

CITATION REPORT

List of articles citing

Ruthenium atomically dispersed in carbon outperforms platinum toward hydrogen evolution in alkaline media

DOI: 10.1038/s41467-019-08419-3
Nature Communications, 2019, 10, 631.

Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

- 7 In situ constructing atomic interface in ruthenium-based amorphous hybrid-structure towards solar hydrogen evolution. **2023**, 14, ○
- 6 Insights into the Oxygen Evolution Reaction on Graphene-Based Single-Atom Catalysts from First-Principles-Informed Microkinetic Modeling. **2023**, 13, 5225-5235 ○
- 5 Enhanced C/O Functionality on Carbon Papers Ensures Lowering Nucleation Delay of ALD for Ru towards Unprecedented Alkaline HER Activity. ○
- 4 Engineering strategies and active site identification of MXene-based catalysts for electrochemical conversion reactions. ○
- 3 Facile and Scalable Synthesis of Metal- and Nitrogen-Doped Carbon Nanotubes for Efficient Electrochemical CO₂ Reduction. ○
- 2 Size effect of ruthenium nanoparticles on water cracking properties with different crystal planes for boosting electrocatalytic hydrogen evolution. **2023**, ○
- 1 Modulating the interfacial built-in electric field in oxygen vacancies-enriched Ru/M_xO_y@C (M=Ir, Nb, Ta) ordered macroporous heterojunctions for electrocatalytic hydrogen production. **2023**, 467, 143374 ○
