

Theory, technology and prospects of conventional and u

Petroleum Exploration and Development

45, 604-618

DOI: [10.1016/s1876-3804\(18\)30066-1](https://doi.org/10.1016/s1876-3804(18)30066-1)

Citation Report

#	ARTICLE	IF	CITATIONS
1	Quantitative prediction of shale gas sweet spots based on seismic data in Lower Silurian Longmaxi Formation, Weiyuan area, Sichuan Basin, SW China. <i>Petroleum Exploration and Development</i> , 2018, 45, 422-430.	3.0	18
2	Lower limit of hydrocarbon generation in source rocks: A case study from the Dongpu Depression, Bohai Bay Basin, East China. <i>Journal of Asian Earth Sciences</i> , 2019, 182, 103928.	1.0	13
3	Evaluation of mass transfer coefficient for gas condensates in porous systems: Experimental and modeling. <i>Fuel</i> , 2019, 255, 115507.	3.4	14
4	The Feasibility Appraisal for CO ₂ Enhanced Gas Recovery of Tight Gas Reservoir: Experimental Investigation and Numerical Model. <i>Energies</i> , 2019, 12, 2225.	1.6	6
5	Underground coal gasification and its strategic significance to the development of natural gas industry in China. <i>Petroleum Exploration and Development</i> , 2019, 46, 205-215.	3.0	49
6	Resource types, formation, distribution and prospects of coal-measure gas. <i>Petroleum Exploration and Development</i> , 2019, 46, 451-462.	3.0	81
7	Formation of the primary petroleum reservoir in Wumaying inner buried-hill of Huanghua Depression, Bohai Bay Basin, China. <i>Petroleum Exploration and Development</i> , 2019, 46, 543-552.	3.0	12
8	“Exploring petroleum inside source kitchen” Connotation and prospects of source rock oil and gas. <i>Petroleum Exploration and Development</i> , 2019, 46, 181-193.	3.0	99
9	Impacts of lithologic characteristics and diagenesis on reservoir quality of the 4th member of the Upper Triassic Xujiahe Formation tight gas sandstones in the western Sichuan Basin, southwest China. <i>Marine and Petroleum Geology</i> , 2019, 107, 1-19.	1.5	28
10	Effects of wellbore interference on concurrent gas production from multi-layered tight sands: A case study in eastern Ordos Basin, China. <i>Journal of Petroleum Science and Engineering</i> , 2019, 179, 707-715.	2.1	16
11	Global Shale Revolution: Successes, Challenges, and Prospects. <i>Sustainability</i> , 2019, 11, 1627.	1.6	18
12	Correlation of absorption spectrum properties of methane with coupling variables between temperature and concentration. <i>Optik</i> , 2019, 185, 82-87.	1.4	3
13	Robotic System with Power Line Communication for In-pipe Inspection of Underground Urban Gas Pipeline. , 2019, , .		2
14	Geomechanics: historical contributions, current challenges and considerations on development for the new era. <i>Journal of Physics: Conference Series</i> , 2019, 1325, 012192.	0.3	0
15	Development characteristics and orientation of tight oil and gas in China. <i>Petroleum Exploration and Development</i> , 2019, 46, 1073-1087.	3.0	164
16	Theoretical insights, core technologies and practices concerning “volume development” of shale gas in China. <i>Natural Gas Industry B</i> , 2019, 6, 525-538.	1.4	12
17	Advances on enrichment law and key technologies of exploration and development of continental tight oil in China (2016-2018). <i>Journal of Natural Gas Geoscience</i> , 2019, 4, 297-307.	0.6	7
18	Reservoir Porosity Measurement Uncertainty and its Influence on Shale Gas Resource Assessment. <i>Acta Geologica Sinica</i> , 2020, 94, 233-242.	0.8	6
