

CITATION REPORT

List of articles citing

Characteristics, drivers and feedbacks of global greening

DOI: 10.1038/s43017-019-0001-x

Nature Reviews Earth & Environment, 2020, 1, 14-27.

Version: 2024-04-23

This report has been generated based on the citations recorded by exaly.com for the above article. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
587	Spatial and temporal variations in global soil respiration and their relationships with climate and land cover. 2020 , 6,		29
586	Quantifying the impact of vegetation changes on global terrestrial runoff using the Budyko framework. 2020 , 590, 125389		14
585	Impact of recent vegetation greening on temperature and precipitation over China. 2020 , 295, 108197		27
584	The status and stability of permafrost carbon on the Tibetan Plateau. 2020 , 211, 103433		33
583	Biophysical impacts of Earth greening largely controlled by aerodynamic resistance. 2020 , 6,		21
582	Rapid Urbanization and Agricultural Intensification Increase Regional Evaporative Water Consumption of the Loess Plateau. 2020 , 125, e2020JD033380		1
581	Partitioning Global Surface Energy and Their Controlling Factors Based on Machine Learning. 2020 , 12, 3712		
580	Future greening of the Earth may not be as large as previously predicted. 2020 , 292-293, 108111		12
579	A spatial-temporal continuous dataset of the transpiration to evapotranspiration ratio in China from 1981-2015. 2020 , 7, 369		7
578	Response of vegetation to El Niño-Southern Oscillation (ENSO) via compound dry and hot events in southern Africa. 2020 , 195, 103358		6
577	Accelerated rate of vegetation green-up related to warming at northern high latitudes. 2020 , 26, 6190-6202		12
576	Relation between leaf area index and NDVI for subarctic deciduous vegetation. 2020 , 41, 8573-8589		2
575	The Greening and Wetting of the Sahel Have Levelled off since about 1999 in Relation to SST. 2020 , 12, 2723		3
574	Evaluation of Evapotranspiration Models Using Different LAI and Meteorological Forcing Data from 1982 to 2017. 2020 , 12, 2473		5
573	Increasing Summer Rainfall and Asymmetrical Diurnal and Seasonal Warming Enhanced Vegetation Greenness in Temperate Deciduous Forests and Grasslands of Northern China. 2020 , 12, 2569		3
572	Research challenges and opportunities for using big data in global change biology. 2020 , 26, 6040-6061		15
571	Spatiotemporal Variation and Climate Influence Factors of Vegetation Ecological Quality in the Sanjiangyuan National Park. 2020 , 12, 6634		1
