

CITATION REPORT

List of articles citing

Dissecting racial bias in an algorithm used to manage the health of populations

DOI: 10.1126/science.aax2342
Science, 2019, 366, 447-453.

Source: <https://exaly.com/paper-pdf/72536340/citation-report.pdf>

Version: 2024-04-23

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

- 61 The future(s) of unpaid work: How susceptible do experts from different backgrounds think the domestic sphere is to automation?. **2023**, 18, e0281282 ○
- 60 Practical, epistemic and normative implications of algorithmic bias in healthcare artificial intelligence: a qualitative study of multidisciplinary expert perspectives. jme-2022-108850 ○
- 59 A framework to identify ethical concerns with ML-guided care workflows: a case study of mortality prediction to guide advance care planning. **2023**, 30, 819-827 1
- 58 Development and Multi-Site External Validation of a Generalizable Risk Prediction Model for Bipolar Disorder. ○
- 57 Artificial Intelligence Systems Assisting in the Assessment of the Course and Retention of Orthodontic Treatment. **2023**, 11, 683 1
- 56 Obstacles to effective model deployment in healthcare. ○
- 55 Substance, discourse, and practice: a review of communication research on automation. 1-31 ○
- 54 Designing Ethics into AI. **2023**, 437-447 ○
- 53 Can Capitalism Drive Health Equity? Considering The Benefits And Risks Of Social Drivers Of Health Bonds. **2023**, 42, 392-394 ○
- 52 A typology for exploring the mitigation of shortcut behaviour. **2023**, 5, 319-330 ○
- 51 A "Do No Harm" Novel Safety Checklist and Research Approach to Determine Whether to Launch an Artificial Intelligence-Based Medical Technology: Introducing the Biological-Psychological, Economic, and Social (BPES) Framework. 25, e43386 ○
- 50 Constructive Interpretability with CoLabel: Corroborative Integration, Complementary Features, and Collaborative Learning. **2022**, ○

- 49 Understanding Suicide over the Life Course Using Data Science Tools within a Triangulation Framework. ○
- 48 Centering Patients' Voices in Artificial Intelligence-Based Telemedicine. **2023**, 113, 470-471 ○
- 47 Using ChatGPT to evaluate cancer myths and misconceptions: artificial intelligence and cancer information. **2023**, 7, ○
- 46 Teaching old tools new tricks—preparing emergency medicine for the impact of machine learning-based risk prediction models. ○
- 45 Replication of Real-World Evidence in Oncology Using Electronic Health Record Data Extracted by Machine Learning. **2023**, 15, 1853 ○
- 44 Effects of Racial Bias in Pulse Oximetry on Children and How to Address Algorithmic Bias in Clinical Medicine. ○
- 43 Integrating patient voices into the extraction of social determinants of health from clinical notes: ethical considerations and recommendations. ○
- 42 Hate Speech Classifiers Learn Normative Social Stereotypes. **2023**, 11, 300-319 ○
- 41 Current Status and Future Direction of Artificial Intelligence in Healthcare and Medical Education. **2020**, 22, 99-114 ○
- 40 Complex modeling with detailed temporal predictors does not improve health records-based suicide risk prediction. **2023**, 6, ○
- 39 Mitigating algorithmic bias in opioid risk-score modeling to ensure equitable access to pain relief. **2023**, 29, 769-770 ○
- 38 Employees Adhere More to Unethical Instructions from Human Than AI Supervisors: Complementing Experimental Evidence with Machine Learning. ○
- 37 Machine Learning in Tremor Analysis: Critique and Directions. ○
- 36 A manifesto for applying behavioural science. **2023**, 7, 310-322 ○
- 35 Human-Centered Design to Address Biases in Artificial Intelligence. 25, e43251 ○
- 34 Critical Bias in Critical Care Devices. **2023**, ○
- 33 Discrimination, Fairness, and the Use of Algorithms. ○
- 32 Developing an automated skeletal phenotyping pipeline to leverage biobank-level medical imaging databases. ○

- 31 Predictive Utility of Irritability in Context—Proof-of-Principle for an Early Childhood Mental Health Risk Calculator. 1-15
- 30 Effectiveness of a Vendor Predictive Model for the Risk of Pediatric Asthma Exacerbation: A Difference-in-Differences Analysis (Preprint).
- 29 Language about the future on social media as a novel marker of anxiety and depression: A big-data and experimental analysis. **2023**, 4, 100104
- 28 Association Between Community-Level Social Risk and Spending Among Medicare Beneficiaries. **2023**, 4, e230266
- 27 Ebenen der Explizierbarkeit ff.medizinische künstliche Intelligenz: Was brauchen wir normativ und was können wir technisch erreichen?.
- 26 Fairness in Design: A Framework for Facilitating Ethical Artificial Intelligence Designs. **2023**, 7, 32-39
- 25 Human visual explanations mitigate bias in AI-based assessment of surgeon skills. **2023**, 6,
- 24 Toward a Race-Conscious Entrepreneurship Education. 251512742311649
- 23 Analysis of the medical residency matching algorithm to validate and improve equity. **2023**, 18, e0284153
- 22 The Emerging Role of Artificial Intelligence in Valvular Heart Disease. **2023**,
- 21 Machine Learning to Predict Three Types of Outcomes After Traumatic Brain Injury Using Data at Admission: A Multicenter Study for Development and Validation.
- 20 Equity should be fundamental to the emergence of innovation. **2023**, 2, e0000224
- 19 Fairness as adequacy: a sociotechnical view on model evaluation in machine learning.
- 18 Perspectives on Health Disparities and Inequities in Radiation Oncology and Opportunities for Medical Physicists: From Awareness to Action. **2023**, 116, 6-11
- 17 Ethics of AI and Health Care: Towards a Substantive Human Rights Framework.
- 16 Foundation models for generalist medical artificial intelligence. **2023**, 616, 259-265
- 15 Spinal Cord Stimulator Inequities Within the US Military Health System. **2023**,
- 14 Differential Impact of a Plan-Led Standardized Complex Care Management Intervention on Subgroups of High-Cost High-Need Medicaid Patients. **2023**, 26, 100-106

- 13 Research Letter: Application of GPT-4 to select next-step antidepressant treatment in major depression. ○
- 12 Enhancing thoracic disease detection using chest X-rays from PubMed Central Open Access. **2023**, 106962 ○
- 11 Artificial Intelligence in Cardiology: Applications and Obstacles. **2023**, 101750 ○
- 10 Artificial Intelligence Applications in Hepatology. **2023**, ○
- 9 Assessing How Clinicians and Staff Would Use a Diabetes Artificial Intelligence Prediction Tool (Preprint). ○
