

# CITATION REPORT

List of articles citing

Small molecule-driven NLRP3 inflammation inhibition via interplay between ubiquitination and autophagy: implications for Parkinson disease

DOI: 10.1080/15548627.2019.1596481  
Autophagy, 2019, 15, 1860-1881.

**Source:** <https://exaly.com/paper-pdf/73573048/citation-report.pdf>

**Version:** 2024-04-20

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

- 23 Advances in NURR1-Regulated Neuroinflammation Associated with Parkinson's Disease. **2022**, 23, 16184 1
- 22 Ampelopsin alleviates cognitive impairment of SAMP8 mice by inhibiting microglial polarization and NLRP3 degradation via autophagy. 0
- 21 Role of  $\beta$ synuclein in microglia: autophagy and phagocytosis balance neuroinflammation in Parkinson's disease. 2
- 20 The NLRP3 inflammasome is a potential mechanism and therapeutic target for perioperative neurocognitive disorders. 14, 0
- 19 Autophagy in the retinal neurovascular unit: New perspectives into diabetic retinopathy. 0

- 18 CircEPS15, as a sponge of MIR24-3p ameliorates neuronal damage in Parkinson disease through boosting PINK1-PRKN-mediated mitophagy. 1-18
- 17 Dual stimulus responsive borosilicate glass (BSG) scaffolds promote diabetic alveolar bone defects repair by modulating macrophage phenotype. **2023**, 26, 231-248
- 16 The Role of the NLRP3 Inflammasome and Programmed Cell Death in Acute Liver Injury. **2023**, 24, 3067
- 15 TREM2 deficiency aggravates NLRP3 inflammasome activation and pyroptosis in MPTP-induced PD mice and LPS-induced BV2 cells.
- 14 Mitochondrial dysfunction in hearing loss: Oxidative stress, autophagy and NLRP3 inflammasome. 11,
- 13 Microbial Virulence Factors, Antimicrobial Resistance Genes, Metabolites, and Synthetic Chemicals in Cabins of Commercial Aircraft. **2023**, 13, 343
- 12 Role of mitochondrial stress and the NLRP3 inflammasome in lung diseases.
- 11 Pharmacological inhibition of STING signaling attenuates MPTP-induced neuroinflammation and neurodegeneration in mouse parkinsonian models.
- 10 NLRP3 Inflammasome Activation in Acute and Chronic Brain Diseases: An Update on Pathogenetic Mechanisms and Therapeutic Perspectives with Respect to Other Inflammasomes. **2023**, 11, 999
- 9 Post-traumatic Stress Disorder: Focus on Neuroinflammation.
- 8 Parkin regulates microglial NLRP3 and represses neurodegeneration in Parkinson's disease.
- 7 Lactobacillus plantarum postbiotics trigger AMPK-dependent autophagy to suppress Salmonella intracellular infection and NLRP3 inflammasome activation.
- 6 Discovery of kaempferol, a novel ADAM10 inhibitor, as a potential treatment for Staphylococcus aureus infection. **2023**,
- 5 NLRP3 mediates the neuroprotective effects of SVHRSP derived from scorpion venom in rotenone-induced experimental Parkinson disease model. **2023**, 116497
- 4 Degradation of NLRP3 by p62-dependent-autophagy improves cognitive function in Alzheimer's disease by maintaining the phagocytic function of microglia.
- 3 Melatonin-Driven NLRP3 Inflammation Inhibition Via Regulation of NF- $\kappa$ B Nucleocytoplasmic Transport: Implications for Postoperative Cognitive Dysfunction.
- 2 Role of microglia autophagy and mitophagy in age-related neurodegenerative diseases. 14,
- 1 Role of Dysregulated Autophagy in HIV Tat, Cocaine, and cART Mediated NLRP3 Activation in Microglia.
