonstrate that common hydrogen-donating syntrophs can have a direct electron transfer option. 2020 , 14, 837-846		61
184	Review of biochar role as additive in anaerobic digestion processes. 2020 , 131, 110037		66
183	An overview of complementary microbial electrochemical technologies for advancing anaerobic digestion. 2020 , 5, 129-167		5
182	Biogas and methane production efficiency of sewage sludge supplemented with conductive materials. 2020 , 20, 353		0
181	Sparking Anaerobic Digestion: Promoting Direct Interspecies Electron Transfer to Enhance Methane Production. 2020 , 23, 101794		44
180	Microbial electrochemical production of energy and value-added chemicals from agri-food wastewater. 2020 , 355-372		

179	Inhibition mitigation of methanogenesis processes by conductive materials: A critical review. <i>Bioresource Technology</i> , 2020 , 317, 123977	11	25
178	Zerovalent Iron Effectively Enhances Medium-Chain Fatty Acids Production from Waste Activated Sludge through Improving Sludge Biodegradability and Electron Transfer Efficiency. 2020 , 54, 10904-10915		33
177	Graphene Addition to Digestion of Thin Stillage Can Alleviate Acidic Shock and Improve Biomethane Production. 2020 , 8, 13248-13260		19
176	Valorization of the liquid fraction of co-hydrothermal carbonization of mixed biomass by anaerobic digestion: Effect of the substrate to inoculum ratio and hydrochar addition. <i>Bioresource Technology</i> , 2020 , 317, 123989	11	13
