

CITATION REPORT

List of articles citing

Four-factor prothrombin complex concentrate is associated with improved survival in trauma-related hemorrhage: A nationwide propensity-matched analysis

DOI: 10.1097/ta.0000000000002262

Journal of Trauma and Acute Care Surgery, 2019, 87, 274-281.

Version: 2024-04-28

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.
