

CITATION REPORT

List of articles citing

A complex human gut microbiome cultured in an anaerobic intestine-on-a-chip

DOI: 10.1038/s41551-019-0397-0

Nature Biomedical Engineering, 2019, 3, 520-531.

Version: 2024-04-23

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

- 22 Current gut-on-a-chip platforms for clarifying the interactions between diet, gut microbiota, and host health. **2023**, 134, 1-12 ○
- 21 Mucus production, host-microbiome interactions, hormone sensitivity, and innate immune responses modeled in human endo- and ecto-cervix chips. ○
- 20 Gut-on-a-Chip for the Analysis of Bacteria-Bacteria Interactions in Gut Microbial Community: What Would Be Needed for Bacterial Co-Culture Study to Explore the Diet-Microbiota Relationship?. **2023**, 15, 1131 ○
- 19 Three-Dimensional Humanized Model of the Periodontal Gingival Pocket to Study Oral Microbiome. 2205473 ○
- 18 The Role of Fermented Dairy Products on Gut Microbiota Composition. **2023**, 9, 231 ○
- 17 Gut-on-a-chip models for dissecting the gut microbiology and physiology. **2023**, 7, 011502 ○
- 16 Primary human organoids models: Current progress and key milestones. 11, ○
- 15 Recapitulating essential pathophysiological characteristics in lung-on-a-chip for disease studies. 14, ○
- 14 Microfluidic intestine-on-a-chip: Current progress and further perspectives of probiotic-foodborne pathogen interactions. **2023**, 134, 207-221 ○
- 13 Pathogenesis: Crohn's disease and ulcerative colitis. **2023**, 9-46 ○
- 12 Getting closer to modeling the gut-brain axis using induced pluripotent stem cells. 11, ○
- 11 An in vitro platform for study of the human gut microbiome under an oxygen gradient. **2023**, 25, ○
- 10 Organ-on-a-Chip for Drug Screening: A Bright Future for Sustainability? A Critical Review. ○
- 9 A Microbial Community Cultured in Gradient Hydrogel for Investigating Gut Microbiome-Drug Interaction and Guiding Therapeutic Decisions. ○
- 8 MiGut : A scalable in vitro platform for simulating the human gut microbiome-Development, validation and simulation of antibiotic-induced dysbiosis. ○
- 7 Construction of Bone Hypoxic Microenvironment Based on Bone-on-a-Chip Platforms. **2023**, 24, 6999 ○

- 6 Comprehensive analysis of metabolites produced by co-cultivation of Bifidobacterium breve MCC1274 with human iPS-derived intestinal epithelial cells. 14,
- 5 Microfluidic devices and their applicability to cell studies. **2023**, 27-118
- 4 Microfluidics for nanopharmaceutical and medical applications. **2023**, 343-408
- 3 Sensors-integrated organ-on-a-chip for biomedical applications.
- 2 Cytocentric measurement for regenerative medicine. 5,
- 1 Gut microbiome homeostasis and the future of probiotics in cancer immunotherapy. 14,
