Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
279	On the mass segregation of cores and stars. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019 , 490, 350-358	4.3	2
278	Young star cluster populations in the E-MOSAICS simulations. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019 , 490, 1714-1733	4.3	22
277	Global hierarchical collapse in molecular clouds. Towards a comprehensive scenario. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019 , 490, 3061-3097	4.3	76
276	The life cycle of the Central Molecular Zone II. Inflow, star formation, and winds. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019 , 490, 4401-4418	4.3	34
275	Modeling UV Radiation Feedback from Massive Stars. III. Escape of Radiation from Star-forming Giant Molecular Clouds. 2019 , 883, 102		25
274	The young stellar population of the metal-poor galaxy NGC 6822. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019 , 490, 832-847	4.3	4
273	A model for the minimum mass of bound stellar clusters and its dependence on the galactic environment. <i>Monthly Notices of the Royal Astronomical Society</i> , 2019 , 488, 3972-3994	4.3	12
272	Star Clusters in the Galactic tidal field, from birth to dissolution. 2019 , 14, 507-511		1
271	In the Galactic Disk, Stellar [Fe/H] and Age Predict Orbits and Precise [X/Fe]. 2019 , 883, 177		27
270	The Role of Magnetic Fields in Protostellar Outflows and Star Formation. 2019 , 6,		25
269	Discovery of a 21 Myr old stellar population in the Orion complex. 2019 , 631, A166		14
268	IRAS 09002-4732: A Laboratory for the Formation of Rich Stellar Clusters. <i>Astronomical Journal</i> , 2019 , 158, 235	4.9	1
267	Prevalent externally driven protoplanetary disc dispersal as a function of the galactic environment. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 491, 903-922	4.3	22
266	The lifecycle of molecular clouds in nearby star-forming disc galaxies. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 493, 2872-2909	4.3	105
265	On the Rate of Neutron Star Binary Mergers from Globular Clusters. <i>Astrophysical Journal Letters</i> , 2020 , 888, L10	7.9	62
264	Measuring the mixing scale of the ISM within nearby spiral galaxies. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 499, 193-209	4.3	24
263	Stellar clustering shapes the architecture of planetary systems. 2020 , 586, 528-532		25

262	Nuclear star clusters. 2020 , 28, 1		80
261	The role of galactic dynamics in shaping the physical properties of giant molecular clouds in Milky Way-like galaxies. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 498, 385-429	4-3	16
260	Quantifying the effects of spatial resolution and noise on galaxy metallicity gradients. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 495, 3819-3838	4-3	9
259	Can magnetized turbulence set the mass scale of stars?. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 496, 5072-5088	4-3	15
258	warpfield population synthesis: the physics of (extra-)Galactic star formation and feedback-driven cloud structure and emission from sub-to-kpc scales. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 498, 3193-3214	4-3	12
257	The effect of photoionizing feedback on the shaping of hierarchically-forming stellar clusters. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 499, 668-680	4-3	13
256	Distribution and kinematics of Al in the Galactic disc. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 497, 2442-2454	4-3	7
255	Star cluster formation and cloud dispersal by radiative feedback: dependence on metallicity and compactness. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 497, 3830-3845	4-3	19
254	Factories of CO-dark gas: molecular clouds with limited star formation efficiencies by far-ultraviolet feedback. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 497, 5061-5075	4-3	2
253	Kinematic modelling of clusters with Gaia: the death throes of the Hyades. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 498, 1920-1938	4-3	7
252	Star cluster formation in the most extreme environments: insights from the HiPEEC survey. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 499, 3267-3294	4-3	17
251	The VISCACHA survey III. Structure of star clusters in the Magellanic Clouds periphery. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 498, 205-222	4-3	8
250	Ejective and preventative: the IllustrisTNG black hole feedback and its effects on the thermodynamics of the gas within and around galaxies. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 499, 768-792	4-3	43
249	Towards studying hierarchical assembly in real time: a Milky Way progenitor galaxy at $z \approx 1.36$ under the microscope. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 493, 5653-5661	4-3	5
248	The SAMI galaxy survey: gas velocity dispersions in low-z star-forming galaxies and the drivers of turbulence. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 495, 2265-2284	4-3	17
247	The Physics of Star Cluster Formation and Evolution. 2020 , 216, 1		24
246	Physical Processes in Star Formation. 2020 , 216, 1		22
245	Clusters and mirages: cataloguing stellar aggregates in the Milky Way. 2020 , 633, A99		77

244	The Origin of the Stellar Mass Distribution and Multiplicity. 2020 , 216, 1		16
243	A catalogue of open cluster radii determined from Gaia proper motions. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 495, 2882-2893	4-3	3
242	A New Moving Group in the Local Arm. <i>Astronomical Journal</i> , 2020 , 159, 196	4-9	
241	Contribution from stars stripped in binaries to cosmic reionization of hydrogen and helium. 2020 , 634, A134		19
240	Star Clusters Near and Far. 2020 , 216, 1		33
239	The Molecular Cloud Lifecycle. 2020 , 216, 50		46
238	From Diffuse Gas to Dense Molecular Cloud Cores. 2020 , 216, 1		15
237	The Blue Compact Dwarf Galaxy VCC 848 Formed by DwarfDwarf Merging. <i>Astrophysical Journal Letters</i> , 2020 , 891, L23	7-9	8
236	Impact of Low-Energy Cosmic Rays on Star Formation. 2020 , 216, 1		34
235	LEGUS and H ₂ LEGUS Observations of Star Clusters in NGC 4449: Improved Ages and the Fraction of Light in Clusters as a Function of Age. 2020 , 889, 154		18
234	Carina's pillars of destruction: the view from ALMA. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 491, 178-200	4-3	3
233	Multiscale dynamics in star-forming regions: the interplay between gravity and turbulence. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 491, 4310-4324	4-3	11
232	A census of the nearby Pisces-Eridanus stellar stream. 2020 , 638, A9		11
231	The universal acceleration scale from stellar feedback. 2020 , 496, L127-L132		4
230	Discovery and astrophysical properties of Galactic open clusters in dense stellar fields using Gaia DR2. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 496, 2021-2038	4-3	17
229	The Forgotten Quadrant Survey. 2020 , 633, A147		6
228	How do bound star clusters form?. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 494, 624-641	4-3	17
227	Cool outflows in galaxies and their implications. 2020 , 28, 1		115

226	On the turbulence driving mode of expanding H II regions. <i>Monthly Notices of the Royal Astronomical Society</i> , 2020 , 493, 4643-4656	4-3	7
225	Star cluster classification in the PHANGS-BIST survey: Comparison between human and machine learning approaches. <i>Monthly Notices of the Royal Astronomical Society</i> ,	4-3	7
224	A precise asteroseismic age and metallicity for HD 139614: a pre-main-sequence star with a protoplanetary disc in Upper Centaurus-Lupus. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 502, 1633-1646	4-3	15
223	OUP accepted manuscript. <i>Monthly Notices of the Royal Astronomical Society</i> ,	4-3	5
222	Extended stellar systems in the solar neighborhood. 2021 , 645, A84		23
221	The GALAH survey: tracing the Galactic disc with open clusters. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 503, 3279-3296	4-3	23
220	ML-MOC: Machine Learning (kNN and GMM) based Membership determination for Open Clusters. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 502, 2582-2599	4-3	14
219	Reconstructing three-dimensional densities from two-dimensional observations of molecular gas. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 502, 5997-6009	4-3	2
218	Effects of initial density profiles on massive star cluster formation in giant molecular clouds. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 502, 6157-6169	4-3	7
217	A Comparison of Star-forming Clumps and Tidal Tails in Local Mergers and High-redshift Galaxies. 2021 , 908, 121		3
216	The Young Massive Star Cluster Westerlund 2 Observed with MUSE. III. A Cluster in Motion—the Complex Internal Dynamics. <i>Astronomical Journal</i> , 2021 , 161, 140	4-9	1
215	A spectroscopically confirmed Gaia-selected sample of 318 new young stars within ~200 pc. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 503, 938-952	4-3	1
214	STARFORGE: the effects of protostellar outflows on the IMF. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 502, 3646-3663	4-3	17
213	Stellar Feedback on the Earliest Stage of Massive Star Formation. 2021 , 907, 106		0
212	Galactic seismology: the evolving phase spiral after the Sagittarius dwarf impact. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 504, 3168-3186	4-3	18
211	Shocks and Molecules in Diffuse Interstellar Cloud Pairs. 2021 , 909, 71		0
210	Warm millimetre dust in protoplanetary discs near massive stars. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 503, 4172-4182	4-3	4
209	Sustaining Star Formation in the Galactic Star Cluster M 36?. 2021 , 910, 80		0

208	First Phase Space Portrait of a Hierarchical Stellar Structure in the Milky Way. 2021 , 909, 90		10
207	Stellar-mass black holes in young massive and open stellar clusters IV. comparisons with LIGO-Virgo merger rate densities. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 503, 3371-3385	4.3	9
206	Looking for Obscured Young Star Clusters in NGC 1313. 2021 , 909, 121		7
205	Feedback in Forming Star Clusters: The Mass-Radius Relation and Mass Function of Molecular Clumps in the Large Magellanic Cloud. 2021 , 911, 8		2
204	Fast Optical Transients from Stellar-mass Black Hole Tidal Disruption Events in Young Star Clusters. 2021 , 911, 104		8
203	The contribution of globular clusters to cosmic reionization. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 504, 4062-4071	4.3	3
202	Dynamical masses and mass-to-light ratios of resolved massive star clusters III. Results for 26 star clusters in the Magellanic Clouds. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 504, 4160-4194	4.3	4
201	Outflows from Super Star Clusters in the Central Starburst of NGC 253. 2021 , 912, 4		8
200	Star Formation Efficiency and Dispersal of Giant Molecular Clouds with UV Radiation Feedback: Dependence on Gravitational Boundedness and Magnetic Fields. 2021 , 911, 128		19
199	STARFORGE: Towards a comprehensive numerical model of star cluster formation and feedback. <i>Monthly Notices of the Royal Astronomical Society</i> ,	4.3	22
198	Revisiting Attenuation Curves: The Case of NGC 3351*. 2021 , 913, 37		4
197	The Single-cloud Star Formation Relation. <i>Astrophysical Journal Letters</i> , 2021 , 912, L19	7.9	12
196	Supersonic turbulence in giant HII regions: clues from 30 Doradus. 2021 , 649, A175		2
195	SIRIUS project. II. A new tree-direct hybrid code for smoothed particle hydrodynamics/N-body simulations of star clusters. 2021 , 73, 1057-1073		4
194	3D core kinematics of NGC 6362: central rotation in a dynamically evolved globular cluster. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 506, 813-823	4.3	6
193	SIRIUS project. I. Star formation models for star-by-star simulations of star clusters and galaxy formation. 2021 , 73, 1036-1056		6
192	Disentangled Representation Learning for Astronomical Chemical Tagging. 2021 , 913, 12		4
191	Undetected Binary Stars Cause an Observed Mass-dependent Age Gradient in Upper Scorpius. 2021 , 912, 137		11

190	Efficiently Cooled Stellar Wind Bubbles in Turbulent Clouds. I. Fractal Theory and Application to Star-forming Clouds. 2021 , 914, 89		14
189	SIRIUS project. III. Star-by-star simulations of star cluster formation using a direct N-body integrator with stellar feedback. 2021 , 73, 1074-1099		4
188	Studying the ISM at ~10 pc scale in NGC 7793 with MUSE. 2021 , 650, A103		4
187	Star formation scaling relations at ~100 pc from PHANGS: Impact of completeness and spatial scale. 2021 , 650, A134		14
186	Efficiently Cooled Stellar Wind Bubbles in Turbulent Clouds. II. Validation of Theory with Hydrodynamic Simulations. 2021 , 914, 90		13
185	The filamentary structures in the CO emission toward the Milky Way disk.		1
184	Constraining the formation of NGC 1052-DF2 from its unusual globular cluster population. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 506, 4841-4854	4-3	10
183	Testing the chemical homogeneity of chemically tagged dissolved birth clusters. <i>Monthly Notices of the Royal Astronomical Society</i> ,	4-3	3
182	Radiation hydrodynamics simulations of massive star cluster formation in giant molecular clouds. <i>Monthly Notices of the Royal Astronomical Society</i> ,	4-3	4
181	A model for the formation of stellar associations and clusters from giant molecular clouds. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 506, 3239-3258	4-3	16
180	Stars with Photometrically Young Gaia Luminosities Around the Solar System (SPYGLASS). I. Mapping Young Stellar Structures and Their Star Formation Histories. 2021 , 917, 23		11
179	The (im)possibility of strong chemical tagging.		2
178	STEP survey III. Structural analysis of 170 star clusters in the SMC. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 507, 3312-3330	4-3	2
177	Bound mass of Dehnen models with a centrally peaked star formation efficiency.		0
176	Touching the Stars: Using High-resolution 3D Printing to Visualize Stellar Nurseries. <i>Astrophysical Journal Letters</i> , 2021 , 918, L3	7-9	0
175	The dependence of the hierarchical distribution of star clusters on galactic environment. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 507, 5542-5566	4-3	1
174	On the initial mass-radius relation of stellar clusters. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 507, 5492-5506	4-3	3
173	Quantifying stochasticity-driven uncertainties in H ii region metallicities. <i>Monthly Notices of the Royal Astronomical Society</i> ,	4-3	

172	Study of the open cluster Alessi-Teutsch 9 (ASCC 10) using multiband photometry and Gaia EDR3. 2021 , 366, 1		0
171	Decoding the morphological evolution of open clusters.		1
170	Microarcsecond Astrometry: Science Highlights from Gaia. <i>Annual Review of Astronomy and Astrophysics</i> , 2021 , 59, 59-115	31.7	6
169	The impact of pre-supernova feedback and its dependence on environment. <i>Monthly Notices of the Royal Astronomical Society</i> ,	4.3	3
168	PHANGSHIST: star cluster spectral energy distribution fitting with cigale. <i>Monthly Notices of the Royal Astronomical Society</i> , 2021 , 502, 1366-1385	4.3	10
167	The Phoenix stellar stream rose from the ashes of an ancient star cluster. 2020 , 583, 687-688		2
