

# CITATION REPORT

List of articles citing

## Reconstitution and structure of a plant NLR resistosome conferring immunity

DOI: 10.1126/science.aav5870  
Science, 2019, 364, .

**Source:** <https://exaly.com/paper-pdf/73637373/citation-report.pdf>

**Version:** 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

- 48 Structure, biochemical function, and signaling mechanism of plant NLRs. **2022**, ○ 1
- 47 SNP-based bulk segregant analysis revealed disease resistance QTLs associated with northern corn leaf blight in maize. 13, ○
- 46 Structure-function analyses of coiled-coil immune receptors define a hydrophobic module for improving plant virus resistance. ○
- 45 The *Arabidopsis* TIR-NBS-LRR protein CSA1 guards BAK1-BIR3 homeostasis and mediates convergence of pattern- and effector-induced immune responses. **2022**, 30, 1717-1731.e6 ○
- 44 Plant-Pathogen Interaction: New Era of Plant-Pathogen Interaction Studies: Omics Perspectives. **2022**, 172-180 ○
- 43 Exploring a diverse world of effector domains and amyloid signaling motifs in fungal NLR proteins. **2022**, 18, e1010787 ○

- 42 Ascorbate peroxidase 1 allows monitoring of cytosolic accumulation of effector-triggered reactive oxygen species using a luminol-based assay. 1
- 41 *Golovinomyces cichoracearum* effector-associated nuclear-localisation of RPW8 .2 amplifies its expression to boost immunity in *Arabidopsis*. 0
- 40 A pair of NLRs coordinately modulates NRC3-mediated ETI responses to facilitate age-dependent immunity. 0
- 39 ANTHRACNOSE RESISTANCE GENE2 confers fungal resistance in sorghum. 0
- 38 Gene-for-gene-mediated resistance to southern corn rust in maize. **2022**, 0
- 37 Resurrection of plant disease resistance proteins via helper NLR bioengineering. 0
- 36 A dominant-negative avirulence effector of the barley powdery mildew fungus provides mechanistic insight to barley MLA immune receptor activation. 0
- 35 Analysis of cell death induction by the barley NLR immune receptor PBR1. 0
- 34 Sensing of viral RNA in plants via a DICER-LIKE Ribonuclease. 0
- 33 Effector-dependent activation and oligomerization of plant NRC class helper NLRs by sensor NLR immune receptors Rpi-amr3 and Rpi-amr1. 0
- 32 Mechanism of NAIP5-NLRC4 inflammasome activation revealed by cryo-EM structure of unliganded NAIP5. 0
- 31 The potato resistance protein Rx1 multimerizes upon activation by the Coat Protein of PVX. 0
- 30 Assembly and Architecture of NLR Resistosomes and Inflammasomes. **2023**, 52, 0
- 29 Sensor NLR immune proteins activate oligomerization of their NRC helpers in response to plant pathogens. 0
- 28 Model systems in cell death-grand challenge. 1, 0
- 27 An atypical NLR protein modulates the NRC immune receptor network in *Nicotiana benthamiana*. **2023**, 19, e1010500 0
- 26 Plasma membrane association and resistosome formation of plant helper immune receptors. 0
- 25 Conventional and new-breeding technologies for improving disease resistance in lentil (*Lens culinaris* Medik). 13, 0

- 24 Plant immune receptor pathways as a united front against pathogens. **2023**, 19, e1011106 ○
- 23 Dynamics of plant immune MAPK activity and ROS signaling in response to invaders. **2023**, 125, 102000 ○
- 22 Members of the tomato NRC4 h-NLR family augment each other in promoting basal immunity. **2023**, 330, 111632 ○
- 21 Plant immune signaling network mediated by helper NLRs. **2023**, 73, 102354 ○
- 20 Legumes Regulate Symbiosis with Rhizobia via Their Innate Immune System. **2023**, 24, 2800 ○
- 19 Genetics of Resistance to Leaf Rust in Wheat: An Overview in a Genome-Wide Level. **2023**, 15, 3247 ○
- 18 Plant Immunity: A Plastic System Operated Through Cell-Fate Transition. ○
- 17 Global translational induction during NLR-mediated immunity in plants is dynamically regulated by CDC123, an ATP-sensitive protein. **2023**, 31, 334-342.e5 ○
- 16 The maize ZmVPS23-like protein relocates the nucleotide-binding leucine-rich repeat protein Rp1-D21 to endosomes and suppresses the defense response. ○
- 15 The ANIP1-OsWRKY62 module regulates both basal defense and Pi9-mediated immunity against Magnaporthe oryzae in rice. **2023**, 16, 739-755 ○
- 14 HSP90.2 modulates 2Q2-mediated wheat resistance against powdery mildew. ○
- 13 Plant and prokaryotic TIR domains generate distinct cyclic ADPR NADase products. **2023**, 9, ○
- 12 Subcellular localization requirements and specificities for plant immune receptor Toll-interleukin-1 receptor signaling. ○
- 11 ZED1-related kinase 13 is required for resistance against Pseudoidium neolycopersici in Arabidopsis accession Bla-6. 14, ○
- 10 The immune receptor SNC1 monitors helper NLRs targeted by a bacterial effector. ○
- 9 The NLR gene family: from discovery to present day. ○
- 8 Tsw: an NLR protein that keeps viruses away. ○
- 7 Cell death as a defense strategy against pathogens in plants and animals. **2023**, 19, e1011253 ○

- 6 Gene B5 in Cotton Confers High and Broad Resistance to Bacterial Blight and Conditions High Amounts of Sesquiterpenoid Phytoalexins. ○
- 5 Immune signaling networks in plant-pathogen interactions. **2023**, 137-147 ○
- 4 Activation of Tm-2 2 resistance is mediated by a conserved cysteine essential for tobacco mosaic virus movement. ○
- 3 The evolution of plant NLR immune receptors and downstream signal components. **2023**, 73, 102363 ○
- 2 TIR enzymatic functions: signaling molecules and receptor mechanisms. ○
- 1 Utilising natural diversity of kinases to rationally engineer interactions with the angiosperm immune receptor ZAR1. ○
