Synchrophasor-Based Condition Monitoring of Instrum
Approach

Citation Report

#	ARTICLE	IF	CITATIONS
1	Investigating Effects of Pre-Processing Variation on Time-Varying Steam Temperature of Distillation Column. , 2019, , .		6
2	Real–time estimation of ATC using PMU data and ANN. IET Generation, Transmission and Distribution, 2020, 14, 3604-3616.	2.5	5
3	Static and Dynamic Joint Analysis for Operation Condition Division of Industrial Process With Incremental Learning. IEEE Internet of Things Journal, 2022, 9, 22081-22094.	8.7	6
4	Use of Fourier Transform to Detect the Relationship Between Voltage and Current Distortion of the Transformer with Damage to the Winding. , 2021, , .		1
5	An on-line anomaly identifying method for calibration devices in an automatic verification system for electricity smart meters. Measurement: Journal of the International Measurement Confederation, 2021, 180, 109606.	5.0	6
6	Data–driven operation of the resilient electric grid: A case of COVID–19. Journal of Engineering, 2021, 2021, 665-684.	1.1	6
7	A multi-terminal traveling wave fault location method for active distribution network based on residual clustering. International Journal of Electrical Power and Energy Systems, 2021, 131, 107070.	5.5	27
8	Detection and Location of Aged Cable Segment in Underground Power Distribution System Using Deep Learning Approach. IEEE Transactions on Industrial Informatics, 2021, 17, 7379-7389.	11.3	28
9	Impacts of Communication Network Availability on Synchrophasor-Based DTR and SIPS Reliability. IEEE Systems Journal, 2022, 16, 6231-6242.	4.6	19
10	PIPC: Privacy- and Integrity-Preserving Clustering Analysis for Load Profiling in Smart Grids. IEEE Internet of Things Journal, 2022, 9, 10851-10861.	8.7	4
11	Two-Level Ensemble Methods for Efficient Assessment and Region Visualization of Maximal Frequency Deviation Risk. IEEE Transactions on Power Systems, 2023, 38, 643-655.	6.5	1
12	Intelligent Identification of Embedded System Equipment State Based on Internet of Things. Mobile Information Systems, 2022, 2022, 1-11.	0.6	0
13	A Survey on Information Communication Technologies in Modern Demand-Side Management for Smart Grids: Challenges, Solutions, and Opportunities. IEEE Engineering Management Review, 2023, 51, 76-107.	1.3	14
14	Probabilistic Fault Identification Based on Maximum Likelihood Method in Distribution Networks. , 2022, , .		0
15	Remote Monitoring and Defect Detection System for Transformer Assembly. , 2022, , .		0
16	Electricity Theft Detection Based on Contrastive Learning and Non-Intrusive Load Monitoring. IEEE Transactions on Smart Grid, 2023, 14, 4565-4580.	9.0	4
17	Capacitor Coupled Voltage Transformer Inaccuracy Effect on Circuit Breaker Operation. , 2023, , .		0
18	Non-intrusive defects identification for the high voltage instrument transformers. , 2023, , .		0
