Democratic joint operations algorithm for optimal power extraction strategy under energy conversion system

Citation Report

#	ARTICLE	IF	CITATIONS
1	Optimal Passive PID Controller of PMSG for Maximum Power Point Tracking via Interactive Teaching-learning Optimizer. , 2018, , .		1
2	Review on control techniques and methodologies for maximum power extraction from wind energy systems. IET Renewable Power Generation, 2018, 12, 1609-1622.	1.7	70
3	A Modified RBF Neuro-Sliding Mode Control Technique for a Grid Connected PMSG Based Variable Speed Wind Energy Conversion System. Journal of Control Science and Engineering, 2018, 2018, 1-19.	0.8	3
4	Creativity and Artificial Intelligence: A Digital Art Perspective. SSRN Electronic Journal, 0, , .	0.4	5
5	Smoothly Transitive Fixed Frequency Hysteresis Current Control Based on Optimal Voltage Space Vector. Energies, 2018, 11, 1695.	1.6	0
6	Energy reshaping based passive fractional-order PID control design and implementation of a grid-connected PV inverter for MPPT using grouped grey wolf optimizer. Solar Energy, 2018, 170, 31-46.	2.9	62
7	Perturbation observer based fractional-order PID control of photovoltaics inverters for solar energy harvesting via Yin-Yang-Pair optimization. Energy Conversion and Management, 2018, 171, 170-187.	4.4	70
8	Passivity-based fractional-order sliding-mode control design and implementation of grid-connected photovoltaic systems. Journal of Renewable and Sustainable Energy, 2018, 10, .	0.8	15
9	Passivityâ€based linear feedback control of permanent magnetic synchronous generatorâ€based wind energy conversion system: design and analysis. IET Renewable Power Generation, 2018, 12, 981-991.	1.7	31
10	Voltage Distributionâ€"Based Fault Location for Half-Wavelength Transmission Line with Large-Scale Wind Power Integration in China. Energies, 2018, 11, 593.	1.6	6
11	Adaptive fractional-order PID control of PMSG-based wind energy conversion system for MPPT using linear observers. International Transactions on Electrical Energy Systems, 2019, 29, e2697.	1.2	54
12	PCSMC design of permanent magnetic synchronous generator for maximum power point tracking. IET Generation, Transmission and Distribution, 2019, 13, 3115-3126.	1.4	31
13	Modified linear active disturbance rejection control for microgrid inverters: Design, analysis, and hardware implementation. International Transactions on Electrical Energy Systems, 2019, 29, e12060.	1.2	4
14	Improved Mode-Adaptive Droop Control Strategy for the DC Microgrid. IEEE Access, 2019, 7, 86421-86435.	2.6	27
15	Optimization based higher order sliding mode controller for efficiency improvement of a wave energy converter. Energy, 2019, 187, 116111.	4.5	14
17	Quantitative Feedback Theory design of robust MPPT controller for Small Wind Energy Conversion Systems: Design, analysis and experimental study. Sustainable Energy Technologies and Assessments, 2019, 35, 308-320.	1.7	10
18	A hybrid MWOAL approach for fast and efficient maximum power point tracking in wind energy conversion systems. Journal of Renewable and Sustainable Energy, 2019, 11, .	0.8	11
19	Adaptive deep dynamic programming for integrated frequency control of multi-area multi-microgrid systems. Neurocomputing, 2019, 344, 49-60.	3.5	34

20	D, Q reference frames for the simulation of multiphase (six phase) wound rotor induction generator driven by a wind turbine for disperse generation. IET Electric Power Applications, 2019, 13, 1823-1834.	1.1	12
21	A Comprehensive Review of Traditional and Smart MPPT Techniques in PMSG based Wind Energy Conversion System. , 2019, , .		5
22	An efficient variable-step P&O maximum power point tracking technique for grid-connected wind energy conversion system. SN Applied Sciences, 2019, 1, 1.	1.5	22
23	Advanced multi-sector P&O maximum power point tracking technique for wind energy conversion system. International Journal of Electrical Power and Energy Systems, 2019, 107, 89-97.	3.3	55
24	Novel bio-inspired memetic salp swarm algorithm and application to MPPT for PV systems considering partial shading condition. Journal of Cleaner Production, 2019, 215, 1203-1222.	4.6	313
25	Variable step size P&O MPPT algorithm for optimal power extraction of multi-phase PMSG based wind generation system. International Journal of Electrical Power and Energy Systems, 2019, 108, 218-231.	3.3	107
26	Dynamic leader based collective intelligence for maximum power point tracking of PV systems affected by partial shading condition. Energy Conversion and Management, 2019, 179, 286-303.	4.4	206
27	An Accelerated *Physarum* Solver for Network Optimization. IEEE Transactions on Cybernetics, 2020, 50, 765-776.	6.2	13
28	Optimal power extraction control schemes for five-phase PMSG based wind generation systems. Engineering Science and Technology, an International Journal, 2020, 23, 144-155.	2.0	23
29	A review of applications of artificial intelligent algorithms in wind farms. Artificial Intelligence Review, 2020, 53, 3447-3500.	9.7	86
30	Output power quality enhancement of PMSG with fractional order sliding mode control. International Journal of Electrical Power and Energy Systems, 2020, 115, 105402.	3.3	66
31	Fast Atom Search Algorithm for Reactive Power Optimization of Power Grid with High-Penetration Wind and Solar Energies. Mathematical Problems in Engineering, 2020, 2020, 1-15.	0.6	1
32	Multi-objective output feedback control strategy for a variable speed wind energy conversion system. International Journal of Electrical Power and Energy Systems, 2020, 121, 106081.	3.3	38
33	Enhancing the dynamic performance of a wind-driven PMSG implementing different optimization techniques. SN Applied Sciences, 2020, 2, 1.	1.5	23
34	Design of thermal wind sensor with constant power control and wind vector measurement method. PLoS ONE, 2020, 15, e0231405.	1.1	2
35	A novel unified maximum power extraction framework for PMSG based WECS using chaotic particle swarm optimization derivatives. Engineering Science and Technology, an International Journal, 2021, 24, 158-170.	2.0	18
36	Adaptive distributed auction-based algorithm for optimal mileage based AGC dispatch with high participation of renewable energy. International Journal of Electrical Power and Energy Systems, 2021, 124, 106371.	3.3	78
37	Optimum Controller Design Using the Ant Lion Optimizer for PMSG Driven by Wind Energy. Journal of Electrical Engineering and Technology, 2021, 16, 367-380.	1.2	7

#	Article	IF	Citations
38	Organic Rankine Cycle based waste heat recovery modeling and control of the low pressure side using direct condensation and dedicated fans. Energy, 2021, 216, 119074.	4.5	8
39	A novel LMSRE-based adaptive PI control scheme for grid-integrated PMSG-based variable-speed wind turbine. International Journal of Electrical Power and Energy Systems, 2021, 125, 106505.	3.3	41
40	Sliding mode controller design for frequency regulation in an interconnected power system. Protection and Control of Modern Power Systems, 2021, 6, .	4.3	29
41	Offshore Wind Energy Integration using Photovoltaic Systems and Batteries as Smoothing Devices. EEA - Electrotehnica, Electronica, Automatica, 2021, 69, 13-20.	0.2	1
42	<scp>Levenberg–Marquardt</scp> backpropagation algorithm for parameter identification of solid oxide fuel cells. International Journal of Energy Research, 2021, 45, 17903-17923.	2.2	17
43	Robust Adaptive HCS MPPT Algorithm-Based Wind Generation System Using Model Reference Adaptive Control. Sensors, 2021, 21, 5187.	2.1	9
44	Classification, summarization and perspectives on state-of-charge estimation of lithium-ion batteries used in electric vehicles: A critical comprehensive survey. Journal of Energy Storage, 2021, 39, 102572.	3.9	60
45	Predictive permanent magnet synchronous generator based small-scale wind energy system at dynamic wind speed analysis for residential net-zero energy building. Malaysian Journal of ELT Research, 2021, 3, 29-49.	0.1	2
46	Voltage and Frequency Stability Enhancement of Islanded Network. , 2021, , .		0
47	Modified golden section search based MPPT algorithm for the WECS. Engineering Science and Technology, an International Journal, 2021, 24, 1123-1133.	2.0	7
48	Interacted collective intelligence based energy harvesting of centralized thermoelectric generation systems under non-uniform temperature gradient. Sustainable Energy Technologies and Assessments, 2021, 48, 101600.	1.7	5
49	Adaptive fixed-time sensorless maximum power point tracking control scheme for DFIG wind energy conversion system. International Journal of Electrical Power and Energy Systems, 2022, 135, 107424.	3.3	21
50	Assessment of proposed maximum power point tracking–unity power factor algorithms for optimum operation permanent magnet synchronous generator–based wind turbine. Wind Engineering, 2021, 45, 381-399.	1.1	3
51	Modified PID controller for automatic generation control of multi-source interconnected power system using fitness dependent optimizer algorithm. PLoS ONE, 2020, 15, e0242428.	1.1	25
52	Single Pole-to-Ground Fault Analysis of MMC-HVDC Transmission Lines Based on Capacitive Fuzzy Identification Algorithm. Energies, 2020, 13, 319.	1.6	10
53	Towards Enhancing the Performance of Grid-Tied VSWT via Adopting Sine Cosine Algorithm-Based Optimal Control Scheme. IEEE Access, 2021, 9, 139074-139088.	2.6	12
54	Enhanced Atom Search Optimization Based Optimal Control Parameter Tunning of PMSG for MPPT. Energy Engineering: Journal of the Association of Energy Engineers, 2022, 119, 145-161.	0.3	0
55	PMSG based WECS: Control techniques, MPPT methods and control strategies for standalone battery integrated system. AIP Conference Proceedings, 2022, , .	0.3	18
