

CITATION REPORT

List of articles citing

Pathogenesis and Cells of Origin of Barrett's Esophagus

DOI: 10.1053/j.gastro.2019.03.072

Gastroenterology, 2019, 157, 349-364.e1.

Source: <https://exaly.com/paper-pdf/72250326/citation-report.pdf>

Version: 2024-04-27

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
92	New evidence defining the pathology and pathogenesis of lower esophageal sphincter damage. <i>European Surgery - Acta Chirurgica Austriaca</i> , 2019 , 51, 282-290	0.9	4
91	Approach to the Post-Ablation Barrett's Esophagus Patient. <i>American Journal of Gastroenterology</i> , 2020 , 115, 823-831	0.7	11
90	High Content Imaging of Barrett's-Associated High-Grade Dysplasia Cells After siRNA Library Screening Reveals Acid-Responsive Regulators of Cellular Transitions. <i>Cellular and Molecular Gastroenterology and Hepatology</i> , 2020 , 10, 601-622	7.9	1
89	Screening for Barrett's oesophagus: are we looking for the right thing?. <i>Gut</i> , 2020 ,	19.2	1
88	Role of metaplasia during gastric regeneration. <i>American Journal of Physiology - Cell Physiology</i> , 2020 , 319, C947-C954	5.4	7
87	The cellular origins of cancer with particular reference to the gastrointestinal tract. <i>International Journal of Experimental Pathology</i> , 2020 , 101, 132-151	2.8	5
86	Weak acids induce PGE production in human oesophageal cells: novel mechanisms underlying GERD symptoms. <i>Scientific Reports</i> , 2020 , 10, 20775	4.9	1
85	Evidence for Cytoprotective Effect of Carbon Monoxide Donor in the Development of Acute Esophagitis Leading to Acute Esophageal Epithelium Lesions. <i>Cells</i> , 2020 , 9,	7.9	9
84	In Barrett's epithelial cells, weakly acidic bile salt solutions cause oxidative DNA damage with response and repair mediated by p38. <i>American Journal of Physiology - Renal Physiology</i> , 2020 , 318, G464-G478	5.1	4
83	New insights into the functions of Cox-2 in skin and esophageal malignancies. <i>Experimental and Molecular Medicine</i> , 2020 , 52, 538-547	12.8	18
82	Clinical course of gastroesophageal reflux disease and impact of treatment in symptomatic young patients. <i>Annals of the New York Academy of Sciences</i> , 2020 , 1481, 117-126	6.5	4
81	Gastroesophageal reflux after per-oral endoscopic myotomy is frequently asymptomatic, but leads to more severe esophagitis: A case-control study. <i>United European Gastroenterology Journal</i> , 2021 , 9, 63-71	5.3	5
80	DDIT4 Licenses Only Healthy Cells to Proliferate During Injury-induced Metaplasia. <i>Gastroenterology</i> , 2021 , 160, 260-271.e10	13.3	19
79	Best Practices in Surveillance for Barrett's Esophagus. <i>Gastrointestinal Endoscopy Clinics of North America</i> , 2021 , 31, 59-75	3.3	4
78	Chaperones and Ubiquitin Ligases Balance Mutant p53 Protein Stability in Esophageal and Other Digestive Cancers. <i>Cellular and Molecular Gastroenterology and Hepatology</i> , 2021 , 11, 449-464	7.9	1
