Version: 2024-04-27

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

- 30 A bidirectional Mendelian randomized study of classical blood lipids and venous thrombosis. **2023**, 13, ○
- 29 A genome-wide association study of frailty identifies significant genetic correlation with neuropsychiatric, cardiovascular, and inflammation pathways. ○
- 28 Proteogenomic integration reveals CXCL10 as a potentially downstream causal mediator for IL-6 signaling on atherosclerosis. ○
- 27 Mendelian randomization analyses reveal causal relationships between the human microbiome and longevity. **2023**, 13, ○
- 26 Atopic dermatitis and risk of 14 site-specific cancers: a Mendelian randomization study. ○
- 25 Effects of major depression and bipolar disorder on erectile dysfunction: a two-sample mendelian randomization study. **2023**, 16, ○

- 24 Associations between body circumference and testosterone levels and risk of metabolic dysfunction-associated fatty liver disease: a mendelian randomization study. **2023**, 23, ○
- 23 Causal effects of gut microbiota on the risk of chronic kidney disease: a Mendelian randomization study. 13, ○
- 22 The association of modifiable risk factors and diabetic retinopathy: A Mendelian randomization study. ○
- 21 Associations between health behaviours, fertility and reproductive outcomes: triangulation of evidence in the Norwegian Mother, Father and Child Cohort Study (MoBa). **2023**, 21, ○
- 20 Causal effect of adiposity on the risk of 19 gastrointestinal diseases: a Mendelian randomization study. ○
- 19 Effects of heart failure and coronary artery disease on erectile dysfunction: a two-sample Mendelian randomization study. ○
- 18 Causal association between obstructive sleep apnea and gastroesophageal reflux disease: A bidirectional two-sample Mendelian randomization study. 14, ○
- 17 Kidney function may partially mediated the protective effect of urinary uromodulin on kidney stone. **2023**, 51, ○
- 16 Trans-ethnic Mendelian randomization study of systemic lupus erythematosus and common female hormone-dependent malignancies. Publish Ahead of Print, ○
- 15 CARE: a novel wearable-derived feature linking circadian amplitude to human cognitive functions. ○
- 14 Bias correction for inverse variance weighting Mendelian randomization. ○
- 13 Blood cell traits and risk of glaucoma: A two-sample mendelian randomization study. 14, ○
- 12 Application of Mendelian randomization to explore the causal role of the human gut microbiome in colorectal cancer. **2023**, 13, ○
- 11 A Mendelian randomization study on the association of bone mineral density with periodontitis. ○
- 10 The relationship between major depression and migraine: A bidirectional two-sample Mendelian randomization study. 14, ○
- 9 Inflammatory bowel disease is causally related to irritable bowel syndrome: a bidirectional two-sample Mendelian randomization study. 10, ○
- 8 Immune-mediated inflammatory diseases and leukocyte telomere length: A Mendelian randomization study. 14, ○
- 7 Investigating the causal interplay between sleep traits and risk of acute myocardial infarction: a Mendelian randomization study. ○

- 6 Causal Relations Between Obstructive Sleep Apnea and Stroke: A Mendelian Randomization Study. Volume 15, 257-266
- 5 Macronutrients and Lung carcinoma: a Bidirectional Mendelian Randomization Study.
- 4 Genome-wide cross-trait analysis and Mendelian randomization reveal a shared genetic etiology and causality between COVID-19 and venous thromboembolism. **2023**, 6,
- 3 Understanding the relationship between loneliness, substance use traits and psychiatric disorders: a genetically informed approach. **2023**, 115218
- 2 Multisite Pain and Myocardial Infarction and Stroke. **2023**, 100295
- 1 Genetic associations of leisure sedentary behaviors and the risk of 15 site-specific cancers: A Mendelian randomization study.
