

CITATION REPORT

List of articles citing

An epigenetic biomarker of aging for lifespan and healthspan

DOI: 10.18632/aging.101414
Aging, 2018, 10, 573-591.

Version: 2024-04-25

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

- 44 The Circulating Level of Klotho Is Not Dependent upon Physical Fitness and Age-Associated Methylation Increases at the Promoter Region of the Klotho Gene. **2023**, 14, 525 ○

- 43 DNA methylation as a powerful tool to investigate the biology and pathology of aging. **2022**, 14, 1541-1544 ○
- 42 Accelerated epigenetic aging in women with emotionally unstable personality disorder and a history of suicide attempts. **2023**, 13, ○
- 41 DNAmFitAge: biological age indicator incorporating physical fitness. ○
- 40 Epigenetics. **2023**, 123-145 ○
- 39 Higher testosterone and testosterone/estradiol ratio in men are associated with better epigenetic estimators of mortality risk. ○
- 38 Accelerated epigenetic aging in older adults with HIV disease: associations with serostatus, HIV clinical factors, and health literacy. ○
- 37 The Association of Physical Activity Behaviors and Patterns With Aging Acceleration: Evidence From the UKBiobank. ○
- 36 Refining epigenetic prediction of chronological and biological age. **2023**, 15, 1 ○
- 35 The Choice of Machine Learning Algorithms Impacts the Association between Brain-Predicted Age Difference and Cognitive Function. **2023**, 11, 1229 ○
- 34 Hypermethylation at CREBBP Is Associated with Cognitive Impairment in a Mexican American Cohort. **2023**, 92, 1229-1239 ○
- 33 ClockBase: a comprehensive platform for biological age profiling in human and mouse. ○
- 32 Development of a novel epigenetic clock resistant to changes in immune cell composition. ○
- 31 Development of a novel epigenetic clock resistant to changes in immune cell composition. ○
- 30 Data-driven representations using deep network-coherent methylation autoencoders to identify robust disease and risk factor signatures. ○
- 29 Epigenetic clocks and female fertility timeline: A new approach to an old issue?. 11, ○
- 28 Turning Back the Clock: A Retrospective Single-Blind Study on Brain Age Change in Response to Nutraceuticals Supplementation vs. Lifestyle Modifications. **2023**, 13, 520 ○
- 27 Epigenetic aging and PTSD outcomes in the immediate aftermath of trauma. 1-10 ○
- 26 Impact of age, antiretroviral therapy, and cancer on epigenetic aging in people living with HIV. ○

- 25 Associations of sleeping, sedentary and physical activity with phenotypic age acceleration: a cross-sectional isotemporal substitution model. **2023**, 23, ○
- 24 Pain interference mediates the association between epigenetic aging and grip strength in middle to older aged males and females with chronic pain. 15, ○
- 23 Epigenetic clocks in neurodegenerative diseases: a systematic review. jnnp-2022-330931 ○
- 22 Inclusion of epigenetic age acceleration in oncological trials. **2023**, ○
- 21 Ageing as a software design flaw. **2023**, 24, ○
- 20 Healthy lifestyle, DNA methylation age acceleration, and incident risk of coronary heart disease. **2023**, 15, ○
- 19 Distinguishable DNA methylation defines a cardiac-specific epigenetic clock. **2023**, 15, ○
- 18 Changes in Loneliness, BDNF, and Biological Aging Predict Trajectories in a Blood-Based Epigenetic Measure of Cortical Aging: A Study of Older Black Americans. **2023**, 14, 842 ○
- 17 Effects of epigenetic age acceleration on kidney function: a Mendelian randomization study. **2023**, 15, ○
- 16 Accelerated epigenetic aging and myopenia in young adult cancer survivors. ○
- 15 Physical activity is associated with slower epigenetic ageing—findings from the Rhineland study. ○
- 14 Birth size and the pace of aging in men. ○
- 13 60 years of healthy aging: On definitions, biomarkers, scores and challenges. **2023**, 88, 101934 ○
- 12 Transdiagnostic evaluation of epigenetic age acceleration and burden of psychiatric disorders. ○
- 11 Associations between cardiorespiratory fitness and lifestyle-related factors with DNA methylation-based aging clocks in older men: WASEDA Health Study. ○
- 10 The relationship of trait-like compassion with epigenetic aging: The population-based prospective Young Finns Study. 14, ○
- 9 Examining the immunoepigenetic-gut microbiome axis in the context of self-esteem among Native Hawaiians and other Pacific Islanders. 14, ○
- 8 Biomarkers of aging. ○

- 7 How can we modulate aging through nutrition and physical exercise? An epigenetic approach. ○
- 6 High-Intensity interval training reduces transcriptomic age: A randomized controlled trial. ○
- 5 Biological age is increased by stress and restored upon recovery. **2023**, ○
- 4 ADHD genetic burden associates with older epigenetic age: mediating roles of education, behavioral and sociodemographic factors among older adults. **2023**, 15, ○
- 3 Characterizing expression changes in noncoding RNAs during aging and heterochronic parabiosis across mouse tissues. ○
- 2 DNA methylation variations and epigenetic aging in telomere biology disorders. **2023**, 13, ○
- 1 Co-occurrence of injection drug use and hepatitis C increases epigenetic age acceleration that contributes to all-cause mortality among people living with HIV. **2023**, 18, ○
